## SET-UP AND PARTS CATALOG

### PRO-CONTROL™ SPRAY SYSTEM for the MULTI-PRO™ 1100 Vehicle

Refer to the illustrated Parts List for the details of parts used in assembling the Pro-Control™

**NOTE: “Right”, “Left”, “Front” and “Rear” are referenced while seated in the operator’s position.**

#### CONSOLE COMPUTER:

1. Remove four (4) 1/4" x 5/8" washer hd cap screws to remove the Rear Panel from the Steering Console.

2. Remove the knock-out plug in the front of the Steering Console and insert the large grommet. See FIG. 1.

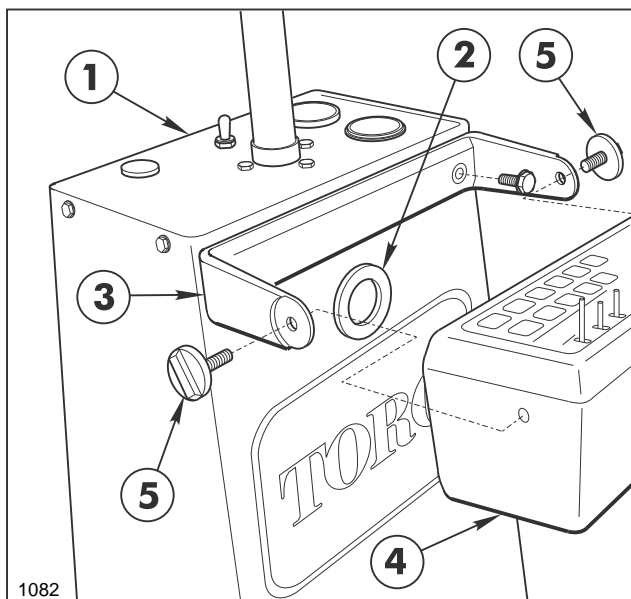

FIG. 1

- |                     |                     |
|---------------------|---------------------|
| 1. Steering Console | 4. Console Computer |
| 2. Grommet          | 5. Mounting Knobs   |
| 3. Mounting Bracket |                     |

3. Remove the “U”-shaped Mounting Bracket from the Console Computer and secure the Mounting Bracket to the Steering Console with two (2) 1/4" x 3/4" washer hd. screws as shown in FIG. 1.

4. Reinstall the Console Computer within the Bracket and secure with the two (2) Mounting Knobs.

5. Insert the Console Control Cable from inside the Steering Console, through the grommeted

hole, and plug it into the receptacle in the rear of the Computer. Secure with locking ring.

6. Route the Cables through the three “U” shaped brackets under the left side of the Vehicle frame, toward the rear of the Vehicle. Secure the cables with the plastic ties provided and Connect the Console Control Cable to the 3 ft. Flow Control Cable.

7. Turn the Computer’s “POWER ON/OFF” Switch to “OFF”.

8. Route the red and white Battery Wires of the Console Control Cable to the Fuse Block mounted inside the Seat Box.

9. Crimp the spade terminal to the white wire. Crimp the push-on terminal to the red wire. See FIG. 2.

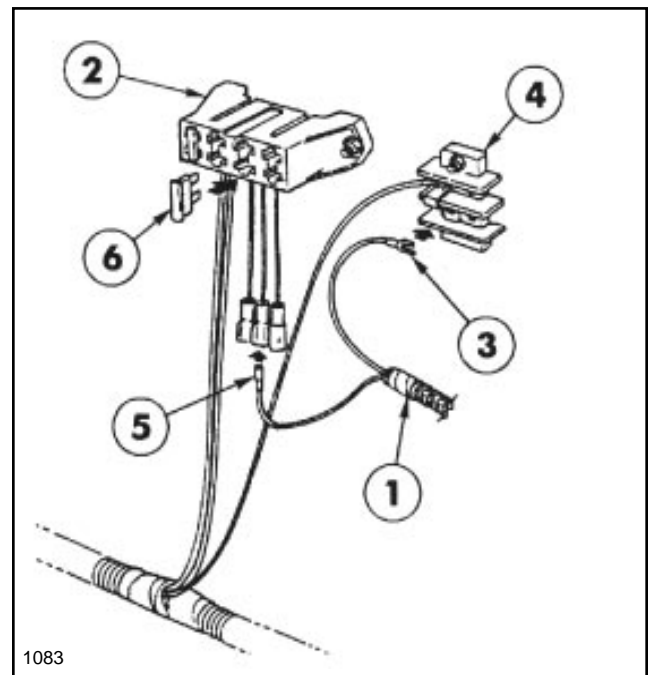

FIG. 2

- |                          |                     |
|--------------------------|---------------------|
| 1. Console Control Cable | 4. Ground Terminal  |
| 2. Fuse Block            | 5. Push-On Terminal |
| 3. Spade Terminal        | 6. Fuse (20-Amp)    |

10. Ground the spade terminal on the white wire to the Ground Terminal Block.

## CONSOLE COMPUTER (Cont'd):

11. Connect the push-on terminal on the red wire to the male terminal on the red wire coming from the Fuse Block.

12. Insert the 20-amp Fuse into the Fuse Block receptacle.

**NOTE:** The remaining Wiring Harness connections will be made after the Tank and Saddle and the Boom Frame are installed on the Vehicle.

## SPEED SENSOR:

1. Mount the four (4) Wheel Magnets to the inside rim of the Vehicle's left rear wheel with eight (8) hex nuts and four (4) lock washers as shown in FIG. 3. **IMPORTANT! Magnets must be mounted in alternating red-black sequence.**

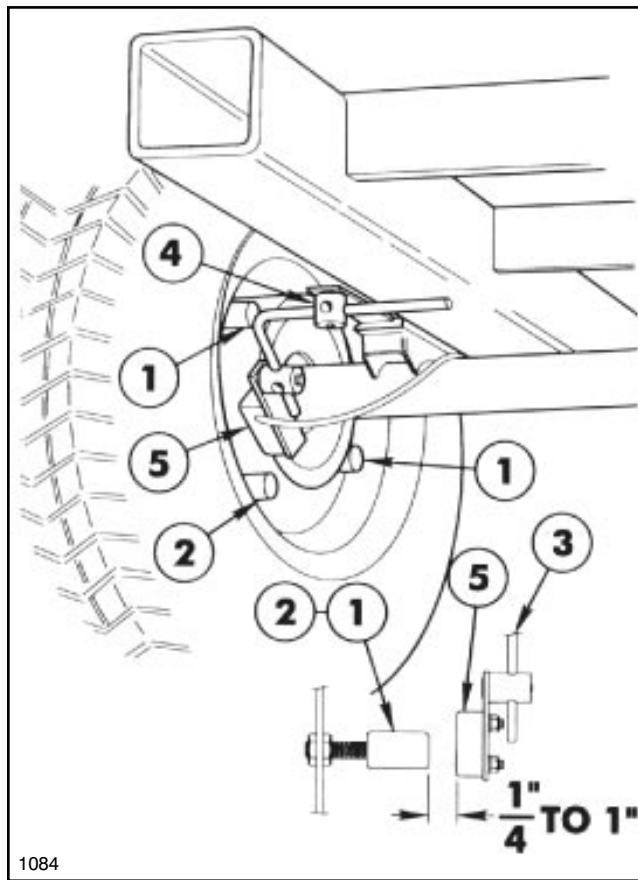

FIG. 3

- |                         |                    |
|-------------------------|--------------------|
| 1. Wheel Magnet (RED)   | 4. Turret Assembly |
| 2. Wheel Magnet (BLACK) | 5. Sensor Switch   |
| 3. Sensor Rod           |                    |

2. Insert the longest leg of the Sensor Rod into the hole in one of the Turret Assemblies. Tighten the flat head screw holding the Turret to the Rod.

3. Mount the Turret Assembly to the bottom of the Angle welded to the Vehicle Frame (behind the angle holding the Rear Axle Mount) using two

(2) 1/4" x 1" cap screws, lock washers and hex nuts.

4. Assemble the Sensor Switch to the other Turret Assembly with the two (2) 1/4" lock washers and hex nuts.

5. Insert the shorter leg of the Sensor Rod into the Turret Assembly so that the Sensor Switch is parallel with the Sensor Rod as shown.

6. Position the Sensor Switch on the Sensor Rod so that as the Wheel rotates, the Magnets pass across the center of the black molded Switch Assembly.

7. Adjust the position of the longer leg within the Turret Assembly until there is a clearance gap of 1/4" to 1" between the Switch Assembly and the Wheel Magnets.

8. Rotate the Wheel and make sure the clearance gap is correct between each of the four Wheel Magnets. When adjustment is correct, secure the Turrets to the Sensor Rod by tightening the square hd. set screws.

9. Route the Speed Sensor Cable over the Vehicle's Rear Axle, along the left hand side of the Frame, and through the hole in the floor board to the inside of the Steering Console.

10. Bring the Cable up and through the grommited hole in the Steering Console and plug it into the rear of the Console Computer. Secure with locking ring.

## CENTRIFUGAL PUMP:

**NOTE:** If the optional Rollover Protection Structure (ROPS) is to be installed on the Vehicle, it must be installed prior to installing the Centrifugal Pump. See the Installation Instructions furnished with the ROPS (model no. 41185); or the ROPS Adaptor Kit (part no. 92-8240).

**NOTE:** If the Multi-Pro Vehicle's Serial no. is between 20101 and 30370, disregard Step 1 in the following instructions.

1. Mount the Pivot Mounting Plate to the angle on the bottom of the Vehicle Frame, using two 1/2" x 1-1/4" cap screws and lock nuts. See FIG. 4.

2. Align the pivot tubes on the Pump Pivot Plate with those on the Pivot Mounting Plate. Insert the two (2) clevis pins and secure with two (2) hairpin cotters. Shim between two rear pivot tubes as required with two provided flat washers to give clearance between pump and tank. See FIG. 4.

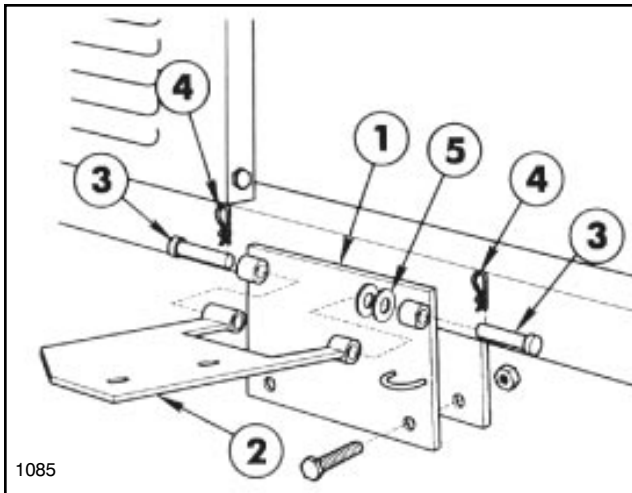

FIG. 4

- |                         |                    |
|-------------------------|--------------------|
| 1. Pivot Mounting Plate | 4. Hair Pin Cotter |
| 2. Pump Pivot Plate     | 5. Flat Washers    |
| 3. Clevis Pin           |                    |

**NOTE:** In the following instructions, “sealer” refers to Teflon Tape.

3. Secure the Centrifugal Pump in a vise. Apply thread sealer and install the fittings to connect the Suction, Supply, Agitator and Overflow Hoses to the Pump as shown in FIG. 5.

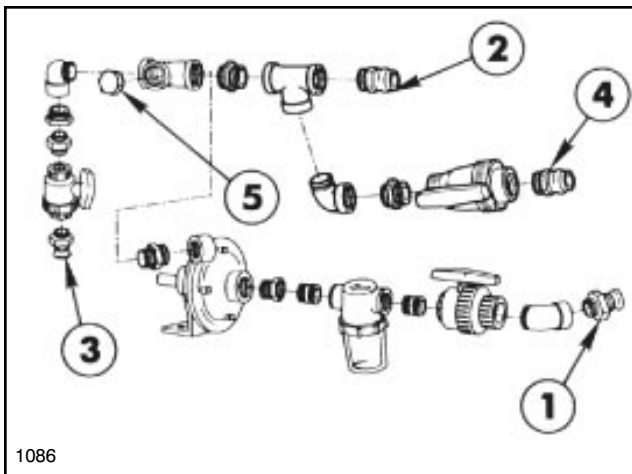

FIG. 5

- |             |              |
|-------------|--------------|
| 1. Suction  | 4. By-pass   |
| 2. Supply   | 5. Accessory |
| 3. Agitator |              |

4. Assemble the Pump Drive Pulley onto the Pump shaft with the Pulley’s **hub** facing **away** from the Pump (FIG. 6).

5. Assemble the Centrifugal Pump and the Spring Mounting Angle to the Pump Pivot Plate, using two (2) 3/8" x 1-1/2" cap screws, flat washers and lock nuts as shown in FIG. 6.

6. Using a straight edge as a guide, position the Pump Pulley so that it is in alignment with the Engine’s Drive Pulley. When alignment is correct, tighten the two (2) set screws in the Pump Pulley’s hub.

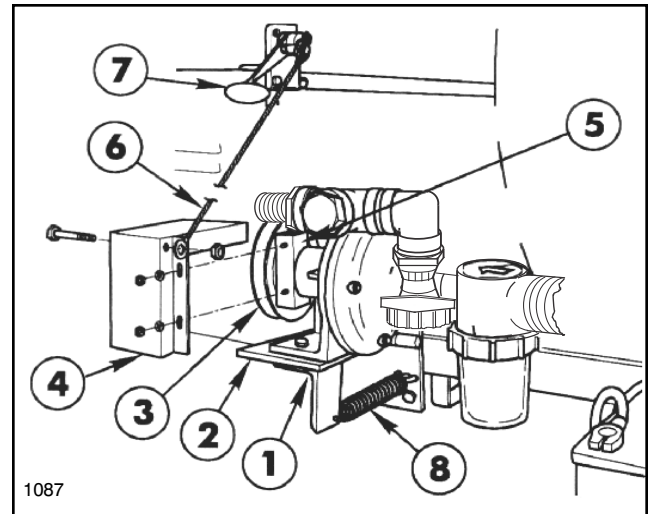

FIG. 6

- |                          |                            |
|--------------------------|----------------------------|
| 1. Spring Mounting Angle | 5. Pump Cover Clamp        |
| 2. Pump Pivot Plate      | 6. Pump Cable              |
| 3. Pump Pulley           | 7. Accessory Control Lever |
| 4. Pump Belt Cover       | 8. Pump Spring             |

7. Install the Pump Drive Belt around Pump Pulley and Engine drive Pulley.

8. Loosely mount the Pump Belt Cover to the Pump hub with Pump Cover Clamp and two (2) 3/8" flat washers and lock nuts.

9. Insert 3/8" x 4" cap screw through the Pump Cover and into hole in Pump Cable’s end fitting. Secure Cable to Cover with a 3/8" lock nut.

10. Remove hair pin cotter and flat washer from the pin in the Accessory Control Lever. Push the Control Lever down (engaged). Slide the unattached end of Cable onto the pin and secure with flat washer and hair pin cotter previously removed.

11. Connect one end of Pump Spring to the ring on Pump Pivot Plate and the other end through the hole in Spring Mounting Angle.

12. Engage Accessory Control Lever... **DO NOT START THE ENGINE!** Adjust Belt Guide around engine pulley to obtain 1/8" clearance between the inside of the Belt Guide and the Belt.

13. Rotate Belt Cover around the Pump hub until tension on Pump Control Cable requires a small amount of pressure to snap the Control Lever “over-center” to disengage the Pump drive. Make sure there is 1/8" clearance between the Belt and the inside of Belt Cover. Tighten lock nuts after adjustment is complete.

If Step 13 does not achieve the necessary tension on the Control Cable, loosen the Pump mounting bolts and slide the Pump on the Pivot Plate to move it away from the Vehicle Frame, increasing the Cable tension.

## TANK ASSEMBLY:

1. Cut the shipping straps and remove the Spray Tank and Saddle Assembly from the shipping skid.

**NOTE:** In the following instructions, sealer refers to Teflon Tape when used for pipe fittings.

2. Apply thread sealer and install the 90° barbed elbow into the bottom of Spray Tank.

**NOTE:** Position the barbed elbow as shown in FIG. 7, so that it will angle toward the left front of the Vehicle after the Tank is installed on the Vehicle.

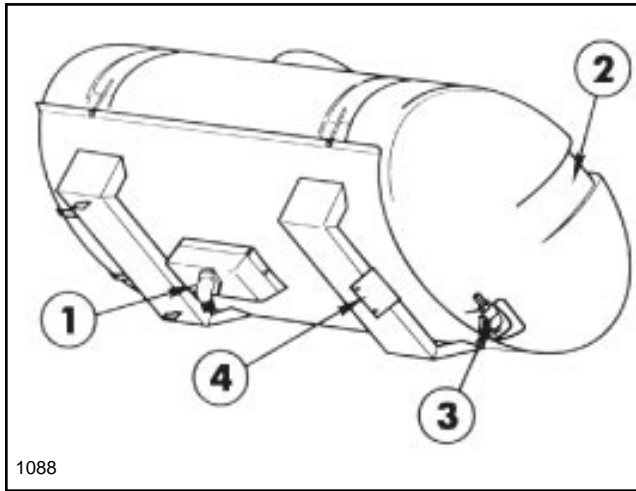

FIG. 7

- |                           |                                 |
|---------------------------|---------------------------------|
| 1. Barbed Elbow (Suction) | 3. Elbow & Hose Barb (Overflow) |
| 2. Spill-way              | 4. Mounting Member              |

3. Attach the 11/4" x 21" Suction Hose to the barbed elbow in the bottom of Tank and secure with hose clamp. Attach the 1" barbed female quick coupler to the other end of the Suction Hose and secure with hose clamp.

4. Attach the 1/2" x 42" Agitator Hose to the 1/2" barbed elbow in the front of Tank and secure with hose clamp. Attach the 1/2" barbed female quick coupler to the other end of the Agitator Hose and secure with hose clamp.

5. Apply thread sealer and install the 90° street elbow and a hose barb into the fitting at the rear ("spillway") of tank. Attach the 1" x 58" Overflow Hose to the hose barb and secure with hose clamp. Attach female quick coupler to the other end of the Bypass Hose and secure with hose clamp.

6. Place Tank and Saddle Assembly on Vehicle Frame.

7. Slide Tank and Saddle forward, to hook the two lugs at front of Saddle under the Vehicle's cross member, resting the base at rear of Saddle over the Vehicle's rear cross member.

8. Secure the rear Saddle base to the Vehicle's cross member with two (2) 1/2" x 1-1/2" cap screws, flat washers, lock washers and hex nuts.

9. Route the Suction Hose over left side of the Vehicle frame and connect couplers at Suction Ball Valve.

10. Route the Agitator Hose over the Vehicle frame and under Pump to connect the couplers at the Agitator Ball Valve.

11. Route the Overflow Hose forward, through Tank Saddle, along the left side of the Vehicle frame. Connect the couplers at the By-pass Ball Valve.

12. Install Anti-Siphon Device as shown in the Anti-Siphon Kit Instructions provided.

## BOOM HOLD-IN & EYE WASH TANK:

1. Mount right Hold-In Brace assembly to the two (2) 5/16" carriage bolts in the front Tank Band using two (2) 5/16" flat washers and hex nuts. Tighten securely. See FIG. 8.

2. Attach right Boom Hold-In assembly to Hold-In Brace assembly using two (2) 1/4" U-bolts and four (4) 1/4" lock nuts. Attach Rubber Hold-Down to Hold-In Brace assembly. Repeat steps 1 and 2 for left side.

3. Mount Wash Tank Bracket (open end forward) to right-hand hold-In Brace assembly using two (2) 5/16" x 1" hex hd. cap screws, flat washers, and hex nuts. Place Clean Water Wash Tank into Wash Tank Bracket and secure with Rubber Hold-Down, as shown in FIG. 8.

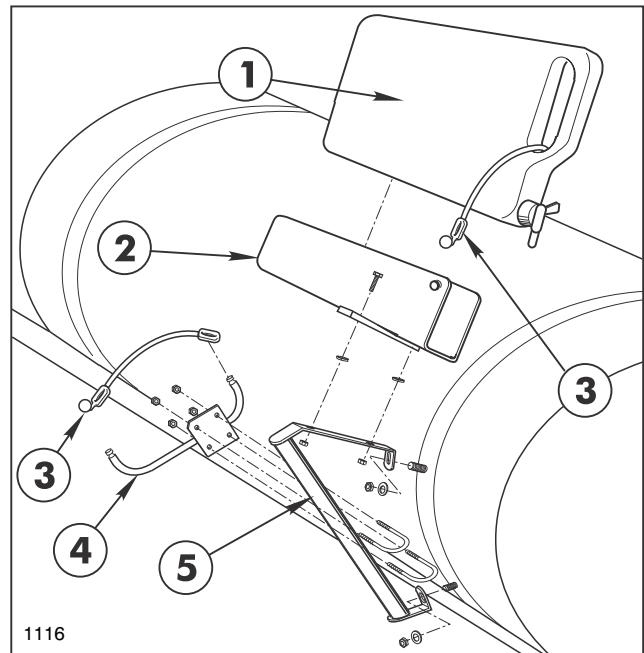

FIG. 8

- |                          |                       |
|--------------------------|-----------------------|
| 1. Clean Water Wash Tank | 4. Boom Hold-In Assy  |
| 2. Wash Tank Bracket     | 5. Hold-In Brace Assy |
| 3. Rubber Hold-Down      |                       |

## FLOW METER:

1. Attach the 1-1/4" x 3" Adaptor Hose to the barb on the outlet end of the Flow Meter. **Note flow direction arrow on flow meter.** Secure with hose clamp. See FIG. 9.

2. Slide a 1-1/4" hose barb into the other end of the Adaptor Hose and secure with a hose clamp.

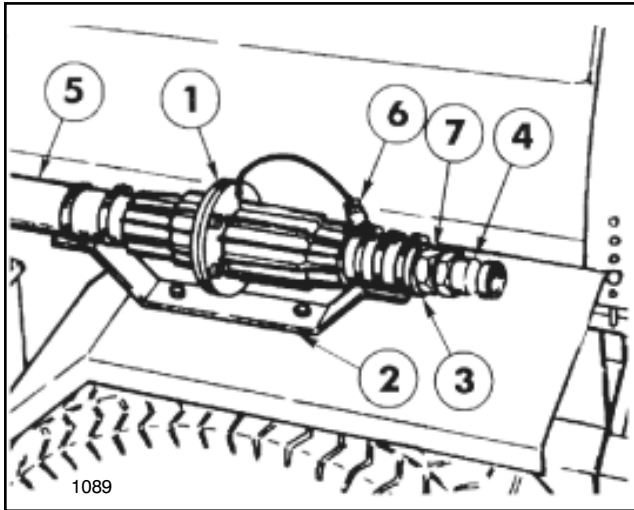

FIG. 9

- |                         |                       |
|-------------------------|-----------------------|
| 1. Flow Meter           | 5. Supply Hose        |
| 2. Mounting Bracket     | 6. Flow Control Cable |
| 3. Adaptor Hose         | Connector             |
| 4. Quick Coupler (male) | 7. Hose Barb          |

3. Apply thread sealer and attach the 1" male quick coupler to the hose barb's threaded end.

4. Secure the Flow Meter to the Mounting Bracket with two (2) hose clamps furnished.

5. Connect the 1-1/4" x 18" Supply Hose between the barb on the inlet end of the Flow Meter and the hose barb in the tee at the Pump. Secure with two (2) hose clamps.

6. Position the completed Flow Meter Assembly on the Mounting Bracket as shown in FIG. 9.

**IMPORTANT! The flow must be in the direction of the arrow on the Flow Meter.**

7. Install the Mounting Bracket to the Vehicle's left rear fender, using two (2) 5/16 x 3/4" flange hd. screws and flange lock nuts. See FIG. 8.

8. Connect the wire from the Flow Meter to the mating connector on the Flow Control Cable.

## BOOM FRAME ASSEMBLY:

**Note:** If installing the "Enclosed Boom" option in place of the Standard Boom, disregard this entire Boom Frame Assembly Section. Refer to the "Enclosed Boom" Set-up and Parts manual for the installation instructions.

1. Apply a heavy coating of grease to the tubes of the two Boom Mount Assemblies and insert them into the Vehicle Frame as shown in FIG. 10.

**NOTE:** Note the position of the angle member of the Boom Mount Assemblies, in relation to the tube member. They must be positioned as shown in FIG. 10 for the mounting of the Cross Support Angle.

**NOTE:** Steps 3 and 4 apply to the assembly of the Standard Boom only. If the optional "Boom Pivot Kit" is to be installed, see the instructions

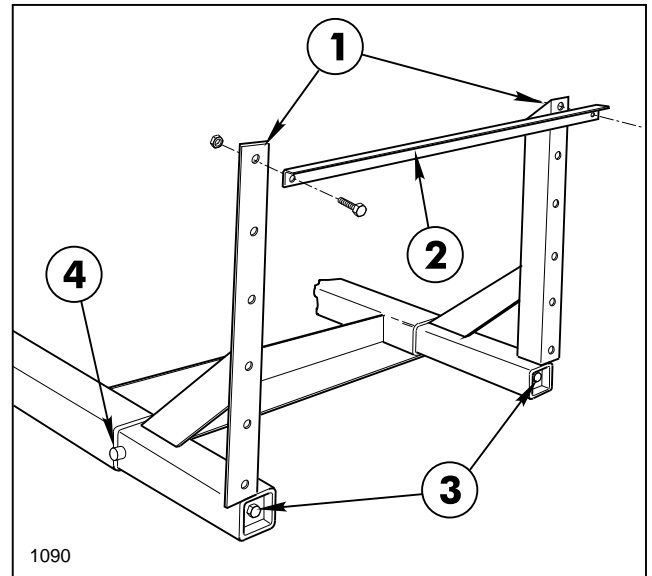

FIG. 10

- |                        |                |
|------------------------|----------------|
| 1. Boom Mount Assy.    | 3. Wedge Screw |
| 2. Cross Support Angle | 4. Stop Pin    |

furnished with that kit. The Cross Support to be used with that kit is different than the Support used on the Standard Boom.

3. Position the Cross Support Angle and attach it to the Boom Mount Assemblies with two 1/2" x 1-1/4" hex hd cap screws, and lock nuts.

4. Position the Spacer Tubes between the Boom Mount uprights and the lugs on the Main Frame Tube. Use two 1/2" x 4" hex hd. cap screws and lock nuts to secure the Main Frame Tube to the uprights. See FIG. 11.

5. Using a torque wrench, tighten the 1/2" x 18" wedge screws that join the Wedges to the Boom Mounts. Tighten to 50 ft. lbs. See FIG. 10

6. Position the two (2) Center Boom angles on the Main Frame and secure them to the Main Frame tube with two (2) square U-bolts, four (4) flat washers and hex nuts. See FIG. 11.

7. Center and attach the Center Boom Pipe to the two Center Boom Angles with two (2) Boom Clamps, 3/8" x 1" cap screws, flat washers and lock nuts.

## BOOM FRAME (Cont'd):

8. Loosely attach the Double Barb Turret Body with the Turret Body Clamp in the approximate center of the Center Boom Pipe. For the most uniform spray coverage, position all Nozzles level as shown in FIG. 11.

9. Loosely attach a single barb Turret Body with the Turret Body Clamp to LH end of the Center Boom Pipe. Loosely attach a threaded Turret Body with the Turret Body Clamp to RH end of the Center Boom Pipe.

10. Place two Hose Clamps on two 3/4" x 19" Jumper Hoses and connect the two "end" Turret Bodies to the Double Barb Turret Body. Space nozzles 20" apart and tighten fasteners securely. Apply thread sealer and install the 90° 3/4" Hose Barb on the Threaded Turret Body. See FIG. 11.

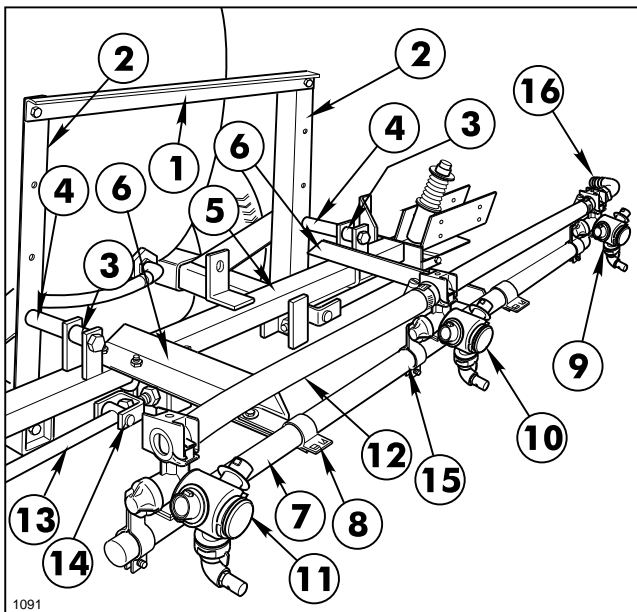

FIG. 11

- |                            |                             |
|----------------------------|-----------------------------|
| 1. Cross Support Angle     | 9. Threaded Turret Body     |
| 2. Boom Mount Assy.        | 10. Double Barb Turret Body |
| 3. Spacer Tube, 1" lg.     | 11. Single Barb Turret Body |
| 4. Spacer Tube, 1-1/4" lg. | 12. Jumper Hose             |
| 5. Main Frame Tube         | 13. Strut Assembly          |
| 6. Center Boom Angle       | 14. Adjustable Clevis       |
| 7. Center Boom Pipe        | 15. Nozzle Body Bracket     |
| 8. Boom Clamp              | 16. 90° 3/4" Hose Barb      |

11. Attach the two Strut Assemblies to the two Adjustable Clevis Assemblies found on each side of the Main Frame tube with two (2) 1/2" x 2" clevis pins and two (2) 1/8" x 1" cotter pins. See FIG. 11.

**IMPORTANT! DO NOT over-tighten the nuts in steps 12 and 14. The clamping action could crush the Boom Pipe.**

12. Insert the plugged end of an Extension Boom Pipe into the Pivot Assembly and secure with four (4) 1/4" x 1-1/4" cap screws and lock nuts. Repeat on the opposite side to assemble the other Extension Boom. See FIG. 12.

13. Attach the Boom Support Assembly to the Pivot Assembly, using a 5/16" x 1-1/2" cap screw and lock nut. See FIG. 11 & 12.

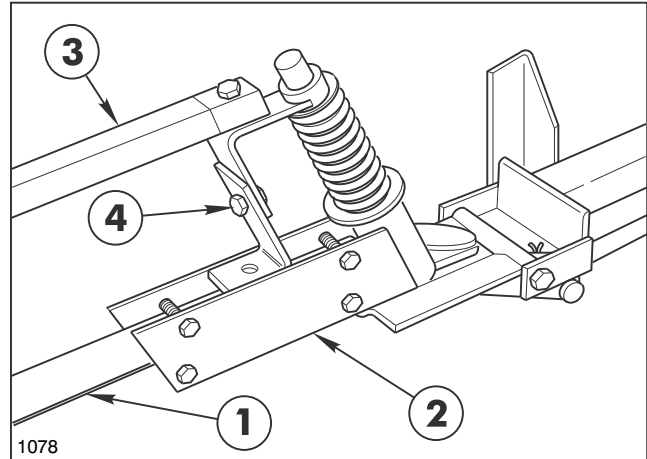

FIG. 12

- |                        |                          |
|------------------------|--------------------------|
| 1. Extension Boom Pipe | 3. Boom Support Assembly |
| 2. Pivot Assembly      | 4. Height Adjustment     |

14. Secure the two plates of the Boom Support Assembly to one of the Extension Boom Pipes, using two (2) 1/4" U-bolts, four (4) lock nuts and flat washers. See FIG. 13.

15. Assemble the Boom Support Assembly to the other Extension Boom Pipe.

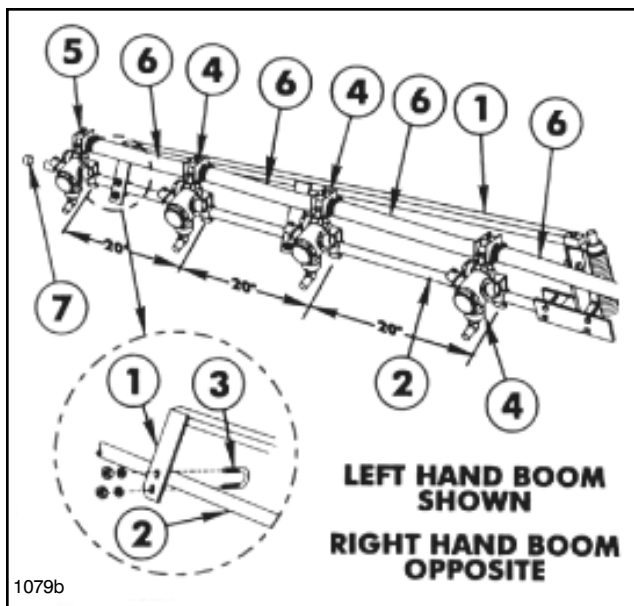

16. Adjust the Booms to a level position by adjusting the jam nuts on the adjustable clevis assemblies (See FIG. 11) to the desired position, then tighten end nuts against Main Frame plate.

17. Attach three double barb and one single barb Turret Bodies with Clamp Assemblies on each Extension Boom Pipe as shown in Fig. 13.

18. Level Nozzles and space 20" apart. Connect the Turret Body Assemblies with 3/4" x 19" Jumper Hoses. Secure with hose clamps. See FIG. 13.

**NOTE:** Two Jumper Hoses provided with this kit are 21" long. They should be cut to 19" long for this set-up.

19. Install the plastic Boom Caps over the ends of the Boom Pipes.

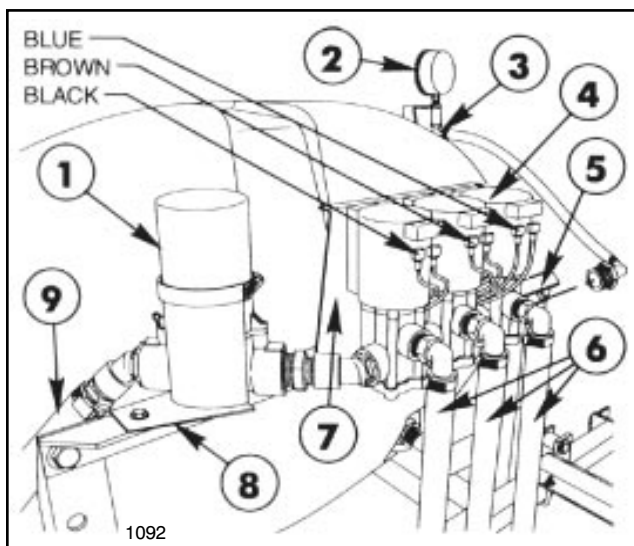

**FIG. 13**

- |                            |                            |
|----------------------------|----------------------------|
| 1. Boom Support Assembly   | 5. Single Barb Turret Body |
| 2. Extension Boom Pipe     | 6. Jumper Hose 3/4 x 19"   |
| 3. U-bolt                  | 7. Boom Cap                |
| 4. Double Barb Turret Body |                            |

## CONTROL VALVE/SOLENOID ASSEMBLY:

1. Apply thread sealer and install the 1" x 3/4" reducing nipple and 45° 3/4" elbow into the outlet port of the Motorized Control Valve. Install 1" x 3/4" reducer bushing, 45° 3/4" elbow and 3/4" hose barb into the inlet port of the Control Valve.

**FIG. 14**

- |                         |                          |
|-------------------------|--------------------------|
| 1. Control Valve        | 6. Boom Feeder Hose      |
| 2. Pressure Gauge       | 7. Solenoid Mtg. Bracket |
| 3. Barbed Elbow         | 8. Control Valve Bracket |
| 4. Solenoid Valve Assy. | 9. Flow Meter Hose       |
| 5. Cross Support Angle  |                          |

2. Connect the Motorized Control Valve and the Solenoid Assembly by screwing the two together. See FIG. 14.

3. Apply thread sealer and install three (3) 90° 3/4" hose barbs into the outlet ports of Solenoid Valves. Install 3/4" x 3/8" barbed 90° elbow in the end of the Solenoid Assembly. see FIG. 14.

4. Loosely attach the Control Valve Bracket to the Cross Support with two (2) 5/16" x 3/4" cap screws and flange lock nuts.

5. Install two (2) Grommets in 1" dia. holes in Solenoid Mounting Bracket.

6. Slide head of 6M x 16 mm hex hd. screw to the top of the mounting groove in each Solenoid Valve. Assemble Control Valve and Solenoid Valve assembly to the Solenoid Mounting Bracket using three (3) 6M x 16 mm screws just installed. Secure Solenoids with three (3) 6M hex nuts and lockwashers. See FIG. 14.

7. Install valve and bracket assembly to the Cross Support as shown in FIG. 14. Secure with two (2) 5/16" x 3/4" hex flange hd. screws and flange lock nuts.

8. Secure the Control Valve to it's Mounting Bracket with the large hose clamp. Tighten all fasteners securely.

9. Assemble the Pressure Gauge and the 1/4" x 3/8" barbed elbow to the Gauge Bracket. Remove the protective cap and mount the Bracket to the carriage bolt in the rear Tank Band, using a 5/16" flange lock nut.

10. Connect the Pressure Gauge to the Solenoid Assembly with the 3/8" x 32" hose. Secure the hose with hose clamps.

11. Connect the 1" x 24" Flow Meter Hose to the hose barb in the Motorized Control Valve and secure with a hose clamp.

12. Install the barbed female quick coupler on the other end of the Flow Meter Hose and secure with a hose clamp.

13. Connect the couplers at the Flow Meter.

14. Connect the three 3/4" x 50" Boom Feeder Hoses to the 90° barbs in the Solenoid Valves and secure with hose clamps.

15. Place a hose clamp on the Center Boom Feeder Hose and attach it to the 90° hose barb at the RH end of the Center Boom Pipe.

16. Place a hose clamp on the right and left Boom Feeder Hoses and attach them to the double barb Nozzles on the right and left Extension Boom Pipes.

## FLOW CONTROL CABLE:

1. Route the Flow Control Cable up, along the left Boom Mount, and across the Cross Support Angle, to make connections to Motorized Control Valve and Solenoid Valves. See FIG. 15.

2. Feed the wires through the two (2) Grommets in the Solenoid Mounting Bracket. Connect the black wire on left solenoid, brown on middle solenoid, blue on right solenoid and a white jumper on all three solenoids. See FIG. 15.

3. Secure the Flow Control Cable to the Boom Frame with the R-clamp and plastic ties provided.

4. Install Solenoid Valve Shield to top of Solenoid Mounting Bracket and secure with two (2) 1/4" x 3/8" flange hd. screws.

## FINAL CHECKS:

1. Recheck and tighten all fasteners and hose clamps securely.

2. Fill the tank with clean water and check for any leaks.

3. Refer to the Pro-Control™ Operator's Manual for the proper calibration and operation of the Pro-Control Spray System.

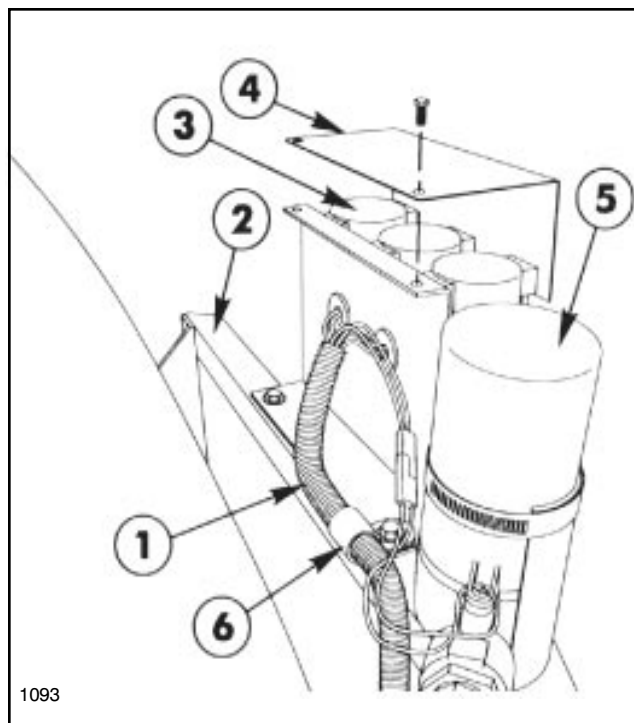

FIG. 15

- |                        |                          |
|------------------------|--------------------------|
| 1. Flow Control Cable  | 4. Solenoid Valve Shield |
| 2. Cross Support Angle | 5. Control Valve         |
| 3. Solenoid Assembly   | 6. R-Clamp               |

## SAFETY INSTRUCTIONS

The following safety and instruction decals are installed on the Pro-Control™. If any become damaged or illegible, replace them. Decals and part numbers are listed below and in the parts catalog. Order replacements from your Authorized Toro Distributor.

Part No. 93-0688: Located on Lid of Spray Tank

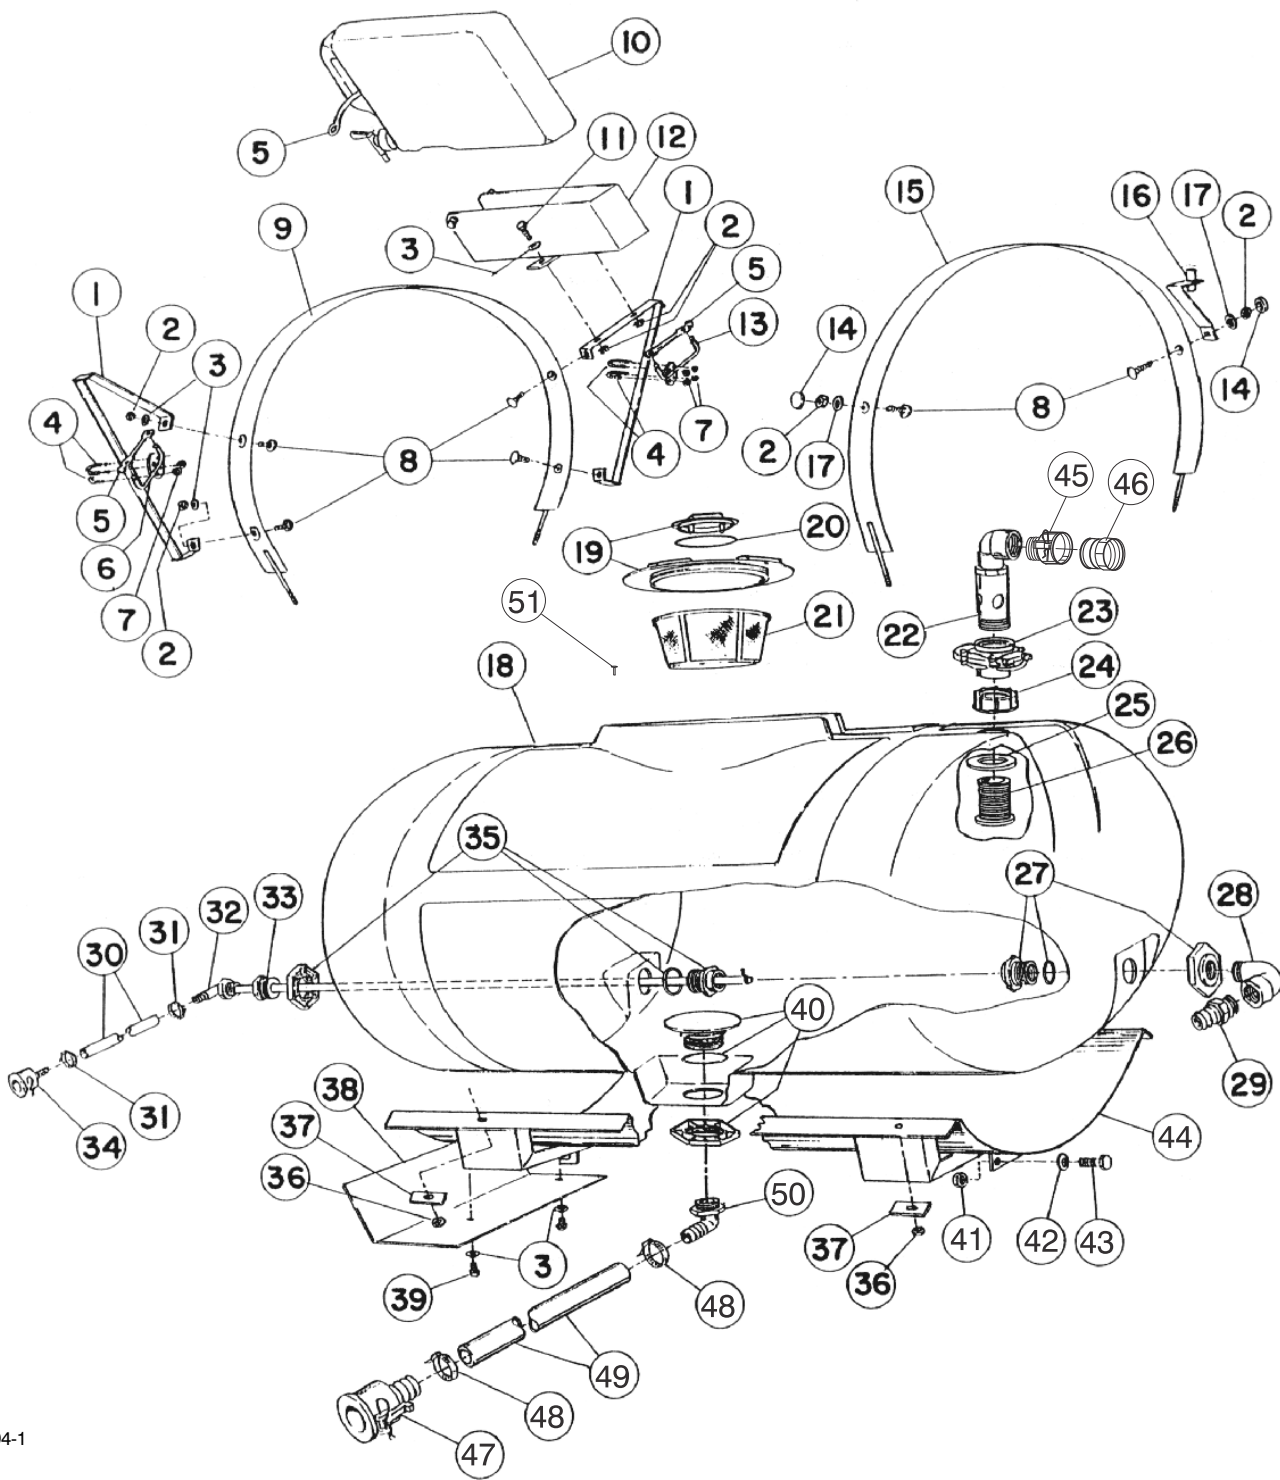

Part No. 87-0570: Located on Rear Tank Band

Part No. 93-0800: Located on side of Clean Water Wash Tank Saddle.

## NOTES:

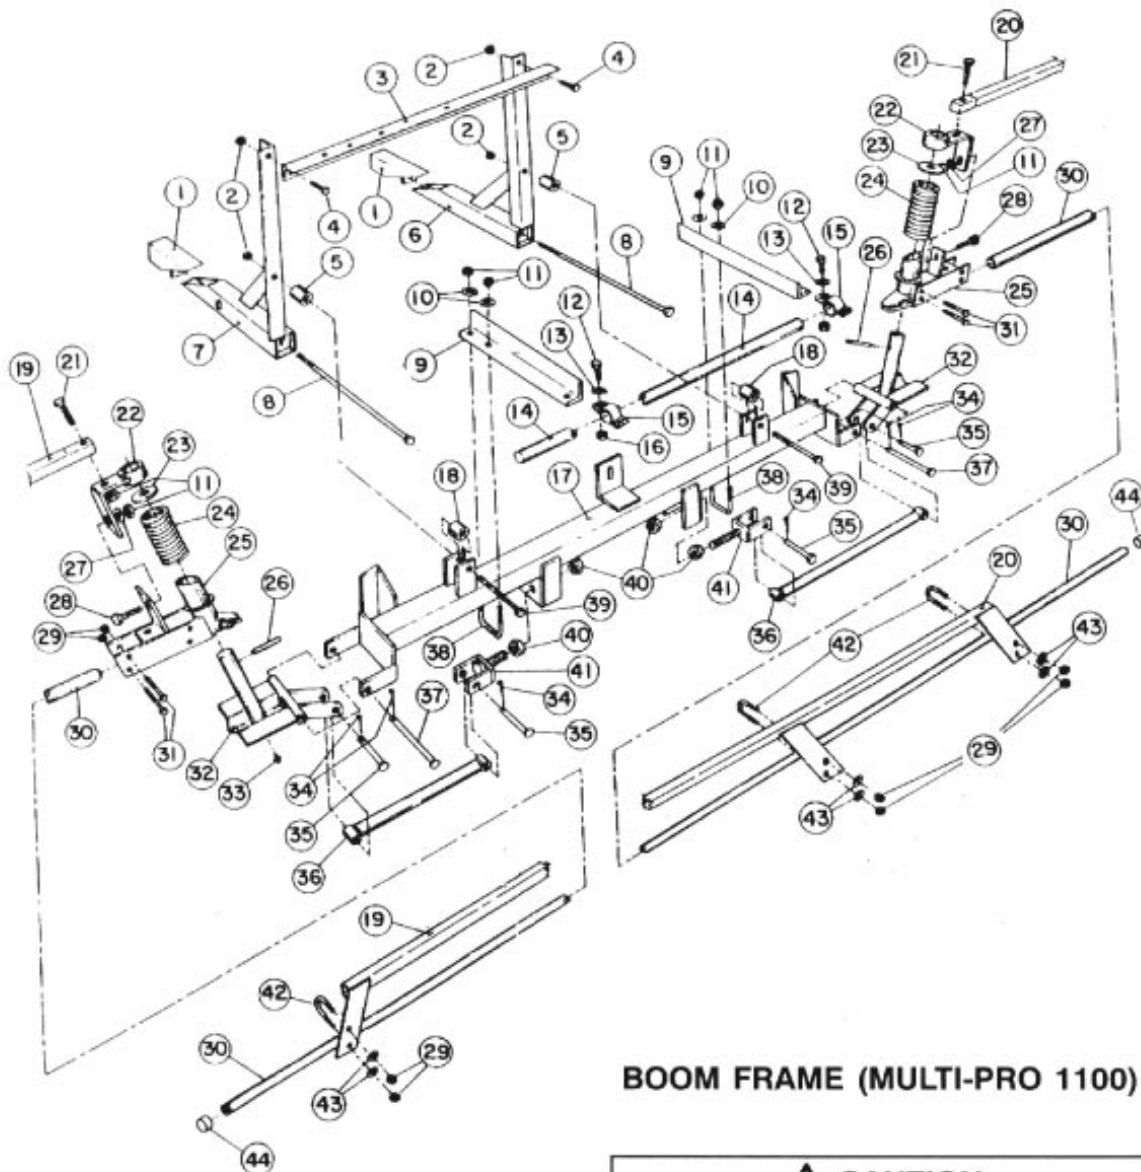

1094-1

## PRO-CONTROL TANK (MULTI-PRO 1100)

Ref.	Part No.	Description	Qty.
1	42983	Hold-In Brace Assembly	2
2	3217-6	Hex Nut, 5/16	6
3	3256-23	Flat Washer, 5/16	4
4	92-0010	U-Bolt, 1/4	4
5	42198	Rubber Hold-Down	3
6	42259	Boom Hold-In Assy (left)	1
7	32146-17	Lock Nut, 1/4	8
8	3230-1	Carriage Bolt, 5/16 x 3/4	6
9	42880	Tank Band Assy (front)	1
10	92-3976	Clean Water Wash Tank	1
	93-0828	Spigot (f/w 92-3976 Tank)	1
11	322-5	HHCS, 5/16 x 1"	2
12	92-3969	Wash Tank Bracket	1
13	42316	Boom Hold-In Assy (right)	1
14	42452	Protective Cap	2
15	43013	Tank Band Assy (rear)	1
16	42277	Pressure Gauge Bracket	1
17	3252-4	Lock Washer, 5/16	2
18	42879	Tank Assembly - 160 Gals.	1
19	42322	Tank Lid (f/w Tank Assy.)	1
	92-3765	Vent Cap	1
20	42859	Breather Gasket (f/w Tank Assy.)	1
21	42323	Filler Basket (f/w Tank Assy.)	1
22	43069	Stand Up Assembly	1
23	43064	Knife Valve	1
24	43068	Fly Nut, 2" NPT	1

## SPEED SENSOR

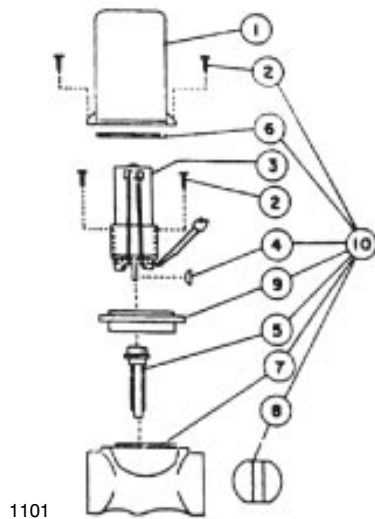

Ref.	Part No.	Description	Qty.
1	321-6	HHCS, 1/4 x 1	2
2	3253-3	Lockwasher, 1/4	4
3	3217-5	Hex Nut, 1/4	4
4	41479	Sensor Rod	1
5	41478	Turret Assembly	2
6	41477	Sensor Switch Assembly	1
7	41475	Magnet Assembly (Red)	2
	41476	Magnet Assembly (Black)	2
8	3217-9	Hex Nut, 1/2	8

## FLOW METER

Ref.	Part No.	Description	Qty.
1	42475	Sensor Housing	1
2	42476	S.S. Screw, #10 x 3/4"	12
3	93-1098*	O-Ring (Viton)	2
4	42477	Dual O-Ring Transducer Assy	1
5	42478	Turbine	1
6	42479	Turbine Hub/Bearing Ass'y	1
7	42480	Turbine Stud Assembly	1
8	42469	O-Ring (Viton)	1
9	42481	Hub Housing w/Inserts	1
10	41483	Mounting Bracket (not shown)	1

\* Included with Transducer, Part No. 42477

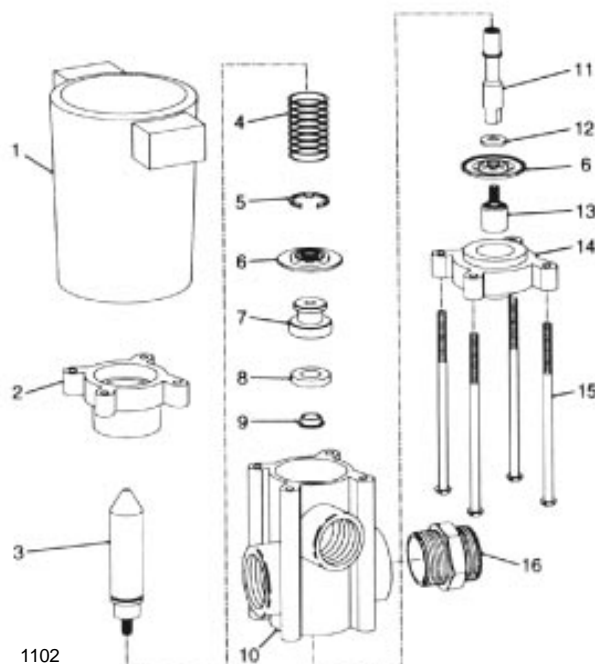

## CONTROL VALVE

Ref.	Part No.	Description	Qty.
1	42318	Valve Cover	1
2	42482	Screw, #6 x 3/4"	6
3	42483	Motor Assy	1
4	42484	Woodruff Key	1
5	42485	Coupler Shaft	1
6	42470	Seal (Tetraseal)	1
7		Valve Body	NS
8	42486	Butterfly	1
9	42487	Isolation Flange Assy	1
10	42488	Valve - Iso-Body Kit	1

## SOLENOID VALVE

Ref.	Part No.	Description	Qty.
1	95-9317	Coil Ass'y - Nylon Encapsulated	1
2	92-0364	Upper Diaphragm Housing (blk)	1
3	95-9318	Armature - Type 430FR S.S.	1
4	***	Spring - Type 302 S.S.	1
5	95-9319	Retaining Ring - Steel, Plated	1
6	***	Diaphragm - Viton	2
7	92-3681	Seat Washer Retainer - S.S.	1
8	***	Seat Washer - Viton	1
9	42136	Spacer - Stainless Steel	1
10	42137	Body - Polypropylene (black)	1
11	92-3682	Stem - Stainless Steel	1
12	42134	Washer - Stainless Steel	1
13	92-0367	Lower Diaphragm Piston - S.S.	1
14	92-0368	Lower Diaphragm Housing (blk)	1
15	42143	Screw - Stainless Steel	4
16	42884	Connecting Nipple - (black)	AR
