

# Drag Link Attachment to the Replacement Sector Gear DH Series Lawn Tractors

Model No. 120-8749

Form No. 3369-474 Rev B

## Installation Instructions

# Installation

**Note:** This sector gear, part number 120-8749, is a replacement for part number 104-2883. The new gear has a longer extension where the drag link attaches and requires the drag link to be attached from above. The gear you are replacing may be one of the old versions, with the drag link attached from below, or one of the new versions where it is already attached from above.

## Attaching the Drag Link

Attach the drag link to the replacement sector gear as shown in Figure 1.

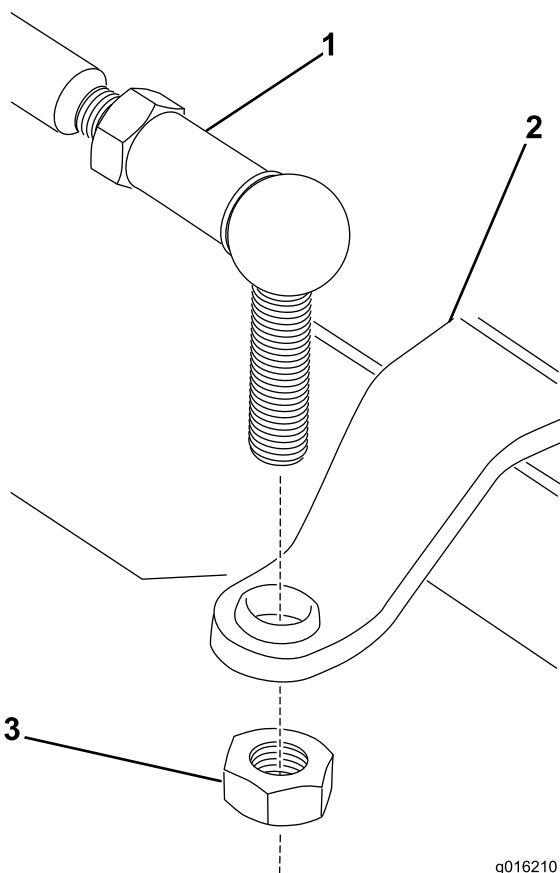

Figure 1

- |                            |                  |
|----------------------------|------------------|
| 1. Drag link, existing     | 3. Nut, existing |
| 2. Replacement sector gear |                  |

**Note:** The replacement sector gear is an improved design that requires the drag link to be connected from above. **Do not attach it from below** as was done for the old gear.
