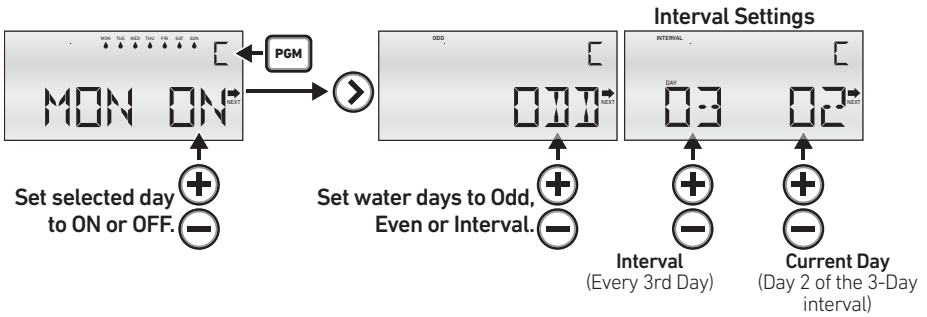
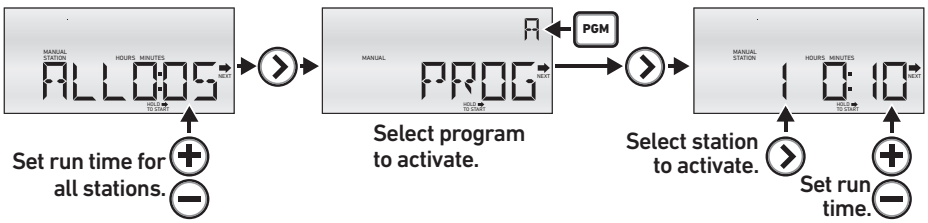
Setting Water Days

1. Place the dial to **WATER DAYS**.
2. Use PGM to select the program being edited.
3. Use ⊕ or ⊖ to set the selected day ON or OFF.
4. Use ⊙ to select the next day of the week.
5. After Sunday (**SUN**) setting, you'll access the Odd, Even and Interval watering selection.



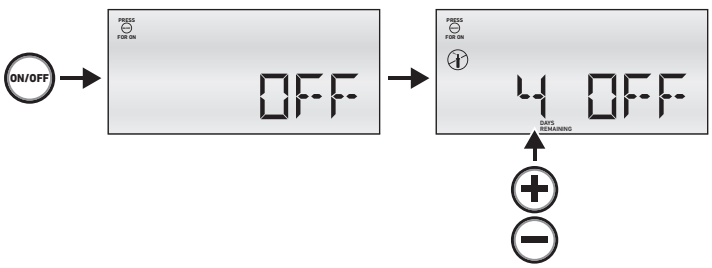
Manual Activation

1. Place the dial to **MANUAL**.
2. Use ⊙ to select **ALL** (activate all stations), **PROG** (Activate selected program) or select specific stations to activate.
3. Use ⊕ or ⊖ to set the run time.
4. Press and hold ⊙ to activate.
5. Return the dial into the Auto position once finished.



Rain Delay

1. Press **RAIN DELAY** ON/OFF. The RXC controller's automatic watering will be suspended indefinitely.
2. To set a specific number of days to delay/ suspend automatic watering, press ⊕ or ⊖ to set the desired delay/suspension duration in days.
4. Press ON/OFF to cancel rain delay. Both PRESS FOR ON and icons will disappear from the LCD display once rain delay is canceled.



Reset Wi-Fi Module

You can reset or re-establish WiFi communication by unplugging the Wi-Fi module from the RXC and connecting it back after 10 seconds. To connect smart devices to RXC using Wi-Fi, you must download Toro's Oasis irrigation management App. The RXC requires a Wi-Fi modulle in order to pair with Oasis App. The RXC-WIFI is sold separately.
