	02002	80101-99999
	02003	80101-99999

Subject: Seat will not accept seat switch.

The seat, provided with the Deluxe Seat Kit (02305), may not have had the cavity necessary to install the “reed-type” seat switch. If that was the case with your machine (seat with no switch cavity), a different Switch (92-6282) was mounted to the bottom side of the seat. This “push type” switch required Seat Wire Harness (105-6247) and two Bolts (32144-114) to install it on the Grounds Pro. Please make sure these part numbers are listed in your parts book.
