

**TORO®**

MODEL NO. 59405

**INSTALLATION  
INSTRUCTIONS****CURB WHEEL KIT**

(2 HP EDGER)

1. Remove right rear wheel bolt securing wheel and lower handle to frame assembly.

2. Remount lower handle to frame with a button head capscrew and locknut (Fig. 1).

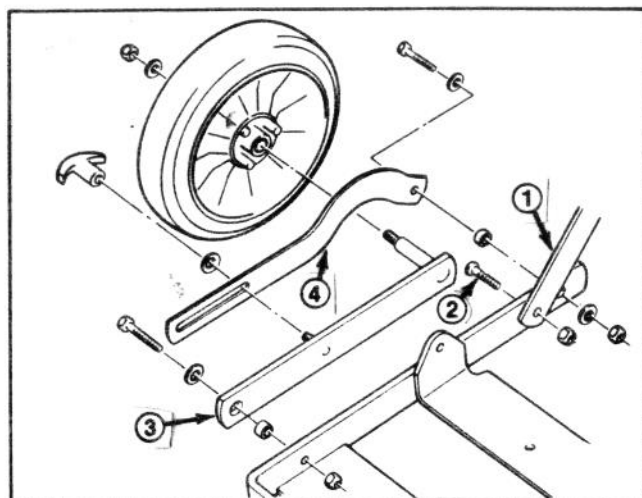

Figure 1

- 1. Lower Handle
- 2. Button Head Capscrew
- 3. Wheel Mount
- 4. Axle Link

3. Secure wheel mount to front hole in side of frame with a capscrew, washer, spacer and locknut (Fig. 1).

4. Secure axle link to rear hole in side of frame with a capscrew, (2) washers, spacer and locknut (Fig. 1).

5. Position wheel mount stud thru slot in axle link and secure with a Belleville washer and T-handle (Fig. 1).

6. Mount wheel to wheel mount with wheel washer and locknut (Fig. 1).

**ADJUSTING WHEEL**

The adjustable wheel lets you edge along curbs and similar objects. Simply loosen the T-handle and slide the wheel assembly up or down until edger is level. Then tighten handle and start edging (Fig. 2).
