48in TITAN® HD 2500 Series Riding Mower

Model No. 74470—Serial No. 400000000 and Up

Ordering Replacement Parts

To order replacement parts, please supply the part number, the quantity, and the description of each part desired.

Understanding Reference Numbers

Each identified part in an illustration has a reference number. The reference number for a part also appears in the parts list, along with other information about the part.

This catalog uses two special reference number formats, one to indicate parts in a service assembly and another to indicate the quantity of a given part in an illustration.

Service Assembly Reference Numbers

Parts in service assemblies have reference numbers in the form a:b. The a represents the reference number of the entire service assembly and the b represents a sequential number unique to each part within the service assembly.

For example, a wheel assembly might be identified by reference number 6, the tire by 6:1, the valve by 6:2, and the wheel by 6:3. When you order the assembly identified by reference number 6, you receive all parts identified by reference numbers 6:1, 6:2, and 6:3. However, you may also order any part individually. Reference numbers of this type appear in illustration and in parts lists.

Reference Numbers Indicating Quantity

In an illustration, if a reference number indicates more than one part, the reference number has the form nX y. The n represents the quantity of the part, the X is the multiplication symbol, and the y represents the reference number.

For example, in an illustration, the reference number 2X 37 means that two of the parts identified by reference number 37 are indicated.

This technical diagram illustrates the assembly of a vehicle chassis, specifically focusing on the seat area and the associated wiring harness. The main components shown are:

- Seat Assembly (9):** The central component, which includes a seat pan, backrest, and various mounting points. It features a control panel with buttons and a circular gauge.
- Wiring Harness (7):** A complex network of wires connecting the seat assembly to the chassis. Key components include:
 - 7:1:** A main cable or bundle of wires.
 - 7:2:** A specific wire or cable.
 - 7:3:** A connector or terminal.
 - 7:4:** Multiple individual wires or cables.
- Mounting Hardware (8):** A large, circular, flange-mounted fastener used to secure the seat assembly to the chassis.
- Chassis Frame:** The structural base of the vehicle, showing various beams, cross-members, and mounting points for the seat and wiring.
- Other Components:**
 - 10:** A cable or wire connected to the chassis.
 - 17:** A cable or wire connected to the chassis.

The diagram uses dashed lines to indicate the assembly path and the relative positions of the components. The labels 7, 7:1, 7:2, 7:3, 7:4, 8, 9, 10, and 17 are used to identify specific parts and their connections.
