

# 53cm Super Recycler® Lawn Mower

Model No. 20797—Serial No. 313000001 and Up

Form No. 3376-852 Rev A

## Operator's Manual

# Introduction

This rotary-blade, walk-behind lawn mower is intended to be used by residential homeowners. It is designed primarily for cutting grass on well-maintained lawns on residential properties. It is not designed for cutting brush or for agricultural uses.

Read this information carefully to learn how to operate and maintain your machine properly and to avoid injury and equipment damage. You are responsible for operating the machine properly and safely.

You may contact Toro directly at [www.Toro.com](http://www.Toro.com) for product and accessory information, help finding a dealer, or to register your product.

Whenever you need service, genuine Toro parts, or additional information, contact an Authorized Service Dealer or Toro Customer Service and have the model and serial numbers of your machine ready. [Figure 1](#) identifies the location of the model and serial numbers on the product.

Figure 1

1. Model and serial number location

Write the product model and serial numbers in the following space:

Model No. _____
Serial No. _____

This manual identifies potential hazards and has safety messages identified by the safety alert symbol ([Figure 2](#)), which signals a hazard that may cause serious injury or death if you do not follow the recommended precautions.

Figure 2

1. Safety alert symbol

This manual uses 2 words to highlight information. **Important** calls attention to special mechanical information and **Note** emphasizes general information worthy of special attention.

This product complies with all relevant European directives. For details, see the separate product-specific Declaration of Conformity (DOC) sheet.

For models with stated engine horsepower, the gross horsepower of the engine was laboratory rated by the engine manufacturer in accordance with SAE J1940. As configured to meet safety, emission, and operating requirements, the actual engine horsepower on this class of lawn mower will be significantly lower.

Do not tamper with the engine controls or alter the governor speed; doing so may create an unsafe condition resulting in personal injury.

## Safety

**Improperly using or maintaining this mower can result in injury. To reduce the potential for injury, comply with these safety instructions.**

Toro designed and tested this machine for reasonably safe service; however, failure to comply with the following instructions may result in personal injury.

**To ensure maximum safety, best performance, and to gain knowledge of the product, it is essential that you and any other operator of the mower read and understand the contents of this manual before the engine is ever started. Pay particular attention to the safety alert symbol (Figure 2), which means Caution, Warning, or Danger—“personal safety instruction.” Read and understand the instruction because it has to do with safety. Failure to comply with the instruction may result in personal injury.**

## General Lawn Mower Safety

The following instructions have been adapted from EN 836.

This cutting machine is capable of amputating hands and feet and of throwing objects. Failure to observe the following safety instructions could result in serious injury or death.

### Training

- Read the instructions carefully. Be familiar with the controls and the proper use of the equipment.
- Never allow children or people unfamiliar with these instructions to use the mower. Local regulations can restrict the age of the operator.

- Keep in mind that the operator or user is responsible for accidents or hazards occurring to other people or their property.
- Understand explanations for all pictograms used on the mower or in the instructions.

### Gasoline

**WARNING**-Gasoline is highly flammable. Take the following precautions.

- Store fuel in containers specifically designed for this purpose.
- Refuel outdoors only and do not smoke while refueling.
- Add fuel before starting the engine. Never remove the cap of the fuel tank or add gasoline while the engine is running or when the engine is hot.
- If gasoline is spilled, do not attempt to start the engine but move the mower away from the area of spillage and avoid creating any source of ignition until gasoline vapors have dissipated.
- Replace all fuel tank and container caps securely.

### Preparation

- While mowing, always wear substantial footwear and long trousers. Do not operate the equipment when barefoot or wearing open sandals.
- Thoroughly inspect the area where the equipment is to be used and remove all stones, sticks, wires, bones and other foreign objects.
- Before using, always visually inspect to see that guards, and safety devices, such as deflectors and/or grass catchers, are in place and working correctly.
- Before using, always visually inspect to see that the blades, blade bolts and cutter assembly are not worn or damaged. Replace worn or damaged blades and bolts in sets to preserve balance.

### Starting

- Do not tilt the mower when starting the engine unless the mower has to be tilted for starting. In this case, do not tilt it more than absolutely necessary and lift only the part which is away from the operator.
- Start the engine carefully according to instructions and with feet well away from the blade(s) and not in front of the discharge chute.

### Operation

- Never mow while people, especially children, or pets are nearby.
- Mow only in daylight or in good artificial light.
- Stay alert for holes in the terrain and other hidden hazards.
- Do not put hands or feet near or under rotating parts. Keep clear of the discharge opening at all times.

- Never pick up or carry a lawn mower while the engine is running.
- Use extreme caution when reversing or pulling a pedestrian controlled lawn mower towards you.
- Walk, never run.
- Slopes:
  - Do not mow excessively steep slopes.
  - Exercise extreme caution when on slopes.
  - Mow across the face of slopes, never up and down, and exercise extreme caution when changing direction on slopes.
  - Always be sure of your footing on slopes.
- Reduce speed on slopes and in sharp turns to prevent overturning or loss of control.
- Stop the blade if the lawn mower has to be tilted for transportation when crossing surfaces other than grass and when transporting the lawn mower to and from the area to be mowed.
- Do not operate the engine in a confined space where dangerous carbon monoxide fumes can collect.
- Stop the engine
  - whenever you leave the lawn mower.
  - before refueling.
  - before removing the grass catcher.
  - before making height adjustment unless adjustment can be made from the operator's position.
- Stop the engine and disconnect the spark-plug wire
  - before clearing blockages or unclogging chute.
  - before checking, cleaning or working on the lawn mower.
  - after striking a foreign object, inspect the lawn mower for damage and make repairs before restarting and operating the lawn mower.
  - if lawn mower starts to vibrate abnormally (check immediately).
- Lightning can cause severe injury or death. If you see lightning or hear thunder in the area, do not operate the machine; seek shelter.
- Watch out for traffic when crossing or near roadways.
- Allow the engine to cool before storing in any enclosure.
- To reduce the fire hazard, keep the engine, silencer, battery compartment and gasoline storage area free of grass, leaves, or excessive grease.
- Check grass catcher components and the discharge guard frequently and replace with manufacturer's recommended parts, when necessary.
- Replace worn or damaged parts for safety.
- Replace faulty silencers.
- If the fuel tank has to be drained, do this outdoors.
- Do not change the engine governor settings or overspeed the engine. Operating an engine at excessive speed can increase the hazard of personal injury.
- Be careful during adjustment of the lawn mower to prevent entrapment of the fingers between moving blades and fixed parts of the lawn mower.
- **To ensure the best performance and safety, purchase only genuine Toro replacement parts and accessories. Do not use *will fit* parts and accessories; they may cause a safety hazard.**

## Sound Pressure

This unit has a sound pressure level at the operator's ear of 90 dBA, which includes an Uncertainty Value (K) of 1 dBA.

The sound pressure level was determined according to the procedures outlined in EN 836.

## Sound Power

This unit has a guaranteed sound power level of 98 dBA, which includes an Uncertainty Value (K) of 1 dBA.

The sound power level was determined according to the procedures outlined in ISO 11094.

## Hand/Arm Vibration

Measured vibration level for right hand = 4.7 m/s

Measured vibration level for left hand = 3.6 m/s

Uncertainty Value (K) = 2.4 m/s<sup>2</sup>

Measured values were determined according to the procedures outlined in EN 836.

## Maintenance and Storage

- Keep all nuts, bolts, and screws tight to be sure the equipment is in safe working condition.
- Do not use pressure-cleaning equipment on machine.
- Never store the equipment with gasoline in the tank and inside a building where fumes can reach an open flame or spark.

# Safety and Instructional Decals

**Important:** Safety and instruction decals are located near areas of potential danger. Replace damaged decals.

**Manufacturer's Mark**

1. Indicates the blade is identified as a part from the original machine manufacturer.

**104-7908**

1. Warning—do not operate the mower without the rear discharge plug or bag in place; do not operate the mower without the side discharge cover or deflector in place.

**104-7953**

1. Warning—read the *Operator's Manual* for information on charging the battery; contains lead; do not discard.
2. Read the *Operator's Manual*.

**112-8760**

1. Thrown object hazard—keep bystanders a safe distance from the machine.
2. Cutting/dismemberment of hand or foot—stay away from moving parts.

**112-8867**

1. Lock
2. Unlock

114-7982

1. Warning—read the *Operator's Manual*.
2. Thrown object hazard—keep bystanders a safe distance from the machine.
3. Cutting/dismemberment hazard of hand or foot, mower blade—disconnect the spark plug wire and read the instructions before servicing or performing maintenance.
4. Cutting/dismemberment hazard of hand or foot, mower blade—stay away from moving parts.
5. Cutting/dismemberment hazard of hand or foot, mower blade—do not operate up and down slopes; operate side to side on slopes; stop the engine before leaving the operating position; and look behind you when backing up.

115-8411

1. Unlocked
2. Locked

# Setup

**Important:** Remove and discard the protective plastic sheet that covers the engine.

# 1

## Assembling and Unfolding the Handle

### No Parts Required

### Procedure

#### **⚠ WARNING**

Assembling and unfolding the handle improperly can damage the cables, causing an unsafe operating condition.

- Do not damage the cables when assembling and unfolding the handle.
- If a cable is damaged, contact an Authorized Service Dealer.

1. Raise the rear of the machine housing to its highest cutting-height setting by moving the 2 rear cutting-height levers all the way forward. Refer to [Adjusting the Cutting Height](#) (page 9).
2. Attach the handle ends to the machine housing with 2 washers and 2 handle bolts ([Figure 3](#)), but do not tighten the handle bolts.

**Figure 3**

1. Washer
2. Handle bolt
3. Handle end

3. Rotate the handle rearward (Figure 4).

Figure 4

4. Lock the handle at your desired height; refer to [Adjusting the Handle Height \(page 9\)](#).
5. Torque the handle bolts to 120 to 160 in-lb (14 to 17 N-m).
6. Adjust the cutting height; refer to [Adjusting the Cutting Height \(page 9\)](#).

## 2

### Installing the Recoil-starter Rope in the Rope Guide

#### No Parts Required

#### Procedure

**Important:** You must install the recoil-starter rope in the rope guide.

Hold the blade-control bar to the upper handle and pull the recoil-starter rope through the rope guide on the handle (Figure 5).

Figure 5

1. Recoil-starter rope
2. Rope guide

## 3

### Filling the Engine with Oil

#### No Parts Required

#### Procedure

**Important:** This machine does not come with oil in the engine. Before starting the engine, fill the engine with oil.

**Important:** Change the engine oil after the first 5 operating hours; change it yearly thereafter. Refer to [Changing the Engine Oil \(page 16\)](#).

1. Move the machine to a level surface.
2. Remove the dipstick (Figure 6) and pour about 3/4 of the crankcase capacity of oil into the oil-fill tube.

**Note:** Max. fill: 0.59 l (20 oz.), type: SAE 30 detergent oil with an API service classification of SF, SG, SH, SJ, SL, or higher.

Figure 6

3. Wipe off the dipstick end with a clean cloth.
4. Insert the dipstick into the oil-fill tube, and screw it in until it stops.
5. Remove the dipstick and read the oil level on the dipstick; refer to [Figure 6](#).
  - If the oil level is too low, add a small amount of oil slowly to the oil-fill tube, and then repeat steps [3](#) through [5](#) until the oil level is correct as shown in [Figure 6](#).
  - If the oil level is too high, drain the excess oil until you obtain the correct oil level on the dipstick. To drain the excess oil, refer to [Changing the Engine Oil](#) (page 16).

**Important:** If the oil level in the crankcase is too low or too high and you run the engine, you may damage the engine.

6. Install the dipstick securely by hand.

## 4

## Charging the Battery

### No Parts Required

### Procedure

Refer to [Charging the Battery](#) (page 16).

## Product Overview

Figure 7

- |                             |                      |

## Specifications

Model	Weight	Length	Width	Height
20797	42 kg (92 lb)	165 cm (65 in)	56 cm (22 in)	104 cm (41 in)

# Operation

## Filling the Fuel Tank

### **⚠ DANGER**

Gasoline is extremely flammable and explosive. A fire or explosion from gasoline can burn you and others.

- To prevent a static charge from igniting the gasoline, place the container and/or machine directly on the ground before filling, not in a vehicle or on an object.
- Fill the tank outdoors when the engine is cold. Wipe up spills.
- Do not handle gasoline when smoking or around an open flame or sparks.
- Store gasoline in an approved fuel container, out of the reach of children.

**Note:** Fill the fuel tank with fresh unleaded regular gasoline from a major name-brand service station (Figure 9).

**Note:** Use unleaded regular gasoline suitable for automotive use (87 pump octane minimum). Leaded regular gasoline may be used if unleaded regular is not available.

**Important:** Never use methanol, gasoline containing methanol, or gasohol containing more than 10% ethanol because they could damage the fuel system. Do not mix oil with gasoline.

**Important:** To reduce starting problems, add fuel stabilizer to the fuel all season, mixing it with gasoline less than 30 days old.

**Figure 9**

1. 1 cm (1/2 in)

## Checking the Engine Oil Level

**Service Interval:** Before each use or daily

Max. fill: 0.59 l (20 oz.), type: SAE 30 detergent oil with an API service classification of SF, SG, SH, SJ, SL, or higher.

1. Move the machine to a level surface.
2. Remove the dipstick (Figure 10).

**Figure 10**

3. Wipe off the dipstick end with a clean cloth.
4. Insert the dipstick into the oil-fill tube and screw it in until it stops.
5. Remove the dipstick and read the oil level; refer to Figure 10.
  - If the oil level is below the **Add** mark on the dipstick, **slowly** add a small amount of oil to the oil-fill tube, and then repeat steps 3 through 5 until the oil level is at the **Full** mark on the dipstick.
  - If the oil level is above the **Full** mark on the dipstick, drain the excess oil until the oil level is at the **Full** mark on the dipstick. To drain the excess oil, refer to [Changing the Engine Oil](#) (page 16).
6. Install the dipstick securely by hand.

**Important:** If the oil level in the crankcase is too low or too high and you run the engine, you may damage the engine.

## Adjusting the Cutting Height

### ⚠ WARNING

Adjusting the cutting height may bring you into contact with the moving blade, causing serious injury.

- Stop the engine and wait for all moving parts to stop.
- Do not put your fingers under the housing when adjusting the cutting height.

### ⚠ CAUTION

If the engine has been running, the muffler will be hot and can severely burn you. Keep away from the hot muffler.

Adjust the cutting height as desired. Set all 4 wheels to the same height.

**Note:** To raise the machine, move all 4 cutting height levers forward; to lower the machine, move them all rearward (Figure 11).

Figure 11

## Adjusting the Handle Height

You may raise or lower the upper handle to a position comfortable for you.

Rotate the handle lock, move the handle to 1 of 3 positions, and lock the handle into position (Figure 12).

Figure 12

## Starting the Engine

1. Pull the blade-control bar to the handle (Figure 13).

Figure 13

2. Turn the ignition key (Figure 14) or pull the recoil-start handle (Figure 15).

**Note:** When you pull the recoil-start handle, pull it lightly until you feel resistance, then pull it sharply (Figure 15). Allow the rope to return to the handle slowly.

Figure 14

Figure 15

**Note:** If the machine does not start after several attempts, contact an Authorized Service Dealer.

## Using the Self-propel Drive

To operate the self-propel drive, simply walk with your hands on the upper handle and your elbows at your sides, and the machine will automatically keep pace with you (Figure 16).

Figure 16

## Stopping the Engine

**Service Interval:** Before each use or daily—Ensure that the engine stops within 3 seconds after releasing the blade-control bar.

To stop the engine, release the blade-control bar (Figure 17).

**Important:** When you release the blade-control bar, both the engine and blade should stop within 3 seconds. If they do not stop properly, stop using your machine immediately and contact an Authorized Service Dealer.

Figure 17

## Recycling the Clippings

Your machine comes from the factory ready to recycle the grass and leaf clippings back into the lawn.

If the side-discharge chute is on the machine, remove it and lock the side discharge door; refer to [Removing the Side-discharge Chute \(page 13\)](#) before recycling the clippings.

**Important:** Ensure that the rear-discharge plug is locked in place. To lock the plug: Raise the rear-discharge deflector (Figure 18), firmly push the plug in until it snaps into place behind the tabs, and rotate the lever on the plug to the left (Figure 19).

Figure 18

1. Rear-discharge deflector
2. Rear-discharge plug

**Figure 19**

1. Lever

2. Tabs

**Note:** To unlock the plug, rotate the lever on the plug to the right (Figure 19).

## Bagging the Clippings

Use the grass bag when you want to collect grass and leaf clippings from the lawn.

### **⚠ WARNING**

A worn grass bag could allow debris to be thrown and result in serious personal injury or death to the operator or bystanders.

Check the grass bag frequently. If it is damaged, install a new Toro replacement bag.

If the side-discharge chute is on the machine, remove it and lock the side-discharge door; refer to [Removing the Side-discharge Chute](#) (page 13) before bagging the clippings.

### **⚠ WARNING**

The blade is sharp; contacting the blade can result in serious personal injury.

Stop the engine and wait for all moving parts to stop before leaving the operating position.

## Installing the Grass Bag

1. Route the starter rope around the lower-rope guide (Figure 20).

**Figure 20**

1. Lower-rope guide

**Note:** The lower-rope guide releases the starter rope when you pull the recoil-start handle.

2. Raise and hold up the rear-discharge deflector (Figure 21).

**Figure 21**

1. Rear-discharge deflector
2. Rear-discharge plug

3. Pull out the rear-discharge plug (Figure 21).
4. Hang the upper front edge of the bag on the notches (Figure 22).

**Figure 22**

1. Rear-discharge deflector
2. Grass bag

5. Lower the rear-discharge deflector.

## Removing the Grass Bag

1. Route the starter rope around the lower-rope guide (Figure 23).

**Figure 23**

1. Lower-rope guide

**Note:** The lower-rope guide releases the starter rope when you pull the recoil-start handle.

2. Raise and hold up the rear-discharge deflector.
3. Lift the grass bag up by the handle off the notches.
4. Install the rear-discharge plug (Figure 23).

**Figure 24**

1. Rear-discharge deflector
2. Rear-discharge plug

**Important:** Ensure that the rear-discharge plug is locked in place. To lock the plug, firmly push the plug in until it snaps into place behind the tabs, and rotate the lever on the plug to the left (Figure 25).

**Figure 25**

1. Lever
2. Tabs

**Note:** To unlock the plug, rotate the lever on the plug to the right (Figure 25).

5. Lower the rear-discharge deflector.

## Side-discharging the Clippings

Use the side discharge for cutting very tall grass.

If the bag is on the machine, remove it and insert the rear-discharge plug; refer to [Removing the Grass Bag](#) (page 12) before side-discharging the clippings.

**Important:** Ensure that the rear-discharge plug is locked in place. To lock the plug: Raise the rear-discharge deflector (Figure 26), firmly push the plug in until it snaps into place behind the tabs, and rotate the lever on the plug to the left (Figure 25).

Figure 26

1. Discharge deflector
2. Rear-discharge plug

**Note:** To unlock the plug, rotate the lever on the plug to the right (Figure 25).

### ⚠ WARNING

The blade is sharp; contacting the blade can result in serious personal injury.

Stop the engine and wait for all moving parts to stop before leaving the operating position.

## Installing the Side-discharge Chute

1. Unlock the side-discharge door (Figure 27).

Figure 27

2. Lift open the side-discharge door (Figure 28).

Figure 28

3. Install the side-discharge chute and close the door onto the chute (Figure 29).

Figure 29

## Removing the Side-discharge Chute

To remove the side discharge chute, reverse the steps above.

**Important:** Lock the side-discharge door after you close it (Figure 30).

Figure 30

# Operating Tips

## General Mowing Tips

- Clear the area of sticks, stones, wire, branches, and other debris that the blade could hit.
- Avoid striking solid objects with the blade. Never deliberately mow over any object.
- If the machine strikes an object or starts to vibrate, immediately stop the engine, disconnect the wire from the spark plug, and examine the machine for damage.
- For best performance, install a new blade before the cutting season begins.
- Replace the blade when necessary with a Toro replacement blade.
- If there are more than 13 cm (5 in) of leaves on the lawn, set the front cutting height 1 or 2 notches higher than the rear cutting height.
- Slow down your mowing speed if the machine does not cut the leaves finely enough.

## Cutting Grass

- Cut only about a third of the grass blade at a time. Do not cut below the 51 mm (2 in) setting unless the grass is sparse or it is late fall when grass growth begins to slow down. Refer to [Adjusting the Cutting Height \(page 9\)](#).
- When cutting grass over 15 cm (6 in) tall, mow at the highest cutting-height setting and walk slower; then mow again at a lower setting for the best lawn appearance. If the grass is too long, the machine may plug and cause the engine to stall.
- Mow only dry grass or leaves. Wet grass and leaves tend to clump on the yard and can cause the machine to plug or the engine to stall.

### **WARNING**

**Wet grass or leaves can cause serious injury if you slip and contact the blade. Mow only in dry conditions.**

- Alternate the mowing direction. This helps disperse the clippings over the lawn for even fertilization.
- If the finished lawn appearance is unsatisfactory, try one or more of the following:
  - Replace the blade or have it sharpened.
  - Walk at a slower pace while mowing.
  - Raise the cutting height on your machine.
  - Cut the grass more frequently.
  - Overlap cutting swaths instead of cutting a full swath with each pass.
  - Set the cutting height on the front wheels 1 notch lower than the rear wheels. For example, set the front wheels at 51 mm (2 in) and the rear wheels at 64 mm (2-1/2 in).

## Cutting Leaves

- After cutting the lawn, ensure that half of the lawn shows through the cut leaf cover. You may need to make more than a single pass over the leaves.

# Maintenance

**Note:** Determine the left and right sides of the machine from the normal operating position.

## Recommended Maintenance Schedule(s)

Maintenance Service Interval	Maintenance Procedure
After the first 5 hours	<ul style="list-style-type: none"><li>• Change the engine oil.</li></ul>
Before each use or daily	<ul style="list-style-type: none"><li>• Check the engine oil level.</li><li>• Ensure that the engine stops within 3 seconds after releasing the blade-control bar.</li></ul>
Every 25 hours	<ul style="list-style-type: none"><li>• Charge the battery.</li><li>• Replace the blade or have it sharpened (more frequently if the edge dulls quickly).</li></ul>
Every 50 hours	<ul style="list-style-type: none"><li>• Change the engine oil; change it more frequently in dusty operating conditions.</li></ul>
Before storage	<ul style="list-style-type: none"><li>• Charge the battery.</li></ul>
Yearly	<ul style="list-style-type: none"><li>• Replace the air filter yearly; replace it more frequently in dusty operating conditions.</li><li>• Lubricate the wheel gears.</li></ul>

**Important:** Refer to your Engine Operator's Manual for additional maintenance procedures.

## Preparing for Maintenance

1. Stop the engine and wait for all moving parts to stop.
2. Disconnect the spark-plug wire from the spark plug ([Figure 31](#)) before performing any maintenance procedure.

**Figure 31**

3. After performing the maintenance procedure(s), connect the spark-plug wire to the spark plug.

**Important:** Before tipping the machine to change the oil or replace the blade, allow the fuel tank to run dry through normal usage. If you must tip the machine prior to running out of fuel, use a hand fuel pump to remove the fuel. Always tip the machine onto its side with the dipstick down.

### **⚠ WARNING**

Tipping the machine may cause the fuel to leak. Gasoline is flammable, explosive and can cause personal injury.

Run the engine dry or remove the gasoline with a hand pump; never siphon.

## Replacing the Air Filter

**Service Interval:** Yearly

1. Perform the pre-maintenance procedures; refer to [Preparing for Maintenance](#) (page 15).
2. Use a screw driver to open the air-filter cover ([Figure 32](#)).

**Figure 32**

3. Replace the air filter ([Figure 33](#)).

**Figure 33**

4. Install the air-filter cover.

# Changing the Engine Oil

**Service Interval:** After the first 5 hours

Every 50 hours

**Note:** Max. fill: 0.59 l (20 oz), type: SAE 30 detergent oil with an API service classification of SF, SG, SH, SJ, SL, or higher.

1. Move the machine to a level surface.
2. Ensure that the fuel tank contains little or no fuel so that fuel does not leak out when you tip the machine onto its side.
3. Run the engine a few minutes before changing the oil to warm it.

**Note:** Warm oil flows better and carries more contaminants.

4. Disconnect the wire from the spark plug; refer to [Preparing for Maintenance \(page 15\)](#).
5. Set an oil-drain pan beside the machine on the side of the dipstick.
6. Remove the dipstick from the oil-fill tube ([Figure 34](#)).

**Figure 34**

7. Tip the machine onto its side, with the oil-fill tube down, to drain the used oil out through the oil-fill tube into the oil-drain pan ([Figure 35](#)).

**Figure 35**

8. After draining the used oil, return the machine to the operating position.
9. Pour about 3/4 of the crankcase capacity of oil into the oil-fill tube.

**Note:** Max. fill: 0.59 l (20 oz), type: SAE 30 detergent oil with an API service classification of SF, SG, SH, SJ, SL, or higher.

10. Wipe off the dipstick end with a clean cloth.
11. Insert the dipstick into the oil-fill tube and screw it in until it stops.
12. Remove the dipstick and read the oil level; refer to [Figure 36](#).

**Figure 36**

- If the oil level is below the **Add** mark on the dipstick, **slowly** add a small amount of oil to the oil-fill tube, and then repeat steps 10 through 12 until the oil level is at the **Full** mark on the dipstick.
- If the oil level is above the **Full** mark on the dipstick, drain the excess oil until the oil level is at the **Full** mark on the dipstick.

**Important:** If the oil level in the crankcase is too low or too high and you run the engine, you may damage the engine.

13. Install the dipstick securely.
14. Recycle the used oil at a local recycling center.

## Charging the Battery

**Service Interval:** Every 25 hours

Before storage

Charge the battery for 24 hours initially, then monthly (every 25 starts) or as needed. Always use the charger in a sheltered area and charge the battery at room temperature (22°C or 70°F) whenever possible.

1. Connect the charger to the machine wire harness located below the ignition key ([Figure 37](#)).

Figure 37

2. Plug the charger into a wall outlet.

**Note:** When the battery no longer holds a charge, recycle or dispose of the lead-acid battery according to local codes.

**Note:** Your battery charger may have a 2-color LED display that indicates the following states of charging:

- A red light indicates that the charger is charging the battery.
- A green light indicates that the charger is fully charged or the charger is disconnected from the battery.
- A flashing light that alternates between red and green indicates that the battery is nearly fully charged. This state lasts only a few minutes until the battery is fully charged.

## Replacing the Fuse

If the battery does not charge or the engine does not turn with the electric starter, the fuse may be blown. Replace it with a 40-amp plug-in type fuse.

**Important:** You cannot start the machine with the electric starter or charge the battery unless you install the fuse.

1. Unclip both ends of the battery cover and remove it (Figure 38).

Figure 38

2. Replace the fuse in the fuse holder (Figure 39).

Figure 39

**Note:** Your machine comes with a spare fuse in the battery compartment.

3. Install the battery cover.

## Lubricating the Wheel Gears

**Service Interval:** Yearly

1. Wipe the grease fittings just inside the rear wheels with a clean rag (Figure 40).

Figure 40

2. Install a grease gun onto each fitting and gently apply 2 or 3 pumps of #2 multi-purpose, lithium-base grease.

## Replacing the Blade

**Service Interval:** Every 25 hours

**Important:** You will need a torque wrench to install the blade properly. If you do not have a torque wrench or are uncomfortable performing this procedure, contact an Authorized Service Dealer.

Examine the blade whenever you run out of gasoline. If the blade is damaged or cracked, replace it immediately. If the blade edge is dull or nicked, have it sharpened or replace it.

1. Disconnect the spark-plug wire from the spark plug; refer to [Preparing for Maintenance](#) (page 15).
2. Tip the machine onto the side with the dipstick down.
3. Use a block of wood to hold the blade steady (Figure 41).

**Figure 41**

4. Remove the blade, saving all mounting hardware.
5. Install the new blade and all mounting hardware.

**Important:** Position the curved ends of the blade to point toward the machine housing.

6. Use a torque wrench to tighten the blade bolt to 82 N-m (60 ft-lb).

**Important:** A bolt torqued to 82 N-m (60 ft-lb) is very tight. While holding the blade with a block of wood, put your weight behind the ratchet or wrench and tighten the bolt securely. This bolt is very difficult to overtighten.

## Storage

### Preparing the Machine for Storage

#### **⚠ WARNING**

Gasoline vapors can explode.

- Do not store gasoline more than 30 days.
  - Do not store the machine in an enclosure near an open flame.
  - Allow the engine to cool before storing it.
1. On the last refueling of the year, add fuel stabilizer to the fuel as directed by the engine manufacturer.
  2. Run the machine until the engine stops from running out of fuel.
  3. Allow the engine to run until it stops. When you can no longer start the engine, it is sufficiently dry.
  4. Disconnect the wire from the spark plug.
  5. Remove the spark plug, add 30 ml (1 oz) of oil through the spark plug hole, and pull the starter rope slowly several times to distribute oil throughout the cylinder to prevent cylinder corrosion during the off-season.
  6. Loosely install the spark plug.
  7. Tighten all nuts, bolts, and screws.
  8. Charge the battery for 24 hours, then unplug the battery charger and store the machine in an unheated area. If you must store the machine in a heated area, you must charge the battery every 90 days.

### Folding the Handle

#### **⚠ WARNING**

Folding or unfolding the handle improperly can damage the cables, causing an unsafe operating condition.

- Do not damage the cables when folding or unfolding the handle.
- If a cable is damaged, contact an Authorized Service Dealer.

1. Rotate the handle forward (Figure 42).

**Important:** Route the cables to the outside of the handle knobs as you fold the upper handle.

**Figure 42**

2. To unfold the handle, refer to [1 Assembling and Unfolding the Handle \(page 5\)](#).

## Removing the Machine from Storage

1. Charge the battery; refer to [Charging the Battery \(page 16\)](#).
2. Check and tighten all fasteners.
3. Remove the spark plug and spin the engine rapidly using the starter to blow the excess oil from the cylinder.
4. Install the spark plug and tighten it with a torque wrench to 20 N-m (15 ft-lb).
5. Perform any needed maintenance procedures; refer to [Preparing for Maintenance \(page 15\)](#).
6. Check the engine oil level; refer to [Checking the Engine Oil Level \(page 8\)](#).
7. Fuel the fuel tank with fresh gasoline; refer to [Filling the Fuel Tank \(page 8\)](#).
8. Connect the wire to the spark plug.

**Notes:**

**Notes:**

**Notes:**

### European Privacy Notice

The Information Toro Collects

Toro Warranty Company (Toro) respects your privacy. In order to process your warranty claim and contact you in the event of a product recall, we ask you to share certain personal information with us, either directly or through your local Toro company or dealer.

The Toro warranty system is hosted on servers located within the United States where privacy law may not provide the same protection as applies in your country.

BY SHARING YOUR PERSONAL INFORMATION WITH US, YOU ARE CONSENTING TO THE PROCESSING OF YOUR PERSONAL INFORMATION AS DESCRIBED IN THIS PRIVACY NOTICE.

The Way Toro Uses Information

Toro may use your personal information to process warranty claims, to contact you in the event of a product recall and for any other purpose which we tell you about. Toro may share your information with Toro's affiliates, dealers or other business partners in connection with any of these activities. We will not sell your personal information to any other company. We reserve the right to disclose personal information in order to comply with applicable laws and with requests by the appropriate authorities, to operate our systems properly or for our own protection or that of other users.

Retention of your Personal Information

We will keep your personal information as long as we need it for the purposes for which it was originally collected or for other legitimate purposes (such as regulatory compliance), or as required by applicable law.

Toro's Commitment to Security of Your Personal Information

We take reasonable precautions in order to protect the security of your personal information. We also take steps to maintain the accuracy and current status of personal information.

Access and Correction of your Personal Information

If you would like to review or correct your personal information, please contact us by email at [legal@toro.com](mailto:legal@toro.com).

### Australian Consumer Law

Australian customers will find details relating to the Australian Consumer Law either inside the box or at your local Toro Dealer.

# The Toro Warranty and The Toro GTS Starting Guarantee

## Conditions and Products Covered

The Toro Company and its affiliate, Toro Warranty Company, pursuant to an agreement between them, jointly promise to repair for the original purchaser<sup>1</sup> the Toro Product listed below if defective in materials or workmanship or if the Toro GTS (Guaranteed to Start) engine will not start on the first or second pull, provided the routine maintenance required in the *Operator's Manual* have been performed.

The following time periods apply from the date of purchase:

Products	Warranty Period
Walk Power Mowers	
• Cast Deck	5 years Residential Use <sup>2</sup> 90 Days Commercial Use
• Engine	5 years GTS Guarantee, Residential Use <sup>3</sup>
• Battery	2 years
• Steel Deck	2 years Residential Use <sup>2</sup> 90 Days Commercial Use
• Engine	2 years GTS Guarantee, Residential Use <sup>3</sup>
TimeMaster Mowers	3 years Residential Use <sup>2</sup> 90 Days Commercial Use
• Engine	3 years GTS Guarantee, Residential Use <sup>3</sup>
• Battery	2 years
Electric Hand Held Products	2 years Residential Use <sup>2</sup> No Warranty for Commercial Use
Snowthrowers	
• Single Stage	2 years Residential Use <sup>2</sup> 45 Days Commercial Use
• Engine	2 years GTS Guarantee, Residential Use <sup>3</sup>
• Two Stage	3 years Residential Use <sup>2</sup> 45 Days Commercial Use
• Chute, chute deflector and impeller housing cover	Lifetime (original owner only) <sup>5</sup>
Electric Snowthrowers	2 years Residential Use <sup>2</sup> No Warranty for Commercial Use
All Ride-On Units Below	
• Engine	See engine manufacturer's warranty <sup>4</sup>
• Battery	2 years Residential Use <sup>2</sup>
• Attachments	2 years Residential Use <sup>2</sup>
DH Lawn & Garden Tractors	2 years Residential Use <sup>2</sup> 90 Days Commercial Use
XLS Lawn & Garden Tractors	3 years Residential Use <sup>2</sup> 90 Days Commercial Use
TimeCutter	3 years Residential Use <sup>2</sup> 90 Days Commercial Use
TITAN Mowers	3 years or 240 hours <sup>5</sup>
• Frame	Lifetime (original owner only) <sup>6</sup>
Z Master Mowers — 2000 Series	4 years or 500 hours <sup>5</sup>
• Frame	Lifetime (original owner only) <sup>6</sup>

<sup>1</sup>Original Purchaser means the person who originally purchased the Toro Product.

<sup>2</sup>Residential use means use of the product on the same lot as your home. Use at more than one location is considered commercial use and the commercial use warranty would apply.

<sup>3</sup>The Toro GTS Starting Guarantee does not apply when the product is used commercially.

<sup>4</sup>Some engines used on Toro Products are warranted by the engine manufacturer.

<sup>5</sup>Whichever occurs first.

<sup>6</sup>Lifetime Frame Warranty - If the main frame, consisting of the parts welded together to form the tractor structure that other components such as the engine are secured to, cracks or breaks in normal use, it will be repaired or replaced, at Toro's option, under warranty at no cost for parts and labor. Frame failure due to misuse or abuse and failure or repair required due to rust or corrosion are not covered.

This warranty covers the cost of parts and labor, but you must pay transportation costs.

Warranty may be denied if the hour meter is disconnected, altered, or shows signs of being tampered with.

## Owner Responsibilities

You must maintain your Toro Product by following the maintenance procedures described in the *Operator's Manual*. Such routine maintenance, whether performed by a dealer or by you, is at your expense.

## Instructions for Obtaining Warranty Service

If you think that your Toro Product contains a defect in materials or workmanship, follow this procedure:

1. Contact your seller to arrange service of the product. If for any reason it is impossible for you to contact your seller, you may contact any Toro Authorized Distributor to arrange service. See attached Distributor List.
2. Bring the product and your proof of purchase (sales receipt) to the servicing outlet. If for any reason you are dissatisfied with the servicing outlet's analysis or with the assistance provided, contact us at:

Toro Customer Care Department, RLC Division  
Toro Warranty Company  
8111 Lyndale Avenue South  
Bloomington, MN 55420-1196  
001-952-948-4707

## Items and Conditions Not Covered

This express warranty does not cover the following:

- Cost of regular maintenance service or wear parts, such as blades, rotor blades (paddles), scraper blades, belts, fuel, lubricants, oil changes, spark plugs, pneumatic tires, cable/linkage or brake adjustments
- Any product or part which has been altered or misused and requires replacement or repair due to accidents or lack of proper maintenance
- Repairs necessary due to failure to use fresh fuel (less than one month old), or failure to properly prepare the unit prior to any period of non-use over one month
- All repairs covered by these warranties must be performed by an authorized Toro servicing outlet using approved replacement parts.

## General Conditions

The purchaser is covered by the national laws of each country. The rights to which the purchaser is entitled with the support of these laws are not restricted by this warranty.
