### Greensmaster® 1000 and 1600

<u>Model/Serial Range:</u>	<u>Model Number:</u>	<u>Serial Numbers:</u>
	04052	50001-61672
	04060	60001-60381

**Subject: Machine is hard to move without engine running.**

In the disengaged position, the traction belts do not fully disengage from the drive pulleys. This condition is normal but it does make it difficult to move the machine around the shop. The addition of a belt guide improves the belt disengagement and maneuverability with the engine off. Belt Guide Kit (95-0924) is available through your Toro distributor. Instructions are listed below.

### Belt Guide Kit (95-0924) Instructions

#### For Greensmaster® 1000 and 1600

This kit includes a new Belt Guide and Cable Link Assembly. The Belt Guide ensures the belt will fully release from the Input Pulley to improve manual handling of the machine. The Cable Link Assembly changes belt engagement characteristics to improved compensation for worn components.
