

50cm Mulching/Side Discharge/Rear Bagging Lawn Mower

Model No. 29643—Serial No. 313000001 and Up

Form No. 3376-735 Rev A

Operator's Manual

Introduction

This rotary-blade, walk-behind lawn mower is intended to be used by residential homeowners. It is designed primarily for cutting grass on well-maintained lawns on residential properties. It is not designed for cutting brush or for agricultural uses.

Read this information carefully to learn how to operate and maintain your product properly and to avoid injury and product damage. You are responsible for operating the product properly and safely.

You may contact Toro directly at www.Toro.com for product and accessory information, help finding a dealer, or to register your product.

Whenever you need service, genuine Toro parts, or additional information, contact an Authorized Service Dealer or Toro Customer Service and have the model and serial numbers of your product ready. Figure 1 identifies the location of the model and serial numbers on the product. Write the numbers in the space provided.

Figure 1

| Serial No. _____ |

This manual identifies potential hazards and has safety messages identified by the safety alert symbol (Figure 2), which signals a hazard that may cause serious injury or death if you do not follow the recommended precautions.

Figure 2

1. Safety alert symbol

This manual uses two words to highlight information.

Important calls attention to special mechanical information and **Note** emphasizes general information worthy of special attention.

This product complies with all relevant European directives. For details, see the separate product specific Declaration of Conformity (DOC) sheet.

For models with stated engine horsepower, the gross horsepower of the engine was laboratory rated by the engine manufacturer in accordance with SAE J1940. As configured to meet safety, emission, and operating requirements, the actual engine horsepower on this class of lawn mower will be significantly lower.

Do not tamper with the engine controls or alter the governor speed; doing so may create an unsafe condition resulting in personal injury.

Safety

Improperly using or maintaining the mower can result in injury. To reduce the potential for injury, comply with these safety instructions.

Toro designed and tested this mower for reasonably safe service; however, failure to comply with the following instructions may result in personal injury.

To ensure maximum safety, best performance, and to gain knowledge of the product, it is essential that you and any other operator of the mower read and understand the contents of this manual before the engine is ever started. Pay particular attention to the safety alert symbol (Figure 2) which means Caution, Warning, or Danger—"personal safety instruction." Read and understand the instruction because it has to do with safety. Failure to comply with the instruction may result in personal injury.

General Lawn Mower Safety

The following instructions have been adapted from EN 836.

This cutting machine is capable of amputating hands and feet and throwing objects. Failure to observe the following safety instructions could result in serious injury or death.

Training

- Read the instructions carefully. Be familiar with the controls and the proper use of the equipment.
- Never allow children or people unfamiliar with these instructions to use the mower. Local regulations can restrict the age of the operator.

- Keep in mind that the operator or user is responsible for accidents or hazards occurring to other people or their property.
- Understand explanations for all pictograms used on the mower or in the instructions.

Gasoline

⚠ WARNING

Gasoline is highly flammable. Take the following precautions.

- **Store fuel in containers specifically designed for this purpose.**
- **Refuel outdoors only and do not smoke while refueling.**
- **Add fuel before starting the engine. Never remove the cap of the fuel tank or add gasoline while the engine is running or when the engine is hot.**
- **If gasoline is spilled, do not attempt to start the engine but move the machine away from the area of spillage and avoid creating any source of ignition until gasoline vapors have dissipated.**
- **Replace all fuel tank and container caps securely.**

Preparation

- While mowing, always wear substantial footwear and long trousers. Do not operate the machine when barefoot or wearing open sandals.
- Thoroughly inspect the area where the machine is to be used, and remove all stones, sticks, wires, bones, and other foreign objects.
- Before using, always visually inspect to see that guards and safety devices, such as deflectors and/or grass catchers, are in place and working correctly.
- Before using, always visually inspect to see that the blades, blade bolts, and cutter assembly are not worn or damaged. Replace worn or damaged blades and bolts in sets to preserve balance.

Starting

Start the engine carefully, according to instructions and with feet well away from the blade(s) and not in front of the discharge chute.

Operation

- Never mow while people, especially children, or pets are nearby.
- Mow only in daylight or in good artificial light.

- Stay alert for holes in the terrain and other hidden hazards.
- Do not put hands or feet near or under rotating parts. Keep clear of the discharge opening at all times.
- Never pick up or carry the machine while the engine is running.
- Use extreme caution when reversing or pulling the mower towards you.
- Walk; never run.
- Slopes:
 - Do not mow on excessively steep slopes.
 - Exercise extreme caution when on slopes.
 - Mow across the face of slopes, never up and down, and exercise extreme caution when changing direction on slopes.
 - Always be sure of your footing on slopes.
- Reduce speed on slopes and in sharp turns to prevent overturning or loss of control.
- Stop the blade if the machine has to be tilted for transportation when crossing surfaces other than grass and when transporting the machine.
- Do not operate the engine in a confined space where dangerous carbon monoxide fumes can collect.
- Stop the engine
 - whenever you leave the machine.
 - before refueling.
 - before removing the grass catcher.
 - before making height adjustment unless adjustment can be made from the operator's position.
- Stop the engine and disconnect the spark plug wire
 - before clearing blockages or unclogging chute.
 - before checking, cleaning, or servicing the machine.
 - after striking a foreign object, inspect the machine for damage and make repairs before restarting and operating the machine.
 - if the machine starts to vibrate abnormally (check immediately).
- Lightning can cause severe injury or death. If you see lightning or hear thunder in the area, do not operate the machine; seek shelter.
- Watch out for traffic when crossing or near roadways.
- Never store the machine with gasoline in the tank and inside a building where fumes can reach an open flame or spark.
- Allow the engine to cool before storing in any enclosure.
- To reduce the risk of fire, keep the engine, silencer, battery compartment, and gasoline storage area free of grass, leaves, or excessive grease.
- Check grass catcher components and the discharge guard frequently and replace with manufacturer's recommended parts, when necessary.
- Replace worn or damaged parts for safety.
- Replace faulty silencers.
- If the fuel tank has to be drained, do this outdoors.
- Do not change the engine governor settings or overspeed the engine. Operating an engine at excessive speed can increase the hazard of personal injury.
- On multibladed machines, use caution, as rotating one blade may cause others to rotate.
- Be careful during adjustment of the mower to prevent entrapment of the fingers between moving blades and fixed parts of the mower.
- **To ensure the best performance and safety, purchase only genuine Toro replacement parts and accessories. Do not use *will fit* parts and accessories; they may cause a safety hazard.**

Sound Pressure

This machine has a sound pressure level at the operator's ear of 88 dBA, which includes an Uncertainty Value (K) of 1 dBA. The sound pressure level was determined according to the procedures outlined in EN 836.

Sound Power

This machine has a guaranteed sound power level of 98 dBA, which includes an Uncertainty Value (K) of 1 dBA. The sound power level was determined according to the procedures outlined in ISO 11094.

Hand-Arm Vibration

Measured vibration level for the left hand = 3.9 m/s²

Measured vibration level for the right hand = 4.4 m/s²

Uncertainty Value (K) = 2.2 m/s²

The measured values were determined according to the procedures outlined in EN 836.

Maintenance and Storage

- Keep all nuts, bolts, and screws tight to be sure the machine is in safe working condition.
- Do not use pressure cleaning equipment on the machine.

Safety and Instructional Decals

Important: Safety and instruction decals are located near areas of potential danger. Replace damaged decals.

Manufacturer's Mark

1. Indicates the blade is identified as a part from the original machine manufacturer.

112-8760

1. Thrown object hazard—keep bystanders a safe distance from the machine.
2. Cutting/dismemberment of hand or foot—stay away from moving parts.

117-4143

1. Warning—read the *Operator's Manual*.
2. Thrown object hazard—keep bystanders a safe distance from the machine.
3. Cutting/dismemberment hazard of hand or foot, mower blade—disconnect the spark plug wire and read the instructions before servicing or performing maintenance.
4. Cutting/dismemberment hazard of hand or foot, mower blade—stay away from moving parts and keep all guards and shields in place.
5. Cutting/dismemberment hazard of hand or foot, mower blade—do not mow up and down slopes, only mow across; stop the mower and engine, pick up debris before operating; look behind and down when reversing.

Setup

Important: Remove and discard the protective plastic sheet that covers the engine.

1

Unfolding the Handle

No Parts Required

Procedure

⚠ WARNING

Folding or unfolding the handle improperly can damage the cables, causing an unsafe operating condition.

- Do not damage the cables when folding or unfolding the handle.
- If a cable is damaged, contact an Authorized Service Dealer.

1. Remove the handle knobs from the mower housing (Figure 3).

Important: Route the cables to the outside of the handle as you install the handle.

Figure 3

1. Handle knob (2)

2. Move the handle to the operating position.
3. Install and tighten the handle knobs that you removed in step 1 (Figure 3).

2

Installing the Recoil-starter Rope in the Rope Guide

No Parts Required

Procedure

Important: To start the engine safely and easily whenever you use the machine, install the recoil-starter rope in the rope guide.

Hold the blade-control bar to the upper handle and pull the recoil-starter rope through the rope guide on the handle (Figure 4).

Figure 4

1. Recoil-starter rope
2. Rope guide

3

Filling the Engine with Oil

No Parts Required

Procedure

Important: The machine does not come with oil in the engine.

1. Remove the dipstick (Figure 5).

Figure 5

5

Installing the Fuse

No Parts Required

Procedure

Refer to Replacing the Fuse (page 14).

2. **Slowly** pour oil into the oil-fill hole until the oil level reaches the Full line on the dipstick (Figure 5). **Do not overfill.** (Max. fill: 0.59 l (20 oz.), type: 10W-30 or SAE 30 detergent oil with an API service classification of SJ or higher.)

Note: Each time you check the oil level, remove the dipstick and wipe it clean, insert it into the oil filler neck (but **do not** screw it in), then remove it again and check the level (Figure 5).

Note: If you overfill the engine, pour some oil out of it; refer to Changing the Engine Oil (page 13).

3. Install the dipstick securely.

Important: *Change the engine oil after the first 5 operating hours; change it every 50 hours or yearly thereafter, whichever comes first. Refer to Changing the Engine Oil (page 13).*

4

Charging the Battery

No Parts Required

Procedure

Refer to Charging the Battery (page 13).

Specifications

| Model | Weight | Length | Width | Height |
|-------|-------------------|-----------------------|----------------------|----------------------|
| 29643 | 33 kg (73 lbs) | 145 cm (57 inches) | 56 cm (22 inches) | 99 cm (39 inches) |

Operation

Attachments/Accessories

A selection of Toro approved attachments and accessories are available for use with the machine to enhance and expand its capabilities. Contact your Authorized Service Dealer or Distributor or go to www.Toro.com for a list of all approved attachments and accessories.

Filling the Fuel Tank

⚠ DANGER

Gasoline is extremely flammable and explosive. A fire or explosion from gasoline can burn you and others.

- To prevent a static charge from igniting the gasoline, place the container and/or machine directly on the ground before filling, not in a vehicle or on an object.
- Fill the tank outdoors when the engine is cold. Wipe up spills.
- Do not handle gasoline when smoking or around an open flame or sparks.
- Store gasoline in an approved fuel container, out of the reach of children.

Fill the fuel tank with fresh unleaded regular gasoline from a major name-brand service station (Figure 7).

- For best results, use only clean, fresh, unleaded gasoline with an octane rating of 87 or higher ((R+M)/2 rating method).
- Oxygenated fuel with up to 10% ethanol or 15% MTBE by volume is acceptable.
- **Do not** use ethanol blends of gasoline, such as E15 or E85, with more than 10% ethanol by volume. Performance problems and/or engine damage may result, which may not be covered under warranty.
- **Do not** use gasoline containing methanol.
- **Do not** store fuel either in the fuel tank or in fuel containers over the winter unless fuel stabilizer has been added to the fuel.
- **Do not** add oil to gasoline.

Important: To reduce starting problems, add fuel stabilizer to the fuel all season, mixing it with gasoline less than 30 days old.

1. Clean around the fuel tank cap, and remove the cap from the tank.
2. Fill the fuel tank, leaving at least 1 cm (1/2 inch) from the bottom of the neck empty to allow the gasoline room to expand (Figure 7).

Figure 7

1. 1 cm (1/2 inch)

3. Install the fuel tank cap and tighten it securely by hand.

Checking the Engine Oil Level

Service Interval: Before each use or daily

1. Remove the dipstick, wipe it clean, and insert it into the oil filler neck, but **do not** screw it in (Figure 8).

Figure 8

2. Remove the dipstick and check the oil level (Figure 8). If the oil level is below the Add mark on the dipstick, **slowly** pour oil into the oil-fill hole to raise the oil level to the Full mark on the dipstick. **Do not overfill.** (Max. fill: 0.65 l (22 oz.), type: 10W-30 or SAE 30 detergent oil with an API service classification of SJ or higher.)

Note: If you overfill the engine, pour some oil out of it as directed; refer to Changing the Engine Oil (page 13).

3. Install the dipstick securely.

Adjusting the Cutting Height

⚠ WARNING

Adjusting the cutting height may bring you into contact with the moving blade, causing serious injury.

- Stop the engine and wait for all moving parts to stop.
- Do not put your fingers under the housing when adjusting the cutting height.

⚠ CAUTION

If the engine has been running, the muffler will be hot and can severely burn you.

Keep away from the hot muffler.

Adjust the cutting height as desired. Set all four wheels to the same height.

Note: To raise the mower, move all the cutting height levers forward; to lower the mower, move the all the cutting height levers rearward (Figure 9).

Figure 9

1. Raise the mower
2. Lower the mower

Note: The cutting height settings are 25 mm (1 inch); 38 mm (1-1/2 inch); 51 mm (2 inches); 64 mm (2-1/2 inches); 76 mm (3 inches); 89 mm (3-1/2 inches); and 102 mm (4 inches).

Starting the Engine

1. Hold the blade control bar (Figure 10) against the handle.

Figure 10

1. Blade control bar

2. Turn the ignition key (Figure 11) or pull the recoil start handle (Figure 12).

Figure 11

Figure 12

Note: If the machine does not start after several attempts, contact an Authorized Service Dealer.

Using the Self-propel Drive

To operate the self-propel drive, squeeze the self-propel drive bar (Figure 13) toward the handle and hold it.

Figure 13

1. Self-propel drive bar

To disengage the self-propel drive, release the self-propel drive bar.

Note: The maximum self-propel ground speed is fixed. To reduce the ground speed, increase the space between the self-propel drive bar and the handle.

Stopping the Engine

Service Interval: Before each use or daily

To stop the engine, release the blade control bar (Figure 14).

Important: When you release the blade control bar, both the engine and blade should stop within 3 seconds. If they do not stop properly, stop using your mower immediately and contact an Authorized Service Dealer.

Figure 14

Mulching the Clippings

The machine comes from the factory ready to mulch the grass and leaf clippings back into the lawn.

If the grass bag is on the machine, remove it before mulching the clippings; refer to Removing the Grass Bag (page 10).

Bagging the Clippings

Use the grass bag when you want to collect grass and leaf clippings from the lawn.

⚠ WARNING

A worn grass bag could allow small stones and other similar debris to be thrown in the operator's or bystanders' direction and result in serious personal injury or death to the operator or bystanders.

Check the grass bag frequently. If it is damaged, install a new Toro replacement bag.

⚠ WARNING

The blade is sharp; contacting the blade can result in serious personal injury.

Stop the engine and wait for all moving parts to stop before leaving the operating position.

Installing the Grass Bag

1. Lift up the rear deflector (Figure 15).

Figure 15

1. Rear deflector

2. Insert the grass bag handle onto the notches on the handle brackets and make sure that it is well seated (Figure 15).

Removing the Grass Bag

1. Lift up the rear deflector (Figure 15).
2. Lift the grass bag handle out from the notches on the handle brackets and remove the bag from the machine.
3. Close the rear deflector.

Discharging the Clippings

Use the rear-discharge deflector for cutting very tall grass.

Installing the Rear-Discharge Deflector

1. If the bag is on the machine, remove it.

2. Lift up the rear deflector and hold it (Figure 16).

Figure 16

3. Insert the tab on the rear-discharge deflector into the right-hand slot in the rear deflector (Figure 17).

Figure 17

4. Insert the rod on the rear-discharge deflector into the notches on the machine (Figure 18).

Figure 18

Removing the Rear-Discharge Deflector

To remove the rear-discharge deflector, reverse the steps above.

Operating Tips

General Mowing Tips

- Clear the area of sticks, stones, wire, branches, and other debris that the blade could hit.

- Avoid striking solid objects with the blade. Never deliberately mow over any object.
- If the machine strikes an object or starts to vibrate, immediately stop the engine, disconnect the wire from the spark plug, and examine the machine for damage.
- For best performance, install a new blade before the cutting season begins.
- Replace the blade when necessary with a Toro replacement blade.

Cutting Grass

- Cut only about a third of the grass blade at a time. Do not cut below the 51 mm (2 inch) setting unless the grass is sparse or it is late fall when grass growth begins to slow down. Refer to Adjusting the Cutting Height.
- When cutting grass over 15 cm (6 inches) tall, mow at the highest cutting height setting and walk slower; then mow again at a lower setting for the best lawn appearance. If the grass is too long, the machine may become clogged and cause the engine to stall.
- Mow only dry grass or leaves. Wet grass and leaves tend to clump on the yard and can cause the mower to become clogged or the engine to stall.

⚠ WARNING

Wet grass or leaves can cause serious injury if you slip and contact the blade. Mow only in dry conditions.

- Alternate the mowing direction. This helps disperse the clippings over the lawn for even fertilization.
- If the finished lawn appearance is unsatisfactory, try one or more of the following:
 - Replace the blade or have it sharpened.
 - Walk at a slower pace while mowing.
 - Raise the cutting height on the machine.
 - Cut the grass more frequently.
 - Overlap cutting swaths instead of cutting a full swath with each pass.
 - Set the cutting height on the front wheels one notch lower than the rear wheels. For example, set the front wheels at 51 mm (2 inches) and the rear wheels at 64 mm (2-1/2 inches).

Cutting Leaves

- After cutting the lawn, ensure that half of the lawn shows through the cut leaf cover. You may need to make more than one pass over the leaves.
- If there are more than 13 cm (5 inches) of leaves on the lawn, set the front cutting height one or two notches higher than the rear cutting height.
- Slow down your mowing speed if the machine does not cut the leaves finely enough.

Maintenance

Note: Determine the left and right sides of the machine from the normal operating position.

Recommended Maintenance Schedule(s)

| Maintenance Service Interval | Maintenance Procedure |
|------------------------------|---|
| After the first 5 hours | <ul style="list-style-type: none">• Change the engine oil. |
| Before each use or daily | <ul style="list-style-type: none">• Check the engine oil level.• Ensure that the engine stops within 3 seconds after releasing the blade control bar.• Clean grass clippings and dirt from under the mower. |
| Every 25 hours | <ul style="list-style-type: none">• Check the air cleaner for dirty, loose, or damaged parts, and clean or replace them if necessary. |
| Every 50 hours | <ul style="list-style-type: none">• Change the engine oil. |
| Every 100 hours | <ul style="list-style-type: none">• Replace the air cleaner element (more frequently when operating the machine in dusty or dirty operating conditions). |
| Before storage | <ul style="list-style-type: none">• Empty the fuel tank before repairs as directed and before annual storage. |
| Yearly | <ul style="list-style-type: none">• Change the engine oil.• Replace the blade or have it sharpened (more frequently if the edge dulls quickly).• Refer to your Engine Operator's Manual for any additional yearly maintenance procedures. |

Important: Refer to your *Engine Operator's Manual* for additional maintenance procedures.

Preparing for Maintenance

1. Stop the engine and wait for all moving parts to stop.
2. Disconnect the spark plug wire from the spark plug (Figure 19) before performing any maintenance procedure.

Figure 19

1. Spark plug wire

3. After performing the maintenance procedure(s), connect the spark plug wire to the spark plug.

Important: Before tipping the mower to change the oil or replace the blade, allow the fuel tank to run dry through normal usage. If you must tip the mower prior to running out of fuel, use a hand fuel pump to remove the fuel. Always tip the mower onto its side with the dipstick down.

⚠ WARNING

Tipping the mower may cause the fuel to leak. Gasoline is flammable, explosive and can cause personal injury.

Run the engine dry or remove the gasoline with a hand pump; never siphon.

Servicing the Air Cleaner

Service Interval: Every 25 hours/Yearly (whichever comes first)—Check the air cleaner for dirty, loose, or damaged parts, and clean or replace them if necessary.

Every 100 hours/Yearly (whichever comes first)—Replace the air cleaner element (more frequently when operating the machine in dusty or dirty operating conditions).

1. Perform the pre-maintenance procedures; refer to Preparing for Maintenance (page 12).
2. Press the button on the air cleaner cover (Figure 20) and open the cover.

Figure 20

1. Air cleaner cover
2. Air cleaner foam element
3. Air cleaner housing
4. Button

3. Replace the air cleaner element.
4. Install the air cleaner cover.

Changing the Engine Oil

Service Interval: After the first 5 hours

Every 50 hours

Yearly

1. Run the engine a few minutes before changing the oil to warm it.

Note: Warm oil flows better and carries more contaminants.

2. Perform the pre-maintenance procedures; refer to Preparing for Maintenance (page 12).
3. Tip the machine onto its side, with the dipstick down.
4. Set an oil-drain pan under the dipstick.
5. Remove the dipstick and drain the used oil into an oil-drain pan (Figure 21).

Figure 21

6. After draining the used oil, return the machine to the normal operating position.
7. **Slowly** pour oil into the oil-fill hole until the oil level reaches the Full line on the dipstick (Figure 22). **Do not overfill.** (Max. fill: 0.59 l (20 oz.), type: 10W-30 or SAE 30 detergent oil with an API service classification of SJ or higher.)

Figure 22

Note: Each time you check the oil level, remove the dipstick and wipe it clean, insert it into the oil filler neck (but **do not** screw it in), then remove it again and check the oil level on the dipstick.

Note: If you overfill the engine, drain some of the oil out of the engine crankcase.

8. Install the dipstick securely.
9. Dispose of the used oil properly at a local recycling center.

Charging the Battery

WARNING

CALIFORNIA Proposition 65 Warning

Battery posts, terminals, and related accessories contain lead and lead compounds, chemicals known to the State of California to cause cancer and reproductive harm.
Wash hands after handling.

Charge the battery for 24 hours initially, then monthly (every 25 starts) or as needed. Always use the charger in a sheltered area and charge the battery at room temperature (22° C or 70° F) whenever possible.

1. Connect the charger to the mower wire harness located below the ignition key (Figure 23).

Figure 23

2. Plug the charger in to a wall outlet.

Note: When the battery no longer holds a charge, recycle or dispose of the lead-acid battery according to local codes.

Replacing the Fuse

Your mower comes with a fuse that protects the electric starter. If the battery does not charge or the engine does not run with the electric starter, the fuse may be blown. Replace it with a 40-amp plug-in type fuse.

Important: You cannot start the mower with the electric starter or charge the battery unless you install the fuse.

1. Unclip both ends of the battery cover and remove it (Figure 24).

Figure 24

2. Insert the fuse into the fuse holder (Figure 25).

Figure 25

3. Install the battery cover.

Replacing the Blade

Service Interval: Yearly

Important: You will need a torque wrench to install the blade properly. If you do not have a torque wrench or are uncomfortable performing this procedure, contact an Authorized Service Dealer.

Examine the blade whenever you run out of gasoline. If the blade is damaged or cracked, replace it immediately. If the blade edge is dull or nicked, have it sharpened or replace it.

⚠ WARNING

The blade is sharp; contacting the blade can result in serious personal injury.

Wear gloves when servicing the blade.

1. Disconnect the spark plug wire from the spark plug. Refer to Preparing for Maintenance.
2. Tip the mower onto its side, with the air filter up.
3. Use a block of wood to hold the blade steady.
4. Remove the blade (turn the blade bolt counterclockwise), saving all the mounting hardware.
5. Install the new blade (turn the blade bolt clockwise) and all mounting hardware (Figure 26).

Figure 26

Important: Position the curved ends of the blade to point toward the mower housing.

6. Use a torque wrench to tighten the blade bolt to 82 N-m (60 ft-lb).

Important: A bolt torqued to 82 N-m (60 ft-lb) is very tight. While holding the blade with a block of wood, put your weight behind the ratchet or wrench and tighten the bolt securely. This bolt is very difficult to overtighten.

Adjusting the Self-propel Drive Cable

Whenever you install a new self-propel cable or if the self-propel drive is out of adjustment, adjust the self-propel drive cable.

1. Loosen the cable support nut (Figure 27).

Figure 27

- | | |
|------------------------------------|----------------------|
| 1. 25 to 38 mm (1 to 1-1/2 inches) | 4. Cable support nut |
| 2. Self-propel drive bar | 5. Cable support |
| 3. Cable jacket | |

2. Hold the self-propel drive bar 25 to 38 mm (1 to 1-1/2 inches) from the handle (Figure 27).
3. Pull down the cable jacket (toward the mower) until there is no slack in the cable (Figure 27).
4. Tighten the nut on the cable support.
5. Release the self-propel drive bar and ensure that the cable is loose.

Note: The cable must be loose with the self-propel drive bar in the released position; otherwise, the mower may creep when the bar is disengaged.

⚠ WARNING

The mower may dislodge material from under the mower housing.

- Wear eye protection.
 - Stay in the operating position (behind the handle).
 - Do not allow bystanders in the area.
1. With the engine running on a flat paved surface, spray a stream of water in front of the **right** rear wheel (Figure 28).

The water will splash into the path of the blade, cleaning out the clippings.

Figure 28

2. When no more clippings come out, stop the water and move the mower to a dry area.
3. Run the engine for a few minutes to dry the housing to prevent it from rusting.

Cleaning the Mower

Service Interval: Before each use or daily

Storage

Store the mower in a cool, clean, dry place.

Preparing the Mower for Storage

⚠ WARNING

Gasoline vapors can explode.

- Do not store gasoline more than 30 days.
- Do not store the mower in an enclosure near an open flame.
- Allow the engine to cool before storing it.

1. On the last refueling of the year, add fuel stabilizer to the fuel as directed by the engine manufacturer.
2. Run the mower until the engine stops from running out of fuel.
3. Prime the engine and start it again.
4. Allow the engine to run until it stops. When you can no longer start the engine, it is sufficiently dry.
5. Disconnect the wire from the spark plug and connect the wire onto the retaining post.
6. Remove the spark plug, add 30 ml (1 oz.) of oil through the spark plug hole, and pull the starter rope **slowly** several times to distribute oil throughout the cylinder to prevent cylinder corrosion during the off-season.
7. Install the spark plug and tighten it with a torque wrench to 20 N-m (15 ft-lb).
8. Tighten all nuts, bolts, and screws.
9. Charge the battery for 24 hours, then unplug the battery charger and store the mower in an unheated area. If you must store the mower in a heated area, you must charge the battery every 90 days.

Folding the Handle

⚠ WARNING

Folding or unfolding the handle improperly can damage the cables, causing an unsafe operating condition.

- Do not damage the cables when folding or unfolding the handle.
- If a cable is damaged, contact an Authorized Service Dealer.

1. Loosen the handle knobs until you can move the handle freely (Figure 29).

Figure 29

1. Handle knob (2)

2. Move the handle forward as shown in Figure 29.

Removing the Mower from Storage

1. Charge the battery for 24 hours.
2. Connect the wire to the spark plug.

Troubleshooting

| Problem | Possible Cause | Corrective Action |
|---|--|---|
| The engine does not start. | <ol style="list-style-type: none"> 1. The wire is not connected to the spark plug. 2. The fuel cap vent hole is plugged. 3. The spark plug is pitted, fouled, or incorrectly gapped . 4. The fuel tank is empty or the fuel system contains stale fuel. | <ol style="list-style-type: none"> 1. Connect the wire to the spark plug. 2. Clean the fuel cap vent hole or replace the fuel cap. 3. Check the spark plug and adjust the gap if necessary. Replace the spark plug if it is pitted, fouled, or cracked. 4. Drain and/or fill the fuel tank with fresh gasoline. If the problem persists, contact an Authorized Service Dealer. |
| The engine starts hard or loses power. | <ol style="list-style-type: none"> 1. The fuel cap vent hole is plugged. 2. The air filter element is dirty and is restricting the air flow. 3. The underside of the machine contains clippings and debris. 4. The spark plug is pitted, fouled, or incorrectly gapped . 5. The engine oil level is too low, too high, or excessively dirty. 6. The fuel tank contains stale fuel. | <ol style="list-style-type: none"> 1. Clean the fuel cap vent hole or replace the fuel cap. 2. Clean the air filter pre-cleaner and/or replace the paper air filter. 3. Clean under the machine. 4. Check the spark plug and adjust the gap if necessary. Replace the spark plug if it is pitted, fouled, or cracked. 5. Check the engine oil. Change the oil if it is dirty; add or drain the oil to adjust the oil level to the Full mark on the dipstick. 6. Drain and fill the fuel tank with fresh gasoline. |
| The engine runs rough. | <ol style="list-style-type: none"> 1. The wire is not connected to the spark plug. 2. The air filter element is dirty and is restricting the air flow. 3. The spark plug is pitted, fouled, or incorrectly gapped . | <ol style="list-style-type: none"> 1. Connect the wire to the spark plug. 2. Clean the air filter pre-cleaner and/or replace the paper air filter. 3. Check the spark plug and adjust the gap if necessary. Replace the spark plug if it is pitted, fouled, or cracked. |
| The machine or engine vibrates excessively. | <ol style="list-style-type: none"> 1. The underside of the machine housing contains clippings and debris. 2. The engine mounting bolts are loose. 3. The blade mounting nuts are loose. 4. The blade is bent or is out of balance. | <ol style="list-style-type: none"> 1. Clean under the machine housing. 2. Tighten the engine mounting bolts. 3. Tighten the blade mounting nuts. 4. Balance the blade. If the blade is bent, replace it. |
| There is an uneven cutting pattern. | <ol style="list-style-type: none"> 1. You are mowing in the same pattern repeatedly. 2. All 4 wheels are not at the same height. 3. The underside of the machine housing contains clippings and debris. 4. The blade is dull. | <ol style="list-style-type: none"> 1. Change the mowing pattern. 2. Place all 4 wheels at the same height. 3. Clean under the machine housing. 4. Sharpen and balance the blade. |
| The machine does not self-propel. | <ol style="list-style-type: none"> 1. There is debris under the belt cover. 2. The self-propel drive cable is out of adjustment or is damaged. | <ol style="list-style-type: none"> 1. Clean the debris from under the belt cover. 2. Adjust the self-propel drive cable. Replace the cable if necessary. |

European Privacy Notice

The Information Toro Collects

Toro Warranty Company (Toro) respects your privacy. In order to process your warranty claim and contact you in the event of a product recall, we ask you to share certain personal information with us, either directly or through your local Toro company or dealer.

The Toro warranty system is hosted on servers located within the United States where privacy law may not provide the same protection as applies in your country.

BY SHARING YOUR PERSONAL INFORMATION WITH US, YOU ARE CONSENTING TO THE PROCESSING OF YOUR PERSONAL INFORMATION AS DESCRIBED IN THIS PRIVACY NOTICE.

The Way Toro Uses Information

Toro may use your personal information to process warranty claims, to contact you in the event of a product recall and for any other purpose which we tell you about. Toro may share your information with Toro's affiliates, dealers or other business partners in connection with any of these activities. We will not sell your personal information to any other company. We reserve the right to disclose personal information in order to comply with applicable laws and with requests by the appropriate authorities, to operate our systems properly or for our own protection or that of other users.

Retention of your Personal Information

We will keep your personal information as long as we need it for the purposes for which it was originally collected or for other legitimate purposes (such as regulatory compliance), or as required by applicable law.

Toro's Commitment to Security of Your Personal Information

We take reasonable precautions in order to protect the security of your personal information. We also take steps to maintain the accuracy and current status of personal information.

Access and Correction of your Personal Information

If you would like to review or correct your personal information, please contact us by email at legal@toro.com.

Australian Consumer Law

Australian customers will find details relating to the Australian Consumer Law either inside the box or at your local Toro Dealer.

The Toro Warranty and The Toro GTS Starting Guarantee

Conditions and Products Covered

The Toro Company and its affiliate, Toro Warranty Company, pursuant to an agreement between them, jointly promise to repair for the original purchaser¹ the Toro Product listed below if defective in materials or workmanship or if the Toro GTS (Guaranteed to Start) engine will not start on the first or second pull, provided the routine maintenance required in the *Operator's Manual* have been performed.

The following time periods apply from the date of purchase:

| Products | Warranty Period |
|--|--|
| Walk Power Mowers | |
| • Cast Deck | 5 years Residential Use ² 90 Days Commercial Use |
| • Engine | 5 years GTS Guarantee, Residential Use ³ |
| • Battery | 2 years |
| • Steel Deck | 2 years Residential Use ² 90 Days Commercial Use |
| • Engine | 2 years GTS Guarantee, Residential Use ³ |
| TimeMaster Mowers | 3 years Residential Use ² 90 Days Commercial Use |
| • Engine | 3 years GTS Guarantee, Residential Use ³ |
| • Battery | 2 years |
| Electric Hand Held Products | 2 years Residential Use ² No Warranty for Commercial Use |
| Snowthrowers | |
| • Single Stage | 2 years Residential Use ² 45 Days Commercial Use |
| • Engine | 2 years GTS Guarantee, Residential Use ³ |
| • Two Stage | 3 years Residential Use ² 45 Days Commercial Use |
| • Chute, chute deflector and impeller housing cover | Lifetime (original owner only) ⁵ |
| Electric Snowthrowers | 2 years Residential Use ² No Warranty for Commercial Use |
| All Ride-On Units Below | |
| • Engine | See engine manufacturer's warranty ⁴ |
| • Battery | 2 years Residential Use ² |
| • Attachments | 2 years Residential Use ² |
| DH Lawn & Garden Tractors | 2 years Residential Use ² 90 Days Commercial Use |
| XLS Lawn & Garden Tractors | 3 years Residential Use ² 90 Days Commercial Use |
| TimeCutter | 3 years Residential Use ² 90 Days Commercial Use |
| TITAN Mowers | 3 years or 240 hours ⁵ |
| • Frame | Lifetime (original owner only) ⁶ |
| Z Master Mowers — 2000 Series | 4 years or 500 hours ⁵ |
| • Frame | Lifetime (original owner only) ⁶ |

¹Original Purchaser means the person who originally purchased the Toro Product.

²Residential use means use of the product on the same lot as your home. Use at more than one location is considered commercial use and the commercial use warranty would apply.

³The Toro GTS Starting Guarantee does not apply when the product is used commercially.

⁴Some engines used on Toro Products are warranted by the engine manufacturer.

⁵Whichever occurs first.

⁶Lifetime Frame Warranty - If the main frame, consisting of the parts welded together to form the tractor structure that other components such as the engine are secured to, cracks or breaks in normal use, it will be repaired or replaced, at Toro's option, under warranty at no cost for parts and labor. Frame failure due to misuse or abuse and failure or repair required due to rust or corrosion are not covered.

This warranty covers the cost of parts and labor, but you must pay transportation costs.

Warranty may be denied if the hour meter is disconnected, altered, or shows signs of being tampered with.

Owner Responsibilities

You must maintain your Toro Product by following the maintenance procedures described in the *Operator's Manual*. Such routine maintenance, whether performed by a dealer or by you, is at your expense.

Instructions for Obtaining Warranty Service

If you think that your Toro Product contains a defect in materials or workmanship, follow this procedure:

1. Contact your seller to arrange service of the product. If for any reason it is impossible for you to contact your seller, you may contact any Toro Authorized Distributor to arrange service. See attached Distributor List.
2. Bring the product and your proof of purchase (sales receipt) to the servicing outlet. If for any reason you are dissatisfied with the servicing outlet's analysis or with the assistance provided, contact us at:

Toro Customer Care Department, RLC Division
Toro Warranty Company
8111 Lyndale Avenue South
Bloomington, MN 55420-1196
001-952-948-4707

Items and Conditions Not Covered

This express warranty does not cover the following:

- Cost of regular maintenance service or wear parts, such as blades, rotor blades (paddles), scraper blades, belts, fuel, lubricants, oil changes, spark plugs, pneumatic tires, cable/linkage or brake adjustments
- Any product or part which has been altered or misused and requires replacement or repair due to accidents or lack of proper maintenance
- Repairs necessary due to failure to use fresh fuel (less than one month old), or failure to properly prepare the unit prior to any period of non-use over one month
- All repairs covered by these warranties must be performed by an authorized Toro servicing outlet using approved replacement parts.

General Conditions

The purchaser is covered by the national laws of each country. The rights to which the purchaser is entitled with the support of these laws are not restricted by this warranty.
