

PART NO. 57-0700

INSTALLATION
INSTRUCTIONS

LEAF MULCHER DISCHARGE PLATE

(Groundsmaster Cutting Units Model 30575 & 30562)

1. Remove cutting unit from traction unit as instructed in operators manual.

2. Turn cutting unit upside down and block upends, to ease in the installation of the mulcher plate.

NOTE: Do not remove cutting unit deflector.

3. Insert mulcher plate into cutting unit discharge opening and secure rear of plate to deflector stop with a capscrew and locknut. Locknut to be positioned inside discharge opening.

4. Align mulcher plate with edge of discharge opening. Using mulcher plate as a template, locate

and mark (3) remaining mounting holes in top and front of cutting unit.

5. Remove mulcher plate from cutting unit and drill (3) 11/32" (.344) dia. holes at positions marked.

6. Reinstall mulcher plate to cutting unit with (4) capscrews and locknuts. Locknuts to be positioned inside discharge opening

7. Reinstall cutting unit to traction unit as instructed in operators manual.

NOTE: When mulcher plate is removed, plug mounting holes in top of cutting unit with fasteners supplied in kit.
