Ordering Replacement Parts

To order replacement parts, please supply the part number, the quantity, and the description of each part desired.

Understanding Reference Numbers

Each identified part in an illustration has a reference number. The reference number for a part also appears in the parts list, along with other information about the part.

This catalog uses two special reference number formats, one to indicate parts in a service assembly and another to indicate the quantity of a given part in an illustration.

Service Assembly Reference Numbers

Parts in service assemblies have reference numbers in the form a:b. The a represents the reference number of the entire service assembly and the b represents a sequential number unique to each part within the service assembly.

For example, a wheel assembly might be identified by reference number 6, the tire by 6:1, the valve by 6:2, and the wheel by 6:3. When you order the assembly identified by reference number 6, you receive all parts identified by reference numbers 6:1, 6:2, and 6:3. However, you may also order any part individually. Reference numbers of this type appear in illustration and in parts lists.

Reference Numbers Indicating Quantity

In an illustration, if a reference number indicates more than one part, the reference number has the form nX y. The n represents the quantity of the part, the X is the multiplication symbol, and the y represents the reference number.

For example, in an illustration, the reference number 2X 37 means that two of the parts identified by reference number 37 are indicated.

This exploded view diagram illustrates the electrical components of a Toro lawn mower. The central focus is the battery, labeled with the Toro logo. Surrounding it are various electrical parts, including the ignition switch (11), starter motor (21), and multiple wiring harnesses (e.g., 17, 33, 37). The diagram uses numbered callouts to identify specific components and their assembly points. Key components include:

- Battery:** The main power source, featuring the Toro logo.
- Ignition Switch:** Labeled 11, it controls the engine's ignition.
- Starter Motor:** Labeled 21, it provides the mechanical power to start the engine.
- Wiring Harnesses:** Various bundles of wires, such as 17, 33, and 37, connect the battery to other components.
- Relay and Solenoid:** Labeled 26, it acts as an electromagnetic switch to control the starter motor.
- Lighting:** Components like 34 and 34:1 represent the mower's lights.
- Connectors and Terminals:** Numerous small parts like 31, 32, 35, and 41 are used to secure the wiring.

The diagram shows the spatial arrangement of these parts, with dashed lines indicating the assembly path. The battery is at the bottom, while the ignition switch and starter motor are positioned towards the top right. The wiring harnesses are shown connecting these components in a structured manner.
