Addendum

## Dealers, give this addendum to the customer.

Keep this addendum with the Operator's Manual for your machine.

**Important:** If you are using this machine above 1500 m (5,000 ft), ensure that the High Altitude Kit has been installed so that the engine meets CARB/EPA emission regulations. The High Altitude Kit also increases engine performance while preventing spark fouling and hard starting. Place a high-altitude label on the machine when it is converted.

Convert the engine back to regular altitude use when running the engine under 1500 m (5,000 ft). Do not operate an engine that has been converted for high-altitude use at lower altitudes; otherwise, you could overheat and damage the engine.

If you are unsure whether or not your machine has been converted for high altitude use, look for the following label (Figure 1).

127-9363

NOTE: THE ENGINE ON THIS PRODUCT HAS BEEN MODIFIED FOR USE AT ABOVE 5,000 FEET ELEVATION. IF USING BELOW 5,000 FEET, IT MUST BE REVISED BACK TO ORIGINAL SPECIFICATIONS.
