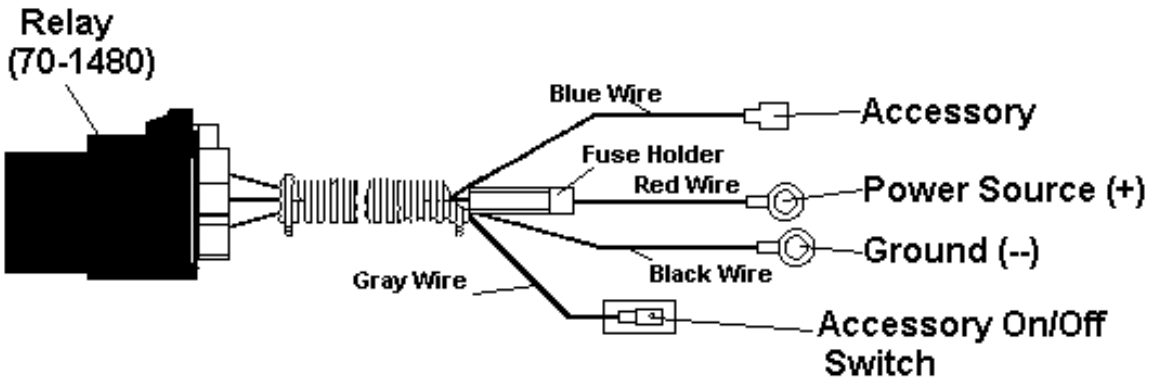
Subject: Relay Wire Harness for Accessories or Repairs.

Relay Wire Harness (77-4200) can be utilized to aid in the repair of damaged/corroded relay wiring or relay connector bodies. It is also available for use in adding electrical accessories such as lights, heaters and air conditioning options. The Relay Wire Harness consists of a sealed relay connector body and terminals, heavy duty wires, Fuse Holder (30 Amp rating) and protective conduit. The kit shown below is available through your local Toro distributor.

RELAY WIRE HARNESS (77-4200) INSTALLATION FOR OPTIONAL ACCESSORIES



IMPORTANT:
When using this assembly to connect after market accessories to an electrical system, be certain the wire size available in this harness is adequate to handle the amperage draw of the accessory to be installed. Equipment malfunction or damage may result if this factor is not considered.

Relay Wire Harness (77-4200) is supplied with a 30 Amp Fuse. Do not install a fuse of a high rating.
