

# Give your business the TURBO FORCE® advantage.

We didn't just design a cutting deck tough enough to withstand the rigors of commercial mowing — we revolutionized deck construction. Meet the industry-leading, patented TURBO FORCE® cutting platform — a productivity-enhancing deck available on both Toro mid-size walk-behinds and zero-turn riders.

## Condition-Adaptive Cutting For Maximum Productivity

The deck's patented adjustable front baffle is a Toro exclusive that allows operators to fine-tune their cutting performance based on changing grass conditions. In long, dense grass or wet conditions, the front baffle can be opened wide to increase the discharge opening and achieve faster mowing speeds. In less demanding conditions, close down the baffle to yield micro-sized grass particles and maximize discharge velocity. The baffle position can be easily changed in seconds, without tools.

### The Industry's Toughest Spindle Assemblies

Toro's rugged spindle assemblies survive impacts that would destroy lesser models. A stout cast iron housing with a massive 9-3/8-inch diameter base and six mounting bolts absorbs impact loads and distributes them across a broader area of the deck shell. Plus, the solid, one-inch diameter shaft is machined from high-strength alloy steel, not the common lower-grade steel used in many competitive models.

**33% thicker** | **75% stronger**

than ordinary 10-gauge commercial steel used in 7/10 decks

### An Ultra-Durable Deck Shell That Resists Damage From Impacts

The fabricated deck shell of the Z Master® TURBO FORCE

deck is constructed of 7-gauge, high-strength steel that's 33% thicker and 75% stronger than ordinary m10-gauge commercial steel used in 7/10 decks. At a full 5-1/2 inches deep, the deck shell easily handles the most demanding conditions, resisting damage from impacts and abrasion.

### Flexible Discharge Chute Offering Added Protection

Toro's patented flexible rubber discharge chute allows for close trimming without damaging the chute or landscape structures in its way. Standard on every TURBO

FORCE deck, the chute's exclusive design provides exceptional dispersion while protecting operators, bystanders and personal property from inadvertent damage.

"With an all-Toro lineup of mowing equipment, I count on these machines the same way my customers count on me. When they see us ... and our Toro machines ... they know they're getting the same great cut they've come to expect time after time."
