FORM NO. 3311-281

TORO®

MODEL NO. 29-9750

ASSEMBLY INSTRUCTIONS

GIANT BAGGING KIT

FOR 19" (0.483m) & 21" (0.533m) WHIRLWIND II, WHIRLWIND II DELUXE, TORO DELUXE

FITS THE FOLLOWING MODEL WHIRLWIND II, WHIRLWIND II DELUXE, TORO DELUXE:

16009 16067 16113 16155 16277 16287 16300 16310 16320 21658 21738

BAGGER INSTALLATION

WARNING
Do not operate mower without the grass deflector or entire grass catcher in place.

PARTS LIST

Part No.	Description	No. Used
22-4820	Hanger Rod	1
29-7000	Bag Hanger Tube	1
29-9860	Giant Bag	1
3-2781	Bag Cord Fastener	1
2410-29	Cap	1

CAUTION
Stop engine before installing bag.

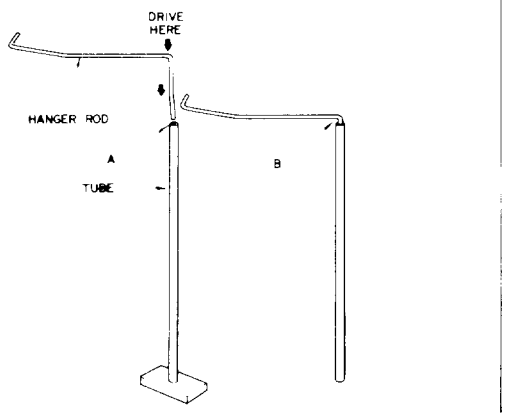

Fig. 1

Remove the hanger rod (22-4820) and tube (29-7000) from kit box. Insert the rod in the tube (A) and, with the tube resting on a wooden block, drive the two parts together as far as shown at point "B". File off any burrs which may be caused by this operation.

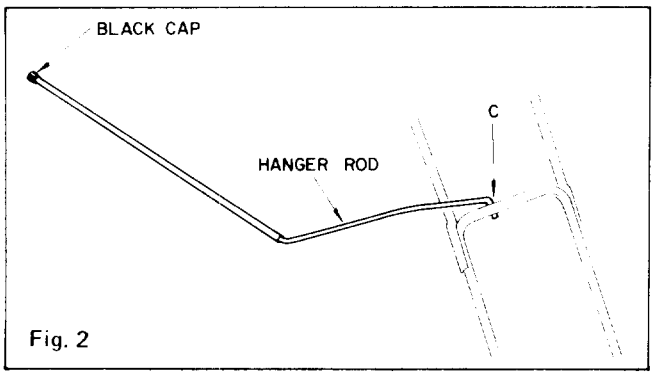

Fig. 2

Insert the assembled hanger rod end into the hole at the center of the lower handle (C), see Fig. 2. Insert black cap (2410-29) over end of tube.

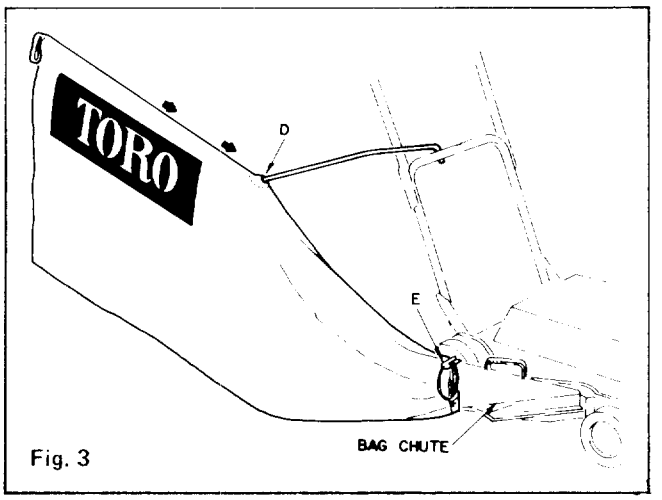

Fig. 3

Thread the bag (29-9860) onto the hanger rod by inserting the tube through the reinforced hole in the bag and drawing it on (D). Pull the opened end of the bag over bag chute and draw the cord. Secure the cord with the metal fastener (3-2781) (E). If the bag on your machine rides low, a slight rebending on the rod, by hand, will correct this.

Whirlwind units are sold without facilities for bagging. It will be necessary to obtain a bag attachment chute (33-2070) to permit this kit to be used on Whirlwind units. If Whirlwind grass bag kit with chute has been obtained previously it is not necessary to obtain bagging chute.
