OPERATOR'S MANUAL ADDENDUM

FUEL TANK UPDATE

For Commercial Heavy Duty Mower Model 22035

Due to a design change, the fuel shut-off valve on your heavy duty mower's fuel tank has been replaced with an elbow fitting (Fig. 1). Disregard any instructions in your Operator's Manual that refer to a fuel shut-off valve. When installing the fuel line, slide the end of the line onto the elbow fitting and secure in place with the fuel line clamp. Please place this addendum with your Operator's Manual for future reference.
