<u>Model/Serial Range:</u>	<u>Model Number:</u>	<u>Serial Numbers:</u>
	03700	70001-99999
	03701	00000-99999

**Subject: Proper identification of engine prior to ordering parts.**

Whenever engine repair is necessary on the engine (Mitsubishi 4DQ5), the serial number from the engine must be identified. This is important due to changes in the engine that have occurred. The engine serial number is located on the exhaust manifold side of the engine, towards the operators seat, and is stamped into a cast pad located directly below the engine model number (4DQ5) as shown below. The correct engine repair parts can then be determined using the Engine Assembly Parts Catalog (Form# 3316-711). This manual is available through your local Toro distributor.

4DQ5 Serial Number Location
