Subject: Color coding change on Raindrop[®] nozzles.

Delavan[®] has changed the color-coding scheme on <u>some</u> of their Raindrop[®] nozzles to establish compliance with ISO 9000 standards. This effects all users of Raindrop nozzles.

The description "ISO" will be added to the part description to identify that the nozzle "in hand" was changed to the "ISO" color coding scheme and is not of the same color coding as utilized in the past. **Only the nozzles listed below will be affected**, **not all nozzles will change color-coding**. If the nozzle color has not changed, there will not be an "ISO" notation on the parts description tag. The ISO nozzles will have a black colored tip as an additional identifier. When in doubt, refer to the number size embossed into the nozzle.

This change will take effect beginning February 1, 1997 to prevent "mixed" shipments.

	, -		
Toro Number	Size	"ISO" Color	Current Color
93-6428	RA-2	Yellow	Gray
92-3977	RA-4	Red	Yellow
43082	RA-5	Brown	Dark Blue
41088	RA-6	Gray	Dark Green
42828	RA-8	White	Red

Each Raindrop® nozzle has an identifying <u>size</u> number embossed on the back of the head. This is the most accurate method of identifying the size of the nozzle.
