Parts Catalog

30in Stand-On Aerator

Model No. 39521—Serial No. 415300000 and Up

Ordering Replacement Parts

To order replacement parts, please supply the part number, the quantity, and the description of each part desired.

Understanding Reference Numbers

Each identified part in an illustration has a reference number. The reference number for a part also appears in the parts list, along with other information about the part.

This catalog uses two special reference number formats, one to indicate parts in a service assembly and another to indicate the quantity of a given part in an illustration.

Service Assembly Reference Numbers

Parts in service assemblies have reference numbers in the form a:b. The a represents the reference number of the entire service assembly and the b represents a sequential number unique to each part within the service assembly.

For example, a wheel assembly might be identified by reference number 6, the tire by 6:1, the valve by 6:2, and the wheel by 6:3. When you order the assembly identified by reference number 6, you receive all parts identified by reference numbers 6:1, 6:2, and 6:3. However, you may also order any part individually. Reference numbers of this type appear in illustration and in parts lists.

Reference Numbers Indicating Quantity

In an illustration, if a reference number indicates more than one part, the reference number has the form nX y. The n represents the quantity of the part, the X is the multiplication symbol, and the y represents the reference number.

For example, in an illustration, the reference number 2X 37 means that two of the parts identified by reference number 37 are indicated.

This exploded view diagram illustrates the assembly of a vehicle interior component, likely a seat or floor panel. The central part of the diagram shows a rectangular panel (2) with a grid of small, diamond-shaped features. To the left, a side rail assembly (15, 17) is shown. Below the panel, a circular component (18) is connected to a cable (22). To the right, a complex assembly (1) is shown, which includes a motor or actuator (30, 31) and various cables (23, 28, 11, 19, 21, 36, 37). A cable (11) runs through the center, connecting various components. At the bottom, a large metal bracket (28) is shown, which is connected to a cable (27) and a component (16). Other components shown include a small rectangular part (12), a cable (20), and a small component (21). The diagram uses dashed lines to indicate the assembly path and alignment of the parts.

Electrical Assembly (continued)
