### Workman<sup>®</sup> 4200 and 4300 4wd

<b><u>Model/Serial Range:</u></b>	<b><u>Model Number:</u></b>	<b><u>Serial Numbers:</u></b>
	07215/07216	50001-59999

**Subject:     Steering System change.**

Machines in the serial number range listed above were manufactured with a modified Pitman Arm. The arm was modified with a deeper taper of the tie rod mounting hole to provide clearance between the tie rod and grease fitting. These machines require a flat washer between the castle nut and Pitman Arm as a result of this modification that may not be shown in the Parts Book. This washer must remain in place to ensure the tie rod can be properly tightened. The attached page identifies this change in more detail.
