Ordering Replacement Parts

To order replacement parts, please supply the part number, the quantity, and the description of each part desired.

Understanding Reference Numbers

Each identified part in an illustration has a reference number. The reference number for a part also appears in the parts list, along with other information about the part.

This catalog uses two special reference number formats, one to indicate parts in a service assembly and another to indicate the quantity of a given part in an illustration.

Service Assembly Reference Numbers

Parts in service assemblies have reference numbers in the form a:b. The a represents the reference number of the entire service assembly and the b represents a sequential number unique to each part within the service assembly.

For example, a wheel assembly might be identified by reference number 6, the tire by 6:1, the valve by 6:2, and the wheel by 6:3. When you order the assembly identified by reference number 6, you receive all parts identified by reference numbers 6:1, 6:2, and 6:3. However, you may also order any part individually. Reference numbers of this type appear in illustration and in parts lists.

Reference Numbers Indicating Quantity

In an illustration, if a reference number indicates more than one part, the reference number has the form nX y. The n represents the quantity of the part, the X is the multiplication symbol, and the y represents the reference number.

For example, in an illustration, the reference number 2X 37 means that two of the parts identified by reference number 37 are indicated.

This diagram shows an exploded perspective view of a vehicle interior trim assembly. The main components are labeled with numbers 1 through 14. The assembly includes a central rectangular panel (1) with two circular cutouts (10). This panel is connected to a side rail (3) via a hinge mechanism (11, 12, 13). The side rail is further connected to a base plate (6) and a side panel (4). The base plate (6) is secured with multiple screws (9). The side panel (4) is shown in two positions, indicating its adjustability. The entire assembly is designed to be mounted to a vehicle's interior structure.

This technical drawing is an exploded view of a mechanical assembly, likely a pump or engine component. The main assembly is shown in a perspective view, with various parts labeled with numbers. A detailed inset view in the upper right corner provides a close-up of a specific sub-assembly, showing internal components and their connections. The main assembly includes a large cylindrical housing (10), a central shaft or piston rod (15), and several flange-like components (18, 21, 23). A bracket (16) is shown at the bottom, with various fasteners (42, 43, 44, 47, 50) used to secure it. The inset view shows a complex arrangement of pipes, valves, and fittings, with callouts A, B, C, and D highlighting specific areas of interest. The numbers 1 through 50 identify individual parts, while the letters A, B, C, and D indicate specific sub-assemblies or functional groups.
