

Z MASTER® G3

EFI *Electronic Fuel Injection*

The Toro Z Master G3, Toro's most advanced zero-turning radius mower is also available with electronic fuel injection (EFI) technology. Powered by Kohler's 29 horsepower EFI engine, these highly efficient mowers reduce fuel consumption while delivering outstanding load pick-up and response.

OUTSTANDING PERFORMANCE

Z Master G3 models have a low center of gravity, adding more stability for greater handling on hills. And while maneuverability on Z Master mowers has always been outstanding, now it's simply superior.

IMPROVED COMFORT

Not only will you be comfortable choosing a G3, you'll be comfortable riding one. The custom seat features large bolsters, thick cushions and 3-D isolator mounts to absorb bumps and reduce operator fatigue.

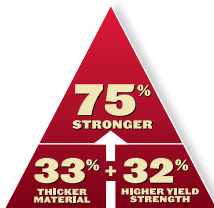

TURBO FORCE® CUTTING TECHNOLOGY

For ultimate jobsite productivity, the patented TURBO FORCE adjustable front baffle lets you quickly modify the cutting chamber to deliver a superior cut regardless of the mowing conditions. Through long, wet grass, different types of turf and changing seasons, you'll get a cut you can be proud of every time - the kind that builds business and keeps it. Bottom line, you can deliver the quality customers demand with the speed you need to boost productivity.

TORO®

Count on it.

TURBO FORCE® DECKS

The fabricated deck shell of the TURBO FORCE deck is constructed of 7-gauge, high-strength steel that's 33% thicker and 32% higher in yield strength than ordinary 10-gauge commercial steel used in 7/10 decks. The combined effect is a deck shell that is 75% stronger, so it easily handles the most demanding conditions and resists damage from impacts and abrasion. The deck is further reinforced by the bull-nose front bumper, a 1/2" trim side wear guard, and a 3/8" thick plate around the discharge opening.

Products depicted on this sell sheet are for demonstration purposes only. Actual products offered for sale may vary in design, required attachments and safety features.

*The gross horsepower of these engines was laboratory rated by the engine manufacturer in accordance with SAE J1940. As figured to meet safety, emission and operating requirements, the actual engine horsepower on these mowers will be significantly lower.

Z MASTER® G3 EFI FEATURES

EFI FUEL EFFICIENCY

As the cost of fuel continues to fluctuate, Toro is pleased to provide a fuel efficient gasoline option. The Z Master EFI features the newest technology from Kohler engines – Closed-Loop EFI. The environmentally friendly design exceeds requirements for CARB Tier III and EPA Phase III, and keeps emissions as low as possible by continuing to run at optimal levels. The advantage for users: the engine automatically adapts to load, weather, fuel and altitude changes.

SUPERIOR FUEL ECONOMY

- Up to 25% better fuel economy than equivalent carbureted engines
- Lower operating cost
- Longer run time between reueling

EXCELLENT LOAD RESPONSE

- Excellent load pick-up and load response results in more consistent power
- Delivers fuel wherever and whenever there is a demand for power

EFFORTLESS STARTING

- Easy starting in a wide range of altitudes and climates
- No-choke starting

OUTSTANDING RELIABILITY

- Sensors monitor the engine as it runs, and indicator lights provide early warning of any potential issues before they occur
- Pays for itself in increased reliability and decreased service time
