

Choosing A Rotary Deck For Your Roughs

Groundsmaster® Mowers Offer Range of Capabilities

No two golf courses are alike, but they all face the same kinds of issues. That's why Toro developed a series of Groundsmaster® rough mowers. Each one of these units will deliver the superior power, productivity and high quality of cut that everybody needs...but then what else is important to you specifically? Wider mowing? Individual contour-following decks? Better striping? Recycling decks?

Toro Groundsmaster mowers offer you a choice of rotary cutting decks and other versatile options to provide exactly the performance and appearance you want for your course's unique style and characteristics.

Groundsmaster 4700-D

One of our largest and most productive rough mowers, the Groundsmaster 4700-D features seven unique Contour Plus rotary decks. Each free-floating deck follows the contours of the ground to deliver a smooth, consistent cut overall.

Hills and terrain changes won't slow down this powerful, 60-hp unit, even on thick, wet grass.

The 4700-D mows a big 12.5' wide cut, and the heavy-duty rollers behind each deck create a handsome striping pattern, even in heavy rough.

Groundsmaster 4500-D

Also powered by a monster 60-hp turbo-charged diesel engine, the Groundsmaster 4500-D unit comes with five revolutionary Contour Plus rotary decks. The 4500-D can neatly zip through hilly, thick rough with a generous 9' mowing swath, and leave a beautiful striping pattern behind. The 4500-D, like the 4700-D, provides impressive bi-directional, all-wheel traction on any terrain, and it's ergonomically designed for more operator comfort and convenience.

Groundsmaster 4000-D

For tremendous mowing performance, excellent traction and floating side decks, choose the Groundsmaster 4000-D with its three offset cutting decks which can be converted to Guardian® Recycler® decks. The powerful 60-hp turbo diesel engine on the 4000-D provides an ample 11' wide cutting swath. It will muscle through your toughest conditions. You can quickly mow back-and-forth patterns

without leaving any grass uncut. Also, the offset "wing decks" of the 4000-D fold up and back for easier transport.

Groundsmaster 4100-D

The Groundsmaster 4100-D features Toro's exclusive new "all out-front" design for maximized operator visibility and maneuverability. The shallow front rotary deck combines more maneuverability with top-quality cutting in a 10.5' wide swath. The 4100-D provides incredible trimming capabilities, thanks to its tighter wheelbase and smooth turning. That means you can quickly mow under low trees and shrubs, even around obstacles and on hills.

Helpful Attachments

The Groundsmaster 4000 and 4100-D mowers even offer a range of handy accessories and all-season attachments, such as a debris blower, snow thrower (4000 only), rotary broom, cruise control, air-conditioned cab and more. A mulching kit is also available for the 4500 and 4700-D units.

Whatever you need in a hard-working, high-performing rough mower, Toro has the equipment and choices for you. ■
