

Traction Control Spring

Dingo® TX 420 Compact Utility Loader

Part No. 105-1210

Installation Instructions

1. Stop the engine, set the parking brake, and remove the key.
2. Open the rear access cover; refer to your traction unit *Operator's Manual*.
3. Remove and discard the existing traction control spring (Fig. 1).

Note: The spring is located under the control panel to the right of the traction control mechanism (Fig. 1).

Note: The existing spring is silvery-steel colored. The new spring is golden in color.
