

Z Master Soft Bagger

Custom designed polyethylene flow director optimizes fill capacity.

Replaceable high density polyethylene inner liner, protects blower housing from premature sand wear/blow-out.

Large 15.5", 4-blade impeller made of high strength 10-gauge steel, reduces debris size.

Quick release blower provides hassle-free maintenance, no tools, no hardware or belt removal required.

Commercial grade mesh bags collect up to 8 bushels of material.

Translucent 6" diameter hose provides early indication when bags are full.

Easy on-off blower mounting assembly.

1-1/2" durable steel guard.
