# Suspension Update Kit for Greensmaster 3200 

Part No. 99-4239

## Parts Catalog

## Ordering Replacement Parts

To order replacement parts, please supply: the part number, the quantity, and the description of each part desired.

## Understanding Reference Numbers

Each identified part in an illustration has a reference number. The reference number for a part also appears in the parts list, along with other information about the part.
This catalog uses two special reference number formats, one to indicate parts in a service assembly and another to indicate the quantity of a given part in an illustration.

## Service Assembly Reference Numbers

Parts in service assemblies have reference numbers in the form $\mathbf{a}: \mathbf{b}$. The a represents the reference number of the entire service assembly and the $\mathbf{b}$ represents a sequential number unique to each part within the service assembly.

For example, a wheel assembly might be identified by reference number 6 , the tire by $6: 1$, the valve by $6: 2$, and the wheel by 6:3. When you order the assembly identified by reference number 6 , you receive all parts identified by reference numbers $6: 1,6: 2$, and $6: 3$. However, you may also order any part individually.
Reference numbers of this type appear in illustrations and in part lists.

## Reference Numbers Indicating Quantity

In an illustration, if a reference number indicates more than one part, the reference number has the form $\mathbf{n X} \mathbf{y}$. The $\mathbf{n}$ represents the quantity of the part, the $\mathbf{X}$ is the multiplication symbol, and the $\mathbf{y}$ represents the reference number.
For example, in an illustration, the reference number 2X 37 means that two of the parts identified by reference number 37 are indicated.
