Parts Manual

CONGRATULATIONS on the purchase of your new Exmark mower. This product has been carefully designed and manufactured to give you a maximum amount of dependability and years of trouble-free operation.

If additional information is needed, or should you require trained mechanic service, contact your authorized Exmark equipment dealer or distributor.

If you need to order replacement parts from your dealer, always give the model number and serial number of your mower as well as the part number, description and quantity of the part needed.

The Serial No. plate for the tractor is located on the rear frame gusset (right hand side of the unit). The Serial No. plate for the deck is located on the front support pin gusset (right hand side of deck or just inside rear edge of the right belt guard).

For ease of ordering and reference, we suggest that you record the information requested in the following identification table.

SAFETY RECOMMENDATIONS FOR ALL EXMARK MOWER USERS

TRAINING

1. Read the instructions carefully. Be familiar with the controls and the proper use of the equipment. Regard the Exmark mower as a piece of power equipment and teach this regard to all who operate this unit.
2. Avoid mowing while people, especially when children or pets, are nearby. Never allow children, teenagers, or people unfamiliar with these instructions to use the mower. Keep in mind that the operator or user is responsible for accidents or hazards occurring to other people or their property.

PREPARATION

1. The use of personal protective equipment, such as (but not limited to) protection for the eyes, ears, feet and head is recommended.
2. While mowing, always wear substantial footwear and long trousers. ***Do Not*** operate the equipment when barefoot, wearing baggy clothing or trousers with loose strings, or while wearing open sandals.
3. Thoroughly inspect the area where the equipment will be used. Remove all stones, sticks, wire, bones and other foreign objects which can result in personal injury.

OPERATION

⚠ WARNING

- **Failure to follow safety instructions and cautious operating practices can result in serious injury.**

1. This mower was designed for one operator only. Keep all others away from mower during operation.
2. Give complete undivided attention to the job at hand.
3. Mow only in daylight or good artificial light.

⚠ DANGER

- ***Do Not*** **operate the engine in a confined area where dangerous carbon monoxide fumes can collect.**

4. When feasible, avoid operating the equipment in wet grass.
5. Mow ***up and down*** slopes. Use extreme caution when mowing and/or turning on slopes, and when mowing down slopes ***(tractor could tip forward).*** ***Do Not*** mow excessively steep slopes.
6. Use extreme caution when backing up.
7. Stop the blades when transporting the mower across any surface other than grass, and when transporting the mower to and from the area to be mowed.
8. ***Never*** operate the mower with damaged guards, shields, or without operating safety devices in place. ***Do Not*** mow without grass deflector or entire grass collection system in place and in proper working condition.
9. ***Do Not*** change the governor settings or overspeed the engine. Operating an engine at excessive speed may increase the hazard of personal injury.
10. Fill the gas tank with the recommended fuel specified by the engine manufacturer.

⚠ DANGER

- **Fuel is *highly flammable. Never* remove the cap of the gas tank while engine is running or when engine is hot. Add fuel *before* starting the engine.**
- **Refuel outdoors or in a well ventilated area. *Do Not* smoke when refueling or operating the equipment.**
- **If fuel is spilled, *Do Not* attempt to start the engine. Move away from the spill and avoid creating any source of ignition or sparks until fuel vapors have dissipated.**

11. Before starting engine; place transmission in neutral, and disengage the blade and wheel drive clutches. Follow engine manufacturer recommendations for starting engine.
12. Start the engine with feet well away from the blades.
13. Keep hands, feet and clothing away from rotating parts while the mower is being operated.

⚠ CAUTION

- **The engine can become very hot. Always allow the engine to cool before servicing or making any repairs near the engine area.**

14. Stop the engine:
    - Before refueling.
    - Before making height adjustments.
    - Before removing grasscatcher.

14. Stop the engine and remove ignition key:
    - Before checking, adjusting, or clearing blockages.
    - After striking a foreign object to inspect mower for damage. Make any necessary repairs before restarting and operating the mower.
    - Before cleaning blockages.
    - Whenever you leave the mower.

⚠ WARNING

- ***Do Not* rely solely on mechanical or hydraulic jacks for support. Properly support the deck or mower using adequate jack stands or equivalent support.**

15. Return the throttle control to the idle position for 30 seconds for engine cool down before stopping the engine.
16. The fuel system is provided with a shut-off valve. The fuel shut-off valve is used when transporting the mower to and from the job site and when the mower will be stored and not in use for a few days.
17. If jump starting is required, connect positive (+) power cable from booster battery to the positive (+) terminal post on starter solenoid switch (this post has the positive battery cable hooked to it). Connect the ground (-) cable from booster battery to any engine deck ground (preferably the engine block).
18. Disconnect cables in the reverse order after engine has started.

MAINTENANCE AND STORAGE

⚠ CAUTION

- **Although hazard control and accident prevention are partially dependent upon the design and configuration of the equipment, these factors are also dependent upon the awareness, concern, prudence and proper training of the personnel involved in the operation, transport, storage and maintenance of the equipment.**
- **It is essential that all operator safety guards and mechanisms be connected and in proper operating condition prior to mowing.**

1. Follow the engine manufacturer's recommendations as detailed in the engine manual, for maintenance and service on the engine.
2. Keep engine and engine area free of grass, leaves, excessive grease and oil, and other debris which can accumulate in these areas. Some of these materials can become combustible and result in a fire.
3. Maximum mowing results and safety can be achieved if the mower is properly maintained and operated correctly.
4. Keep all guards, shields and other safety devices *in place* and in safe working condition.
5. Check all bolts and hydraulic fittings frequently to maintain proper tightness.
6. If carburetor adjustment is necessary, disengage the blade and wheel drive, stand to one side keeping hands and feet away from the mower deck, make appropriate adjustments.
7. Check for worn or deteriorating components and belts which could create a hazard. Replace or repair as necessary.
8. All replacement parts must be equivalent or the same as the parts supplied as original equipment.

⚠ DANGER

- **Fuel is *highly flammable. Do Not* store fuel in an enclosed area where heating appliance or open flame is present. Store fuel in a container designed specifically for that purpose.**

9. Store fuel in a cool dry place. Keep fuel and mower in locked storage to prevent children from playing or tampering with them.

⚠ CAUTION

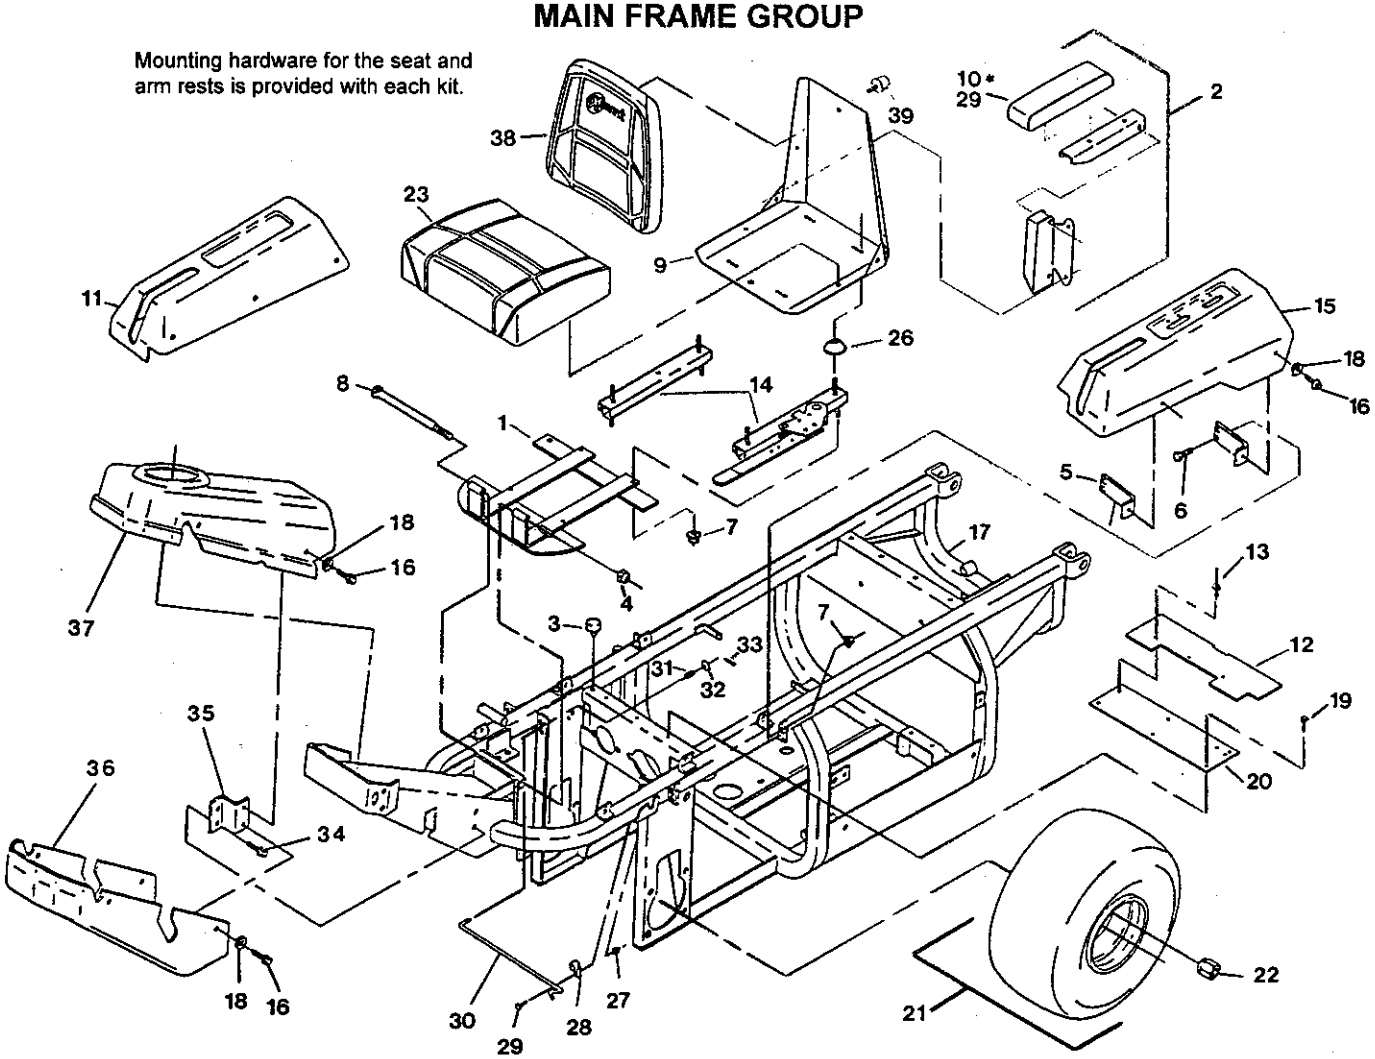

- **Hydraulic fluid escaping under pressure may have sufficient force to penetrate the skin and cause serious injury. If foreign fluid is injected into the skin, it must be surgically removed within a few hours by a doctor familiar with this form of injury or gangrene may occur.**
- **Use paper or cardboard to check for leaks. *NEVER* use your hands.**
- **Safely relieve all pressure in the system before disconnecting the lines or before performing work on the hydraulic system.**

SAFETY SIGNS

1. Familiarize yourself with the instruction and safety labels. They are critical to the safe operation of your Exmark commercial mower. Remove all grease, dirt and debris from safety signs. Safety signs must be replaced if they are missing or illegible.
2. Safety signs may be affixed by peeling off the backing to expose the adhesive surface. Apply only to a clean dry surface. Smooth to remove air bubbles.
3. When new components are installed, insure that current safety signs are affixed to the replaced component. New safety signs may be obtained from your authorized Exmark dealer or distributor, or from Exmark Mfg. Co. Inc.
