Parts Catalog

96in Air Cool Z Master[®] Professional Riding Mower

Model No. 74090—Serial No. 418324029 and Up

Ordering Replacement Parts

To order replacement parts, please supply the part number, the quantity, and the description of each part desired.

Understanding Reference Numbers

Each identified part in an illustration has a reference number. The reference number for a part also appears in the parts list, along with other information about the part.

This catalog uses two special reference number formats, one to indicate parts in a service assembly and another to indicate the quantity of a given part in an illustration.

Service Assembly Reference Numbers

Parts in service assemblies have reference numbers in the form a:b. The a represents the reference number of the entire service assembly and the b represents a sequential number unique to each part within the service assembly.

For example, a wheel assembly might be identified by reference number 6, the tire by 6:1, the valve by 6:2, and the wheel by 6:3. When you order the assembly identified by reference number 6, you receive all parts identified by reference numbers 6:1, 6:2, and 6:3. However, you may also order any part individually. Reference numbers of this type appear in illustration and in parts lists.

Reference Numbers Indicating Quantity

In an illustration, if a reference number indicates more than one part, the reference number has the form nX y. The n represents the quantity of the part, the X is the multiplication symbol, and the y represents the reference number.

For example, in an illustration, the reference number 2X 37 means that two of the parts identified by reference number 37 are indicated.

This diagram is an exploded view of a mechanical assembly, likely a pump or motor unit. It shows the main housing (1) and various internal components, including a motor (29), a pump head (19), and a drive shaft (12). The assembly is shown in a disassembled state to illustrate the relationship between parts. Key components include:

- Motor (29):** A three-phase induction motor with cooling fins.
- Pump Head (19):** A cast iron component with a central shaft and a flange.
- Drive Shaft (12):** A long shaft connecting the motor to the pump head.
- Impeller (36):** A centrifugal impeller mounted on the end of the drive shaft.
- Housing (1):** The main cast iron housing with a flange and mounting feet.
- Internal Components:** Various internal parts like bearings (32), seals (33), and shafts (11, 14, 15, 16, 21, 22, 23, 24, 25, 26, 27, 28, 30, 31, 34, 35) are shown in their relative positions.

The diagram uses a standard exploded view format with dashed lines indicating the assembly path. The parts are numbered 1 through 37, with some parts having multiple instances (e.g., 13:1, 13:2, 13:3; 8:1, 8:2, 8:3; 23:1, 23:2, 23:3; 36:1, 36:2).
