Setting Water Days

1. Place the dial to **WATER DAYS**
2. Use **PGM** to select the program being edited.
3. Use **+** or **-** to set the selected day ON or OFF.
4. Use **>** to select the next day of the week.
5. After Sunday (**SUN**) setting, you'll access the Odd, Even and Interval watering selection.

Manual Activation

1. Place the dial to **MANUAL**
2. Use **>** to select **ALL** (activate all stations), **PROG** (Activate selected program) or select specific stations to activate.
3. Use **+** or **-** to set the run time.
4. Press and hold **>** to activate.
5. Return the dial into the Auto position once finished.

Rain Delay

1. Press **RAIN DELAY** . The RXC controller's automatic watering will be suspended indefinitely.
2. To set a specific number of days to delay/suspend automatic watering, press **+** or **-** to set the desired delay/suspension duration in days.
4. Press to cancel rain delay. Both and icons will disappear from the LCD display once rain delay is canceled.

Reset Wi-Fi Module

You can reset or re-establish WiFi communication by unplugging the Wi-Fi module from the RXC and connecting it back after 10 seconds. To connect smart devices to RXC using Wi-Fi, you must download Toro's Oasis irrigation management App. The RXC requires a Wi-Fi module in order to pair with Oasis App. The RXC-WIFI is sold separately.
