Part Description Abbreviations

Part descriptions in this catalog may include the following abbreviations.

Abbreviation	Meaning	Abbreviation	Meaning
AR	as required	HH	hex head
ASM	assembly	HHF	hex head flange
CARR	carriage	HHST	hex head self tapping
DEG	degrees	HJ	hex jam
FH	flat head	HOC	height-of-cut
GA	gauge	HS	hex socket
HF	hex flange	HSBH	hex socket button head
HFW	hex flange washer	HSFH	hex socket flat head

HSB	hex socket head	SFH	slotted fillister head
HWH	hex washer head	SH	square head
HWHTF	hex washer head thread forming	SHWH	slotted hex washer head
INC	incorporated	SPH	slotted pan head
LH	left hand	STD	standard
PH	pan head	TAP	self tapping
PPH	Phillips pan head	TH	truss head
PTO	power take off	TTH	Torx truss head
RH	right hand	WH	wing head

Important Format Explanations

This catalog uses special formats to convey information in illustrations and parts lists. Specifically, one format is used in conjunction with service assemblies and another with quantities associated with reference numbers.

Service Assemblies

Parts within service assemblies have reference numbers in the form *X:Y*. *X* is the reference number of the service assembly and *Y* is a sequential number unique to each part within the service assembly.

For example, a wheel assembly might be identified by reference number 6, the tire by 6:1, the valve by 6:2, and the wheel by 6:3. When you order the assembly identified by reference number 6, you receive all parts identified by reference numbers 6:1, 6:2, and 6:3. However, you may also order any part individually.

Reference numbers of this type appear in part lists and as callouts in illustrations.

Reference Numbers with Quantities

Illustrations may have a quantity in parentheses next to a reference number, in the form *X (Y)*. *X* is the reference number. *Y* in parentheses is the quantity of the part identified by the reference number.

For example, the illustration callout 4 (2) indicates that two parts are used in that instance.
