

LAZER Z[®] S-SERIES

Model No. LZS749AKC724A1—Serial No. 400000000 and Up

Picture below may not reflect actual product.

Parts Manual

Ordering Replacement Parts

To order replacement parts, please supply the part number, the quantity, and the description of each part desired.

Understanding Reference Numbers

Each identified part in an illustration has a reference number. The reference number for a part also appears in the parts list, along with other information about the part.

This catalog uses two special reference number formats, one to indicate parts in a service assembly and another to indicate the quantity of a given part in an illustration.

Service Assembly Reference Numbers

Parts in service assemblies have reference numbers in the form a:b. The a represents the reference number of the entire service assembly and the b represents a sequential number unique to each part within the service assembly.

For example, a wheel assembly might be identified by reference number 6, the tire by 6:1, the valve by 6:2, and the wheel by 6:3. When you order the assembly identified by reference number 6, you receive all parts identified by reference numbers 6:1, 6:2, and 6:3. However, you may also order any part individually. Reference numbers of this type appear in illustration and in parts lists.

Reference Numbers Indicating Quantity

In an illustration, if a reference number indicates more than one part, the reference number has the form nX y. The n represents the quantity of the part, the X is the multiplication symbol, and the y represents the reference number.

For example, in an illustration, the reference number 2X 37 means that two of the parts identified by reference number 37 are indicated.

List of Abbreviations

AR: as required	HLH: hex lag head	PTH: phillips truss head
ASM: assembly	HOC: height-of-cut	PTO: power-take-off
BBC: blade brake control	HP: high pressure	RH: right hand
BHTF: button head thread forming	HSBH: hex socket button head	ROPS: roll-over protection system
CARR: carriage	HSFH: hex socket flat head	RRB: rear roller brush
CCW: counter clockwise	HSH: hex socket head	SFH: slotted fillister head
CW: clockwise	HWH: hex washer head	SHH: slotted hex head
DEG: degrees	HWHTF: hex washer head thread forming	SHWH: slotted hex washer head
DPA: Dual Point Adjustment	HYD: hydraulic	SPH: slotted pan head
ECM: electronic control module	LH: left hand	SQH: square head
EXT: external	LP: low pressure	SRH: slotted round head
FH: flat head	LPG: Liquefied Petroleum Gas	STD: standard
GA: gauge	NI: nylon insert	TAP: self tapping
HD: heavy-duty	NPTF: national pipe thread fine	TTH: torx truss head
HF: hex flange	PFH: phillips flat head	
HH: hex head	PPH: phillips pan head	
HHF: hex head flange	PPHTF: phillips pan head thread forming	
HHFTF: hex head flange thread forming	PRH: phillips round head	
HJ: hex jam		

Touch Up Paint

Exmark black touch up spray paint – gloss black.

Exmark red touch up paint (spray paint – P/N 1-850337 - .6 oz liquid bottle – P/N 103-9140).

If your Exmark dealer does not have the Exmark part in stock, Exmark will get the parts to the dealer the next business day or the part will be FREE Guaranteed!! (Some restrictions apply. See your participating Exmark Dealer for details.)

● Torque to 50-60 ft-lb

■ Torque to 130-160 ft-lb

▲ Requires installation of mulch kit for proper mulching. See your Exmark dealer for details.

♦ Apply Mobil HTS grease (P/N 103-5217 1.5 oz packet) (or a food-grade anti-seize) to spindle shaft

□ Apply lubricant to threads as needed to prevent seizing. Copper based anti-seize preferable. Grease is an acceptable substitute.

This technical drawing is an exploded view of a mechanical assembly, likely a robotic arm or a similar articulated structure. The diagram shows the following components and their assembly sequence:

- Part 1:** The main vertical support structure, shown in two views (left and right).
- Part 2:** A horizontal arm or bracket that connects to the main support.
- Part 3:** A small cylindrical component, possibly a bush or a pin, located near the base of the arm.
- Part 4:** A long, curved arm or link that is the primary moving part of the assembly.
- Part 4:2:** A sub-component or section of the main arm (Part 4).
- Part 5:** A small rectangular component, possibly a sensor or a connector, located near the base of the arm.
- Part 6:** A long, thin cylindrical component, possibly a shaft or a pin, located near the base of the arm.
- Part 7:** A small circular component, possibly a washer or a pin, located near the base of the arm.
- Part 8:** A small cylindrical component, possibly a bush or a pin, located near the base of the arm.
- Part 9:** A long, thin cylindrical component, possibly a shaft or a pin, located near the base of the arm.
- Part 10:** A small circular component, possibly a washer or a pin, located near the base of the arm.
- Part 11:** A small circular component, possibly a washer or a pin, located near the base of the arm.
- Part 12:** A small rectangular component, possibly a sensor or a connector, located near the base of the arm.
- Part 13:** A small cylindrical component, possibly a bush or a pin, located near the base of the arm.
- Part 14:** A small rectangular component, possibly a sensor or a connector, located near the base of the arm.

The diagram uses dashed lines to indicate the assembly path and the relative positions of the components. The components are numbered 1 through 14, with some parts having sub-identifiers like 4:2.

This technical drawing is an exploded view of a mechanical assembly, likely a pump or engine component. It shows the following parts and their assembly sequence:

- Part 1:** The main housing or base plate, shown at the bottom.
- Part 2:** A fan or impeller assembly, shown at the top right.
- Part 3:** A circular cover or end plate, shown at the bottom right.
- Part 4:** A small pin or clip, shown on the right side.
- Part 5:** A screw or bolt, shown at the top right.
- Part 6:** A washer or spacer, shown at the top right.
- Part 7:** A series of seals or gaskets, shown in the middle right.
- Part 8:** A large, ribbed component, possibly a pump head or impeller, shown in the middle right.
- Part 9:** A series of small pins or screws, shown at the top left.
- Part 10:** A small pin or clip, shown at the top left.
- Part 11:** A small pin or clip, shown at the top left.
- Part 12:** A small pin or clip, shown at the top left.
- Part 13:** A small pin or clip, shown at the top left.
- Part 14:** A small pin or clip, shown at the top left.
- Part 15:** A small pin or clip, shown at the top left.
- Part 16:** A small pin or clip, shown at the top left.
- Part 17:** A small pin or clip, shown at the top left.
- Part 18:** A small pin or clip, shown at the top left.
- Part 19:** A small pin or clip, shown at the top left.
- Part 20:** A small pin or clip, shown at the top left.
- Part 21:** A small pin or clip, shown at the top left.
- Part 22:** A small pin or clip, shown at the top left.
- Part 23:** A small pin or clip, shown at the top left.
- Part 24:** A small pin or clip, shown at the top left.

The diagram uses dashed lines to indicate the assembly path and alignment of the components.

MAXIMIZE THE PERFORMANCE OF YOUR EXMARK MACHINE.

EXMARK® PREMIUM ENGINE OIL

Exmark now offers a family of engine oil viscosities to perform well in any environment. Each viscosity has the same synthetic formulation to give you what you need in punishing conditions. We designed each grade to the highest quality, making it ideal even for diesel applications. Coupled with Exmark Premium Fuel Treatment, we have the performance products to make your machine hum.

EXMARK PREMIUM ENGINE OIL SAE 30/10W-30

- Meets zero shear requirements of a straight grade SAE 30 as well as the cold temp properties of a 10W-30.
- Most versatile oil in the industry.
- Superior corrosion protection over conventional oil - even in corrosive, humid environments.

EXMARK PREMIUM ENGINE OIL SAE 20W-50

- Perfect for your big block engine, or any application in severe service.
- Same full synthetic formulation as all other Exmark Premium viscosities.
- Also effective for use in severe service small block engines.

EXMARK PREMIUM ENGINE OIL SAE 10W-50

- Full synthetic formulation gives you peak performance. Don't settle for less.
- Wide span multi-grade combines easy starting in cold weather with maximum protection in high temperature operation.
- Reduce friction & wear over standard mineral formulations.

EXMARK PREMIUM ENGINE OIL SAE 0W-40

- The perfect choice for when the weather turns cold or unpredictable, and your Exmark UTV has to perform.
- Commercial quality for severe service.
- Advanced additive package helps prevent corrosion from long-term storage.

EXMARK PREMIUM ENGINE OIL UTV FORMULATION

- 4-cycle high-temp formulation.
- Heavier viscosity, full synthetic, perfect for your UTV.

EXMARK PREMIUM UTV EXTREME CONDITIONS GEAR OIL

- SAE 80W-90, designed to keep your UTV performing at its peak.
- Shear stable, hypoid gear lube.
- Includes a premium additive system to combat wear, oxidation, rust & corrosion.

Available from your local Exmark dealer. Find your closest dealer at exmark.com
