

Roller Scraper Kit

Groundsmaster® 1200 Series Pull Behind Rotary Mower

Model No. 140-0034

Installation Instructions

Installation

Loose Parts

Use the chart below to verify that all parts have been shipped.

Procedure	Description	Qty.	Use
1	Template	1	Drill the holes.
2	Wire	12	
	Bushing	6	
	Lock washer	6	Install the roller scrapers.
	Washer	6	
	Nut	6	

Drilling the Holes

Parts needed for this procedure:

Procedure

Note: This procedure is only for machines that do not have existing holes.

Note: Ensure the template is in the correct position on both sides of the front and rear rollers.

- Park the machine on a level surface, shut off the engine, chock the wheels or set the parking brake if attached to a traction unit, and remove the key from the ignition switch.
- 2. Align the template as shown in Figure 1 and mark the holes.

Important: Ensure you have the template tight against the bearing housings.

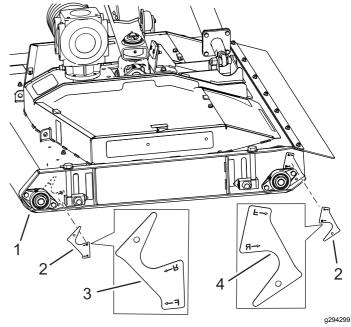

Figure 1

- Front bearing housing—left side
- 2. Template
- 3. Align this edge to the front bearing housing.
- 4. Align this edge to the rear bearing housing.

3. Mark the position and drill 13/32 inch holes on each side at the end of the rollers (Figure 2).

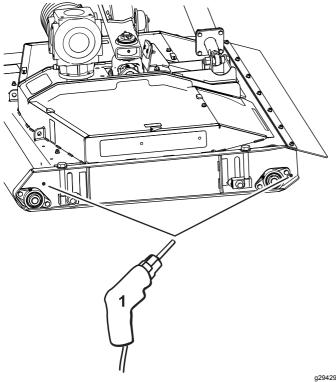

Figure 2

- 1. Drill 13/32 inch holes on each side of the rollers.
- 4. Repeat this procedure on the left and right sides of each mower deck.

Installing the Roller Scrapers

Parts needed for this procedure:

12	Wire
6	Bushing
6	Lock washer
6	Washer
6	Nut

Procedure

Note: Install a wire for each roller.

1. Install the wire into a bushing as shown in Figure 3.

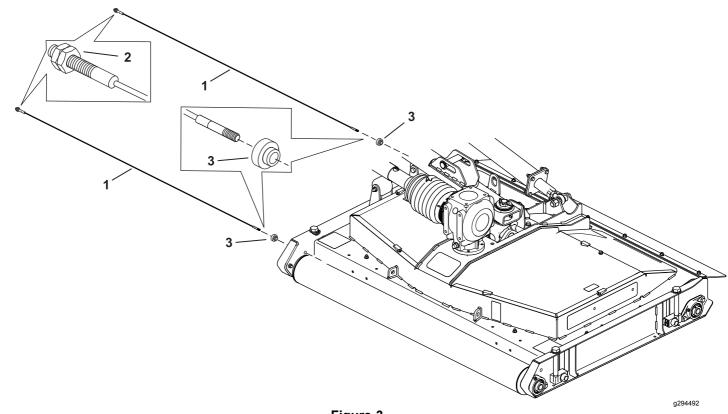

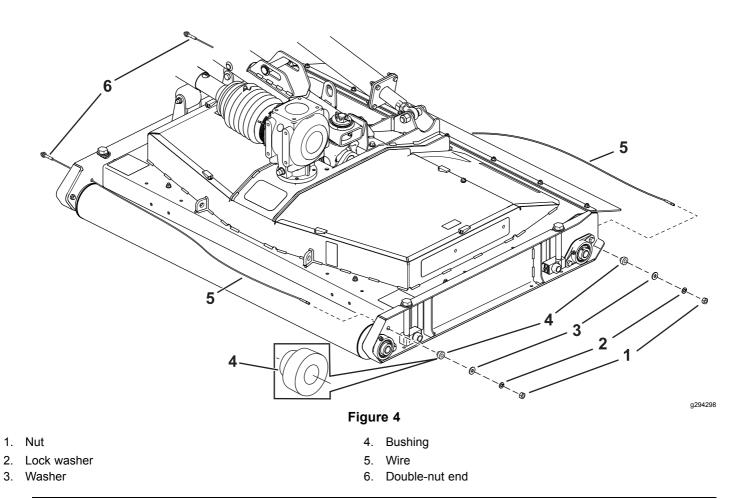

Figure 3

- 1. Wire
- 2. Double-nut end

- 3. Bushing
- Install the wire through the holes in the side of the mower deck. 2.
- 3. Attach the wire to the side of the mower deck with a nut, lock washer, washer, and bushing (Figure 4).
- 4. Adjust the wire tension with the nut.

Note: Ensure the wire is taut and without slack.

5. Repeat this procedure for each mower deck.
