

DFS Vac™ Collection System

The Industry's Fastest ZRT Collection System

Quiet and powerful, the Toro DFS Vac Collection System is the industry's first and only true vacuum bagger. Featuring a top-rear mounted PTO driven commercial vacuum system, the Toro DFS Vac delivers powerful vacuum suction to rapidly draw debris into the hopper. Add to that a DFS (Dump-From-the-Seat) hopper, and there's no faster way to bag!

Fast 55 mph intake velocity allows for bagging at faster speeds.

Top-mounted vacuum design protects the fan from sand and debris resulting in significantly longer life, and lower noise. PTO drive delivers more consistent impeller speed compared to spindle-driven or pony drive baggers

Rear, top-mounted fan is protected from costly impact related damage.

Exhaust air is directed downward and to the rear making for a cleaner operator environment.

Fast, convenient dump-from-the-seat design allows you to dump debris in only seconds-without ever having to leave your seat!

Easy to install front castor weights provide solid stability

Compact hopper width does not extend past the drive tires for easier maneuverability around job sites.

Impact resistant, high strength polyethylene hopper and tube are puncture and wear resistant resulting in less dust around the operator and engine.

Rugged 7 guage steel skid guard protects drive system from damage.

Fast, quick attach bagger design allows easy conversion from bagging to side discharge in minutes without tools.

Powerful PTO-driven fan reduces horse-power requirement providing more horsepower to drive tires and deck.

Heavy duty strap and cleat ensures a reliable tube and boot connection.

Durable 1 1/2" diameter steel guard protects boot against impact.

Industry's most convenient boot. No drive belts or fasteners to remove, means a fast, no tools, on-off installation.

Narrow, lightweight, high-strength polyethylene boot allows the deck to rest level, cut even, and float easily over undulating terrain.

Large 9 blade fan turns at 4,100 RPM maximizing air-flow and debris compaction.

Powerful 950 cu ft./min vacuum action handles large volumes of grass and leaves with less clogging.

DFS Vac™ Collection System

Toro® DFS Vac™ Specs

	Z Master Z100 Series	Z MasterZ200 Series
Collection Capacity:	10 cu. ft.	14 cu. ft.
Collection Tube Diameter:	6"	6"
Vacuum Fan:	9-Blade durable cast aluminum	9-Blade durable cast aluminum
Fan Shaft:	3/4" solid steel	3/4" solid steel
Maintenance-free bearings:	3; sealed ball bearing w/locking collar	3; sealed ball bearing w/locking collar
Total Collection System Weight: (includes weight kit)	365 lbs (166 kg)	Liquid cooled - 453 lbs (205kg) Air cooled & EFI - 497 lbs (225kg)
Total Unit Width: (bagger & mower)	44" Deck - 54.63" (138.76cm) 52" Deck - 62.63" (159.08cm)	52" Deck - 62.63" (159.08cm) 62" Deck - 72.63" (184.48cm)
Total Unit Length: (bagger & mower)	44" Deck - 97.33" (247.22cm) 52" Deck - 97.33" (247.22cm)	52" Deck - 115.50" (293.37cm) 62" Deck - 117.50" (298.45cm)
