

44" Mower Deck**Blade Bolt Torque Correction****Operator Manual
Addendum**

The blade bolt torque value stated in the blade maintenance section of your 44-inch mower operator's manual is incorrect. The correct torque value to use when tightening the blade bolt is 40-60 ft-lb (54-81 Nm).

Please cross out the incorrect torque value and write the correct torque value into the instructions. Keep this addendum with your operator's manual.
