60in Z Master® Professional 2000 Series

Riding Mower

Model No. 77285—Serial No. 420000000 and Up

Ordering Replacement Parts

To order replacement parts, please supply the part number, the quantity, and the description of each part desired.

Understanding Reference Numbers

Each identified part in an illustration has a reference number. The reference number for a part also appears in the parts list, along with other information about the part.

This catalog uses two special reference number formats, one to indicate parts in a service assembly and another to indicate the quantity of a given part in an illustration.

Service Assembly Reference Numbers

Parts in service assemblies have reference numbers in the form a:b. The a represents the reference number of the entire service assembly and the b represents a sequential number unique to each part within the service assembly.

For example, a wheel assembly might be identified by reference number 6, the tire by 6:1, the valve by 6:2, and the wheel by 6:3. When you order the assembly identified by reference number 6, you receive all parts identified by reference numbers 6:1, 6:2, and 6:3. However, you may also order any part individually. Reference numbers of this type appear in illustration and in parts lists.

Reference Numbers Indicating Quantity

In an illustration, if a reference number indicates more than one part, the reference number has the form nX y. The n represents the quantity of the part, the X is the multiplication symbol, and the y represents the reference number.

For example, in an illustration, the reference number 2X 37 means that two of the parts identified by reference number 37 are indicated.

This technical drawing is an exploded view of a mechanical assembly, showing the relationship between various components. The components are numbered as follows:

- 1**: A large, L-shaped bracket or plate that serves as the main structural component.
- 2**: A cylindrical sleeve or bushing that fits onto the vertical post of component 1.
- 3**: A small cylindrical component, possibly a pin or a small bushing, located near the center of the bracket.
- 4**: A large, circular, flange-like component with a central hole and four internal slots, likely a pulley or a base plate.
- 5**: A long, thin cylindrical rod or shaft that passes through the center of the assembly.
- 6**: A circular washer or spacer ring that fits around the rod.
- 7**: A hexagonal nut or bolt head that secures the assembly.
- 8**: A long, thin cylindrical rod or shaft, similar to component 5, located at the top of the assembly.
- 9**: A small cylindrical component, possibly a pin or a small bushing, located near the bottom of the bracket.
- 10**: A hexagonal nut or bolt head, similar to component 7, located on the right side of the bracket.
- 11**: A long, thin cylindrical rod or shaft, similar to component 5, located on the right side of the bracket.
- 12**: A hexagonal nut or bolt head, similar to component 7, located on the right side of the bracket.

The diagram uses dashed lines to indicate the assembly path and alignment of the components. The components are shown in a disassembled state to illustrate their relative positions and how they fit together.
