EQUIPMENT AND IRRIGATION SOLUTIONS

Always **solving.**
Always **evolving.**

At Toro®, innovation isn't just about big ideas. It's about listening and helping you solve your most important challenges. Behind every patent is a drive to keep you ahead of the game, with future-ready products that make your job easier. From advanced irrigation systems to all-electric equipment, no other brand has a more complete line-up, or a stronger network to support you for the life of your fleet.

Connected product

The precision that you expect.

With the support you can trust.

Go boldly into the future with Toro®'s new suite of GeoLink Solutions® autonomous golf maintenance equipment. Go for precision control and repeatable results. Go for solutions engineered for golf and backed by over 100 years of innovation. Go autonomous with Toro.

NEW

Greensmaster® eTriFlex 3360 with GeoLink® mow

Transform your course maintenance with Toro®'s Greensmaster eTriFlex 3360 with the GeoLink mow autonomous fairway mower, the only autonomous fairway mower backed by over a century of golf expertise. Built for precision, efficiency and flexibility, it delivers superior results with GeoLink Mow technology: perfect for custom striping patterns and repeatable clean-up passes. Boost productivity by freeing up labour for high-value tasks while one supervisor manages one or more units from a phone, tablet or computer. Its hybrid electric design ensures seamless operation, from mapping fairway-to-fairway transport to manual use via an onboard seat. With Toro's trusted reliability and advanced sensors, this mower helps you keep your course in top condition.

NEW

Turf Pro® and Range Pro®

Intelligent productivity.

From performance and cost savings to more time to focus on the bottom line, the Toro Turf Pro and Range Pro put innovation and efficiency at your command. With GNSS RTK technology, the Turf Pro navigates with precision, enabling it to mow a consistent pattern with minimal overlap. The Range Pro 100 autonomous golf ball picking robot enables you to give your staff other tasks, to extend your opening hours and even to lose fewer balls. The mobile app allows you to remotely control your robot or fleet of robots. Start or stop your machines at any time from anywhere, receive alerts, create schedules and automate certain processes.

Turf Pro 500/300

Range Pro 100

Turn valuable data into *actionable insights.*

With advanced irrigation systems, equipment, sensors and more, golf course maintenance has become increasingly complex. Our digital solutions help you harness the power of technology to save time and make your job easier.

USING THE POWER OF DATA HAS NEVER BEEN EASIER.

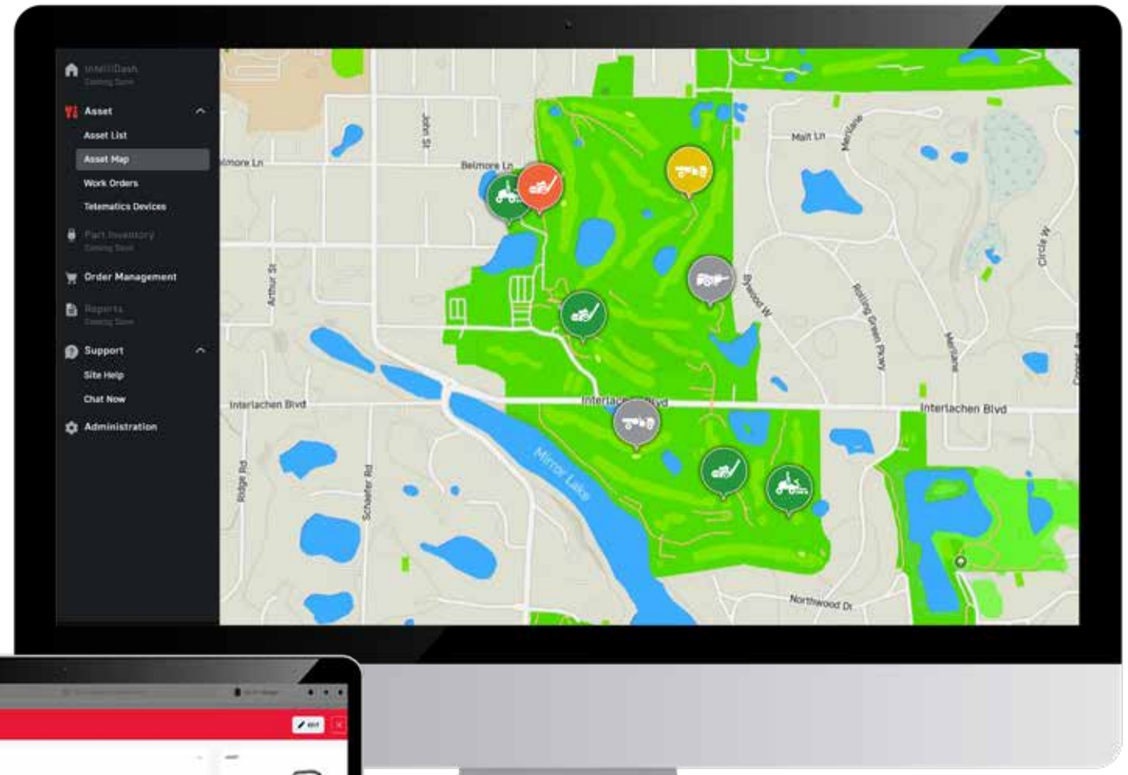

From your staff and your fleet to the conditions on your course, you have a lot to keep track of. Toro® Intelli360® makes it easier to monitor where your equipment is located, the maintenance it needs and how it's being utilised so that you can plan proactively. This digital toolbox is accessible from anywhere, on any web-enabled device.

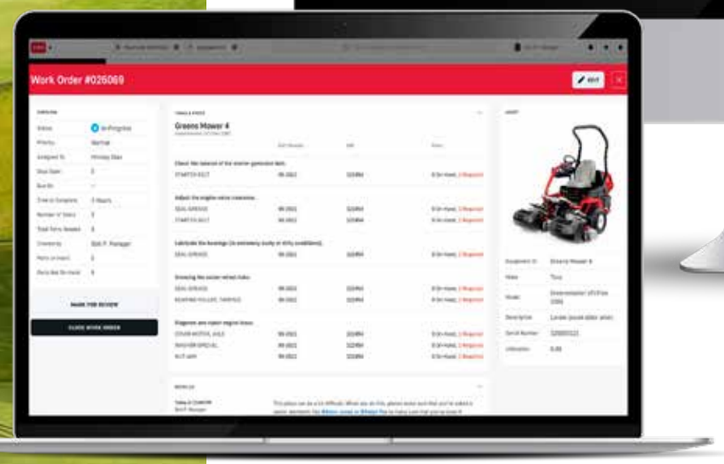

NEW

TORO® Intelli360™

With Intelli360, you can:

- Locate and track your equipment
- Minimise downtime
- Schedule efficiently
- Manage inventory
- Plus, many more enhancements are coming soon.

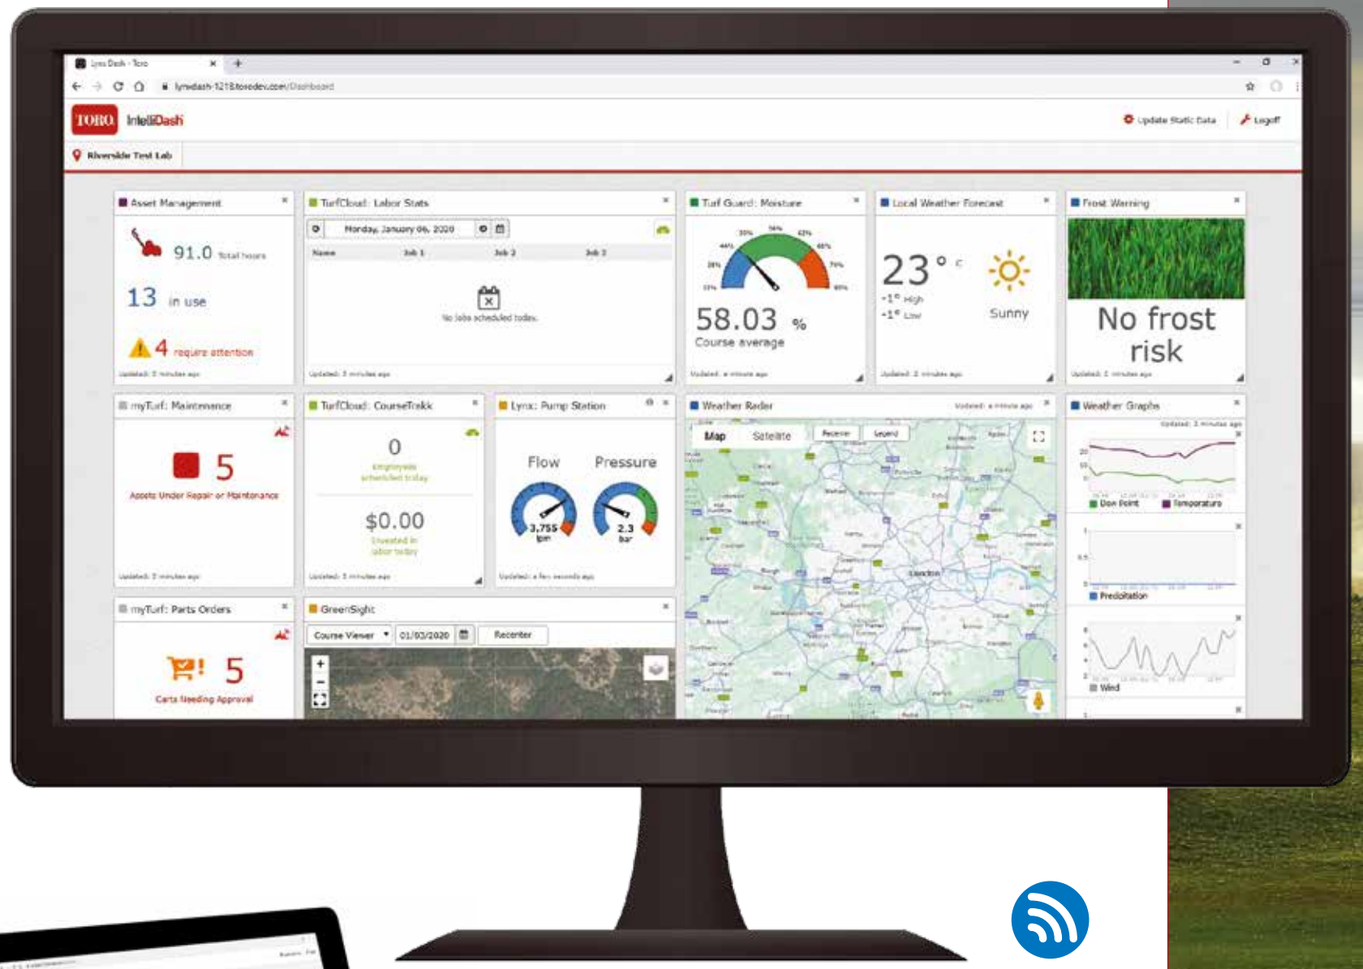

toro.com/intelli360

DIGITAL SOLUTIONS

IntelliDash®
Cloud-based course management

IntelliDash brings all your course intelligence into one streamlined dashboard. Select relevant data widgets that you use in your daily operations to keep a top-level view of what's important without hunting for the information. Turn data sources on and off and arrange the data widgets any way that you like to customise your view.

INFORMATION YOU WANT, PRESENTED HOW YOU WANT IT.

Choose from all kinds of data sources, including weather and radar streams, evapotranspiration forecasts, irrigation information from Lynx® and fleet management tools. You can also bring in labour and job assignment data from taskTracker, chemical and fertiliser tracking from Playbooks and information from other third-party applications that partner with Toro®.

Operators and greens vary.
Consistency is key.

Every green is different. So is every member of your crew. You need mowers that get the same results from any operator, on any surface. Greensmaster walk-behind mowers adjust for the variables, so that you can deliver the same precise cut from the first green to the last.

GREENSMASTER®
WALK GREENS MOWERS

Greensmaster fixed series
Petrol-engine and lithium-ion battery-powered models designed for industry-leading quality of cut. Available in sizes from 45.7 to 66 cm (18" to 26") for greens, tees and more.

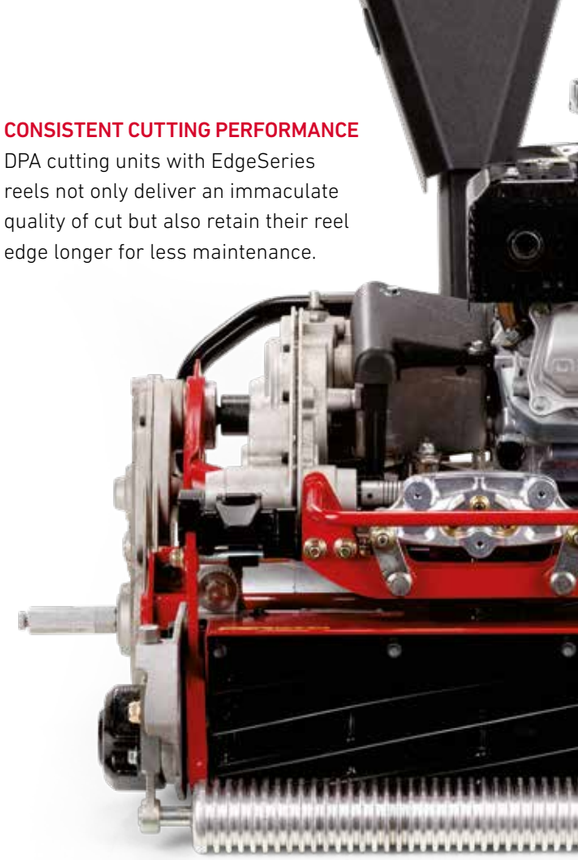

Greensmaster Flex series
Lithium-ion battery-powered models with all the features of the petrol-engine models, plus ultra-quiet operation and zero engine exhaust emissions.

TRANSPORT YOUR WALK MOWER SECURELY
Greensmaster TransPro trailers are designed to reduce loading time and protect your investment.

CONSISTENT CUTTING PERFORMANCE
DPA cutting units with EdgeSeries reels not only deliver an immaculate quality of cut but also retain their reel edge longer for less maintenance.

POWERFUL LITHIUM-ION BATTERY TECHNOLOGY
Mow up to 4,088 m^2 (44,000 ft^2) on a single charge with e1021 models.

DESIGNED TO WORK LIKE A PART OF YOUR TEAM.

The more challenging the contours of a green, the more challenging it is to maintain. Greensmaster Flex walk mowers work in harmony with operators to help you ensure a consistent cut from green to green.

CUSTOMISED COMFORT

Greensmaster walk mowers have a telescoping handle that adjusts in seconds to a comfortable position for operators. The result is improved mower control and less operator fatigue.

UNMATCHED CUT CONSISTENCY

Rubber mounts isolate handle motion, so cutting units maintain constant contact with the turf, regardless of any differences in the operator's stride or handle pressure. And with patented Flex suspension, cutting units hug every contour while preventing side-to-side scrubbing on the putting surface.

TIME-SAVING CONVENIENCE

Operators can slow down or stop in tight turns with the integrated operation bail. Quickly convert from a greens mower to a tee mower with a unique swing-axle design, keeping a consistent bedknife angle and quality of cut regardless of the surface or height of cut. Plus, tool-free cutting unit removal reduces service time when maintenance is required.

ON-BOARD BACKLAPPING OPTION

The Greensmaster 1021 and 1026 can be backlapped simultaneously without additional motors or bench tools.*

**Selected features not available on all models. Check specifications for details.*

Your greens speak volumes. *Make a statement.*

Golfers often judge a course by the quality of the greens. Greensmaster riding greens mowers help you to make that impression count. These models combine the precision of a walker with the productivity of a rider, making it easier to gain efficiencies while delivering top-level performance.

SAVE FUEL. REDUCE NOISE.

A comprehensive Greensmaster line-up gives you options. Mow up to 20 greens on a single charge with the virtually silent lithium-ion battery-powered model.* Save up to 20% on fuel with the all-electric hybrid model. Petrol and diesel models are also available to suit your course's needs.

**Based on 650.3 m^2 (7,000 ft^2) size greens.*

GREENSMASTER®
RIDING GREENS MOWERS

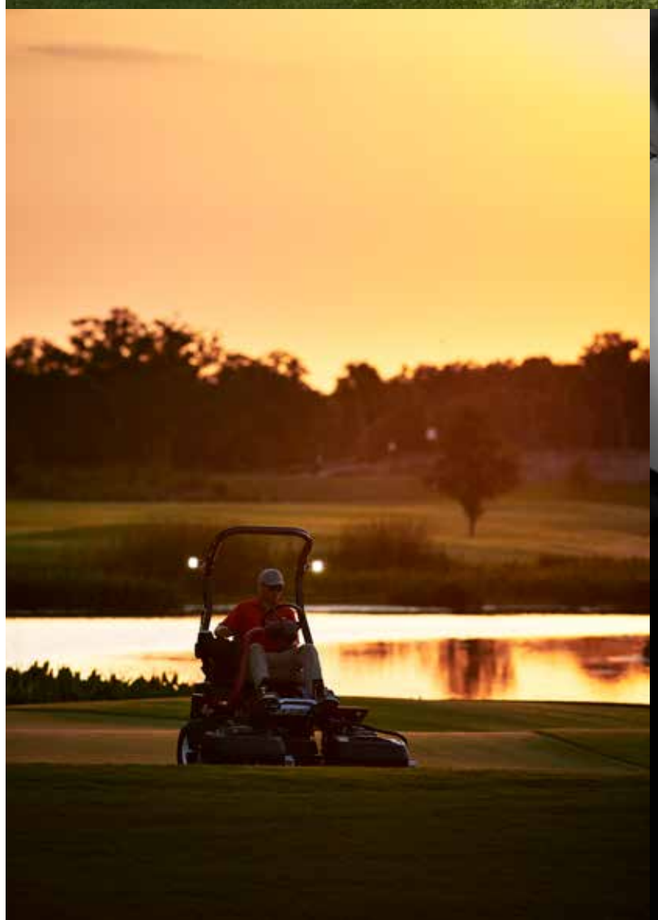

Greensmaster TriFlex®
3300 | 3320 | 3400 | 3420
Petrol or diesel models with hydraulic or electric-driven reels. Best for versatile power options and outstanding contour-following.

Greensmaster eTriFlex
3360 | 3370
Electric (lithium-ion battery) and hybrid models with all-electric drive. Best for high performance with low noise.

Greensmaster
3150-Q | 3250-D
Petrol or diesel models with proven performance and simplified controls. Best for classic dependability with a budget-friendly price.

GO AHEAD AND START EARLY. THE NEIGHBOURS WON'T MIND.

The all-electric Greensmaster eTriFlex is so quiet, it's practically undetectable by residents. With no engine or hydraulics to maintain, it also helps you save time and labour costs while achieving the even, true putting surface that players demand.

TOURNAMENT-WORTHY CUT
Radius-dependent speeds reduce wheel scrubbing and maintain a consistent cutting unit clip rate on each individual reel, virtually eliminating the "triplex ring" effect.

DO MORE WITH A SINGLE ASSET
Mow greens, change cutting units in minutes and have the same machine out mowing tees in record time. Greensmaster eTriFlex riding mowers are easy to adjust for multiple jobs with minimal downtime.

SUPERIOR CONTOUR FOLLOWING
An integrated "Flex" linkage system allows cutting units to pivot around the centre of the front roller to follow undulations. Combined with the Lift-In-Turn cutting unit levelling feature, this design delivers a precise, even cut through turns, over contours and at the start and end of cut lines.*

Selected features not available on all models. Check specifications for details.

GREENS ROLLERS

NEW

GreensPro® e1700 greens roller

The new GreensPro e1700 is an all-electric greens roller that delivers cutting-edge design, dependable performance and effortless operation. Its integrated trailer with SmartHitch, intuitive joystick control and the built-in pass alignment feature help your crew achieve uniform, repeatable results with greater operator efficiency and productivity. With its expandable Hypercell lithium battery pack, your crew can tackle even the most demanding layouts with confidence, finishing the job on a single charge. And because its fully electric design eliminates hydraulics, reduces noise and fumes, and requires less maintenance, the GreensPro e1700 brings intuitive power and reliable day-to-day operation together in one streamlined solution.

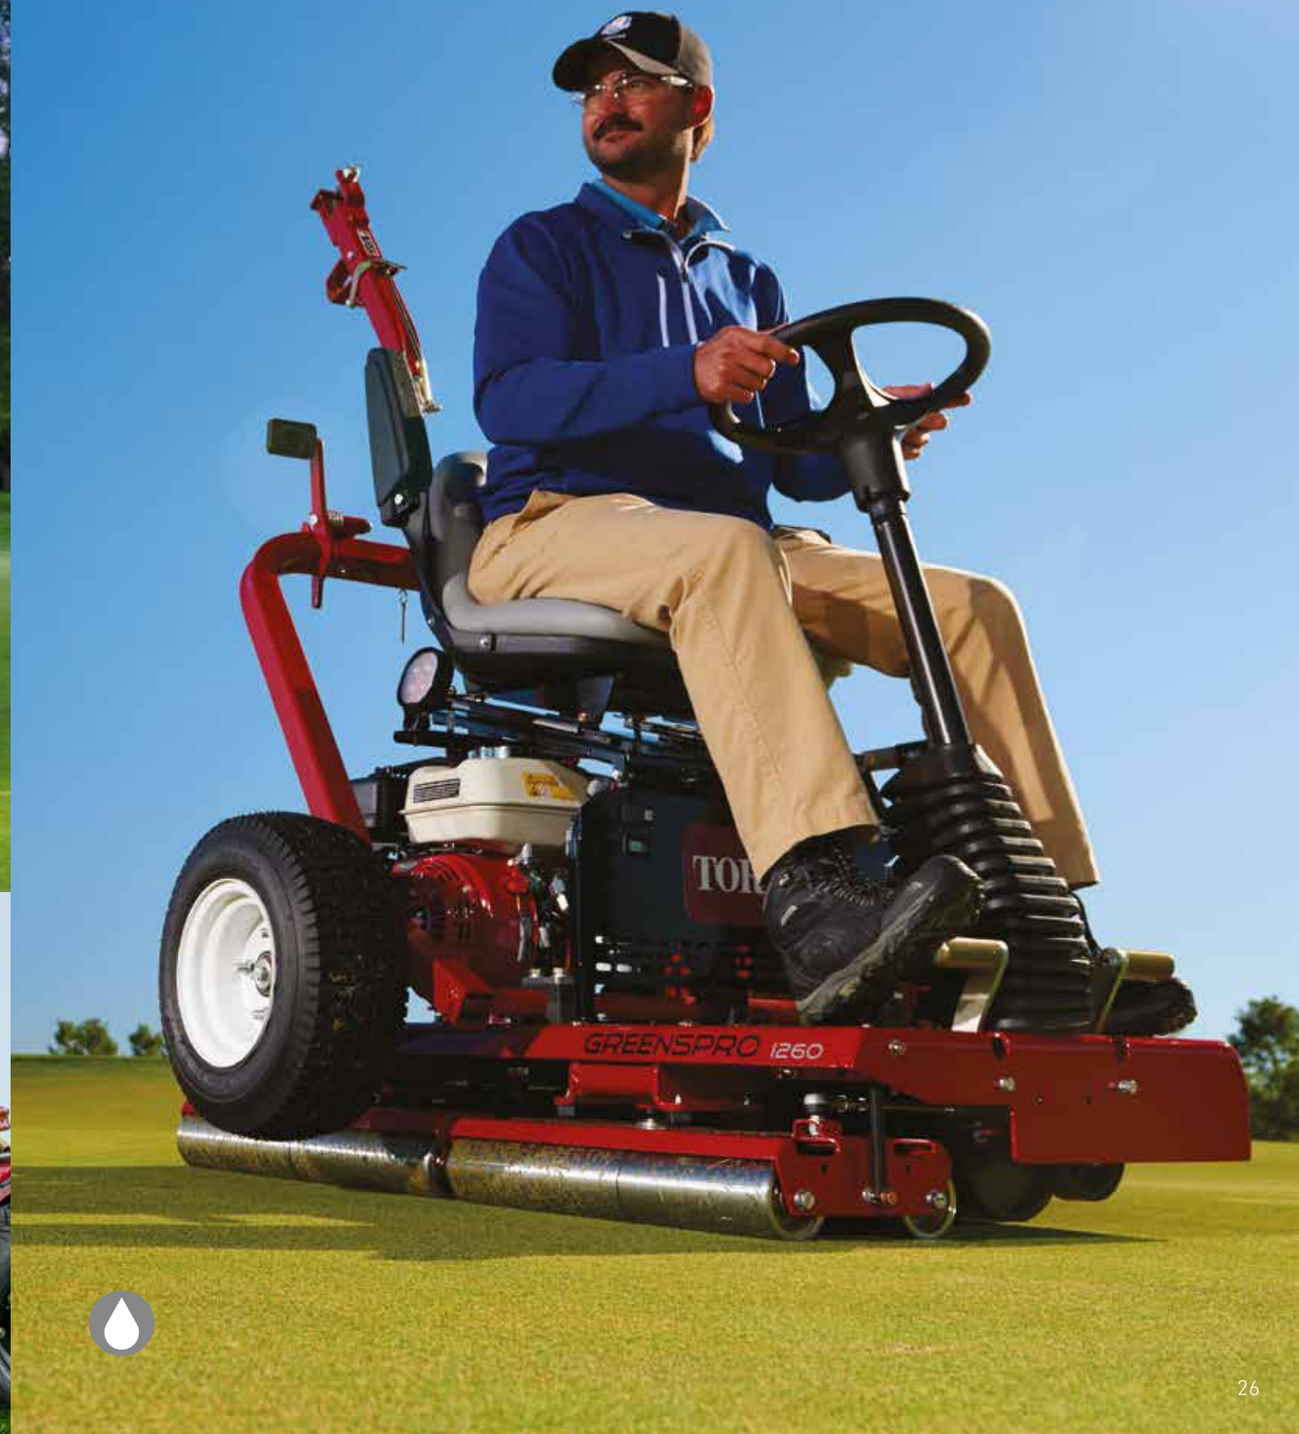

GreensPro 1260 greens roller

Create exceptionally smooth and fast putting surfaces with this dedicated greens roller. Independent, articulating smoothing heads follow undulations with an offset design that won't crease turf. The QuickLatch coupler also makes it easy to couple and de-couple from the tow vehicle, without any additional pins or couplers to latch.

Get a cut worthy of the *world's top courses.*

When your goal is to create the best player experience, nothing but the highest level of consistency will do. Reelmaster fairway mowers provide a superior cut that's so reliable that superintendents trust them to care for some of the most iconic and prestigious golf courses in the world.

REELMASTER
FAIRWAY MOWERS

Reelmaster 5010-H
As the first and only true hybrid fairway mower, the 5010-H is not only top of the line, it's in a class of its own. Designed for fuel savings and on-demand power needs, this premium model features electric reels that reduce the potential for oil leaks and continuously variable reel speed for a consistent clip rate.

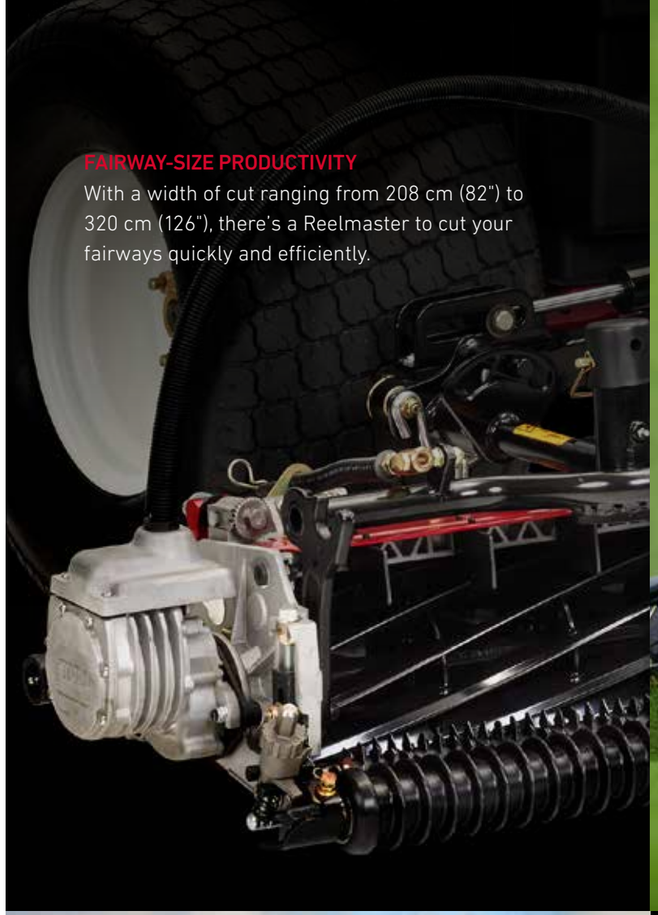

Reelmaster
5410 | 5510 | 5610
These full-size, full-capability four-wheel models have the power to perform your toughest jobs. Features include an InfoCenter, electronic cruise control and smart technology that adjusts ground speed for the cutting conditions (Yanmar engine only).

Reelmaster
3550 | 3555 | 3575
Compact and highly manoeuvrable, these three-wheel models are lighter weight and gentle on turf. They're also engineered for traction and stability in hilly and wet conditions, with minimal wheel slip.

Reelmaster 7000
The heavy-duty Reelmaster 7000 is designed for the most extreme fairway and rough conditions, including tough scalping and verticutting jobs. Full-time, bi-directional four-wheel drive enables superior hill climbing and traction on slopes.

FAIRWAY-SIZE PRODUCTIVITY
With a width of cut ranging from 208 cm (82") to 320 cm (126"), there's a Reelmaster to cut your fairways quickly and efficiently.

CHECK STATUS AT A GLANCE
The onboard InfoCenter on the 5010 series provides system information, alerts, service reminders, diagnostics and more.*

**New InfoCenter shown dispatching on products in late 2024.*

THE RIGHT POWER FOR THE CONDITIONS WITH FUEL SAVINGS TO MATCH.

Wet or dry. Sloped or flat. The hybrid Reelmaster 5010-H delivers just-right power for the conditions. With average fuel savings of up to 20%, it also helps to reduce your operating costs and your carbon footprint.*

COMFORTABLE ALL-DAY OPERATION

Reelmaster models are designed for maximum operator comfort, with features like a tilt steering wheel, deluxe suspension seat, optional sunshade canopy and cooling fan and a thoughtful design that helps keep heat and noise away from the operator.**

FULL FAIRWAY-SIZED EFFICIENCY

PowerMatch technology seamlessly interprets power requirements in real time, drawing variable, independent energy levels from both the efficient diesel engine and battery pack to match conditions on the ground.**

IMPROVED PERFORMANCE WITH LESS MAINTENANCE

By using electric cutting-unit motors instead of hydraulic motors, we've eliminated hoses, fittings and fluid, along with over 100 potential leak points. This not only improves performance but also significantly reduces maintenance requirements.**

*Compared to a conventional fairway mower. **Selected features not available on all models. Check specifications for details.

GROUNDSMASTER®
ROUGH MOWERS

Powerful productivity.
Refined results.

When you need to cover a lot of ground, you need a mower with the size and power to match. Groundsmaster rough mowers offer an impressive width of cut to help you make quick work of even the largest jobs, blending high efficiency and quality of cut with low maintenance and ease of operation.

GROUNDSMASTER®
ROUGH MOWERS

Groundsmaster Contour mowers
3500-D | 4300-D | 4500-D | 4700-D

Want the clean quality of cut of a reel mower with the maintenance ease of a rotary? This line-up is designed for you. Free-floating Contour Plus cutting units follow undulating terrain with virtually no scalping. Other features include full-time, all-wheel drive and Smart Power®, which adjusts the ground speed for the cutting conditions to ensure an impeccable after-cut appearance.

CUT AROUND TIGHT AREAS
Sidewinder® cutting units on the 3500-D shift left and right to cut around bunkers and other tight spots.

MORE ACRES PER HOUR
Choose from a range of sizes for production up to 4.89 ha/hour (12.1 acres/hour).*

**Specifications subject to change without notice. Assumes max. mow speed and 100% efficiency. Actual mowing rates may vary depending on operator and conditions.*

Groundsmaster 1200 pull-behind mower

True to the Groundsmaster's unmatched reputation for durability, the 1200 features the same proven spindles as our large rotary mowers to stand up to the roughest conditions. Three independent, fully articulating decks hug undulations for a high-quality cut and rich turf striping. Plus, the impact-absorbing design protects the frame against damage when conditions are rougher than expected.

VERSATILE AND TOWABLE
Tow the 1200 behind a tractor, adjust each deck to the exact mowing height that you need and fold up the wing decks for quick transport.

Groundsmaster large area mowers
4000/4010-D | 4100/4110-D | 5900/5910

Choose three decks for superior ground-following or a continuous deck for maximum visibility. Both configurations offer full-time, four-wheel drive and zero uncut circle in turns. Smart technology also adjusts speed and power for optimal cutting, no matter how tough the conditions. And auto-reversing fans keep chaff away to help the engine compartment stay cool.

CONSISTENT CUT IN HEAVY CONDITIONS
Smart Power® traction automatically adjusts ground speed in heavy cutting conditions, allowing less experienced operators to achieve a consistent cut on hills and thick patches.

ALL-SEASON COMFORT
Selected models offer a climate-controlled cab with air conditioning and heating.

NEW

Groundsmaster e3300 electric rough mowers

For golf courses looking for solutions to comply with new ordinances and regulations, the e3300 is a smart choice. Hypercell lithium-ion battery technology is designed for long life and optimal efficiency, with low noise and zero engine exhaust emissions. Additional features include customisable power settings, load control for improved traction and reserve power mode for safe return to the charging station.

CUSTOMISABLE POWER
The e3300 comes standard with 11 Hypercell batteries, but can be configured with up to 17 Hypercell batteries for heavy use in more demanding applications.

PROVEN DESIGN
The e3300 is built on the same rugged platform as the Groundsmaster 3300, with the added benefit of electric deck motors that reduce the number of hydraulic components.

RUN ALL DAY
Smart controls optimise power consumption by providing continuous and efficient power without bogging down the mower.

Works as hard as you do.
All day. Every day.

Whether you're setting cups, checking on irrigation or moving people or materials, Workman utility vehicles are built for the task. This highly configurable line-up lets you create the vehicle you need, with the range, power and performance to get the job done.

COUNTLESS OPTIONS. ENDLESS POSSIBILITIES.

From hauling equipment and tools to topdressing and spraying, the Workman line-up has you covered with some of the toughest and hardest-working utility vehicles on the market today.

TOUGH FROM BUMPER TO BUMPER

The HDX offers legendary hauling and towing capacity on a decades-proven frame that's built for the toughest jobs.

ENDLESS CUSTOMISATION

The UTX can be configured with two or four seats, and offers options like bed racking, a cab with heat/air conditioning and more.*

ALL-DAY LITHIUM-ION POWER

Both the GTX and MDX lithium-ion models use Hypercell battery technology, which delivers exceptional continuous runtime to work as long as your crew.

OUTSTANDING TRACTION AND STABILITY

The MDX series' frame twists on uneven terrain to keep all four wheels in constant contact with the ground while minimising turf damage.

Available options, features and accessories vary by model. Check specifications for details.

WORKMAN®
UTILITY VEHICLES

Workman GTX
The most versatile, practical and comfortable utility vehicle in its class. Hundreds of configurations are possible on both the petrol and electric models, including seating, cab, canopy, windscreen and multiple bed options. Best for customisation and a comfortable ride.

Workman MDX
This series features a hefty payload capacity and advanced suspension for superior ride quality. Available in petrol, diesel or lithium-ion battery-powered models. Best for everyday productivity and reduced operator fatigue.

Workman UTX
A straightforward, no-nonsense, four-wheel drive utility vehicle with the highest payload in its class. Petrol or diesel models available. Best for hauling, towing and all-season adaptability.

Workman HD/HDX
Heavy-duty series for the toughest tasks. Offers industry-leading hauling and towing capacity. Best for big jobs and versatility with optional accessories like a sprayer, spreader, topdresser and more.

NEW

INTRODUCING THE ALL-NEW WORKMAN LTX.

The next generation of light-duty utility vehicles is here. The new Workman LTX delivers everything that you asked for: power, comfort and elevated design. Powered by either the Briggs & Stratton Vanguard 400 EFI engine or the Toro® Hypercell lithium battery system, the LTX offers standard height, lifted or extended models to help you tackle your toughest days. With abundant storage, enhanced options, optimal design and rugged reliability, you don't have to choose between strength and versatility. The Toro Workman LTX provides both, because your work deserves the best.

POWER YOUR WAY

Select the Briggs & Stratton Vanguard 400 EFI petrol engine or the advanced Toro Hypercell lithium-ion battery system. Both deliver exceptional power, reliability and efficiency, so that you can tackle every job with confidence.

STEERING

An automotive-grade rack and pinion steering system provides control and lowers steering effort, while operating loaded or empty. This allows operators to focus on the task at hand and nothing else.

ENDLESS WAYS TO CUSTOMISE

The Workman LTX gives you the flexibility to tackle any job with dozens of configuration options. Choose standard height or lifted models, extend the bed for additional hauling or add an additional row of seats for more passengers. With accessories to match, you can make your office on wheels your own.

INTUITIVE DASHBOARD LAYOUT

Oversized cup holders and ample storage for tools and gear. Stay in control with easy-to-reach controls and a clear LCD display. Plus, keep your devices powered on the go with integrated USB-A and C charging ports.

SUSPENSION

Coil-over shocks all around the vehicle deliver greater suspension travel and adjustability, resulting in a smoother ride and minimised operator fatigue.

VISTA®
PASSENGER VEHICLES

Impress your guests with *a first-class ride.*

Elevate your guests' experience with seamless transportation from hotel to tee box and more. Vista series vehicles provide smooth and comfortable transit, whether you're escorting VIPs, assisting members or moving key volunteers and supplies.

VISTA®
PASSENGER VEHICLES

MADE TO MOVE

Save travel time for guests. Enhance efficiency for employees. Vista vehicles are equipped for dependable all-day transport. Choose from lithium-ion battery or EFI petrol engine-powered models for four, six or eight passengers.

LITHIUM-ION POWER
Hypercell battery technology optimises performance for all-day, maintenance-free dependability. Add an optional third battery for even more runtime.

EFI PETROL POWER
Familiar and dependable Electronic Fuel Injection (EFI) helps reduce noise emissions and improve performance.

SHUTTLE PASSENGERS IN COMFORT
Smooth, four-wheel independent suspension, generous legroom and ergonomically designed seating allow passengers to relax and enjoy the ride.

STOW AND GO
The rear seating section folds down, providing a flat surface for transporting baggage and other cargo.

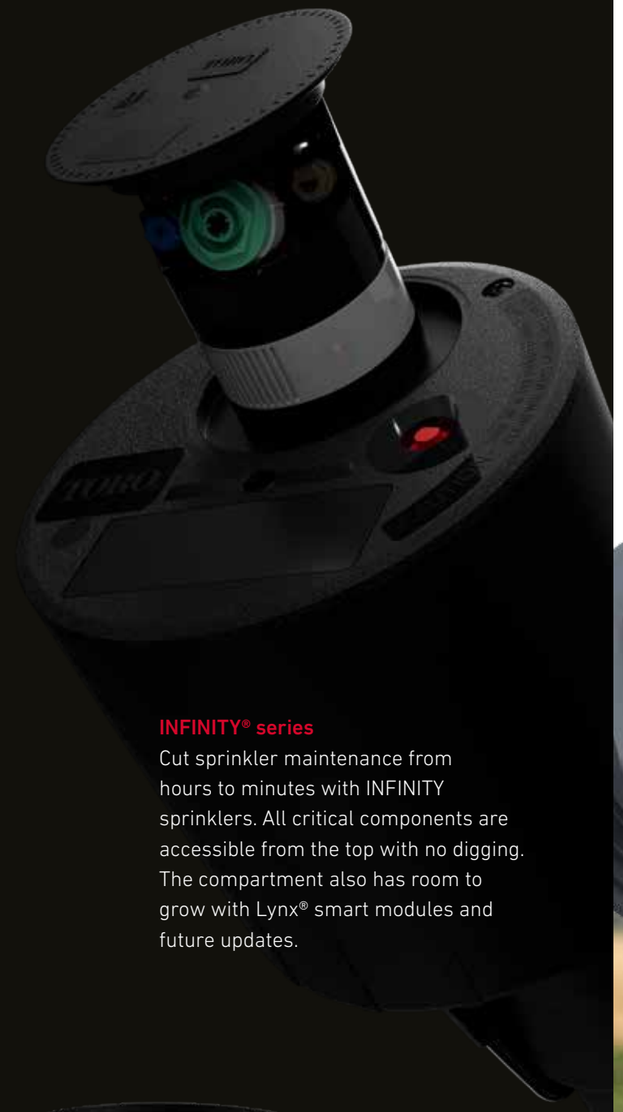

MAKE IT YOURS
The polar white body can easily be custom-branded with decals, wraps or paint.

SPRINKLERS

Ensure uniform watering *at the source.*

Your irrigation system is only as precise as the sprinkler that applies water to the turf. Toro® sprinklers deliver uniformity, versatility, efficiency and precision where it matters most, so that you can apply water with unmatched control.

INFINITY® series

Cut sprinkler maintenance from hours to minutes with INFINITY sprinklers. All critical components are accessible from the top with no digging. The compartment also has room to grow with Lynx® smart modules and future updates.

FLEX800 series

With features like an exceptionally durable stainless-steel valve seat and the industry's highest lightning rating, the FLEX800 series is an excellent choice for proven, reliable performance.

PERFORMANCE SERIES NOZZLES

EVEN BETTER, OPTIMISED WATER DELIVERY

Loaded into INFINITY and FLEX800 sprinklers, Performance series nozzles provide a streamlined approach to simplify the design process and optimise water delivery.

Unparalleled results. Performance specifications for common spacings enhance overall uniformity for a more even water application.

Easy to specify. New profile performance data is available to help consultants with specifying Toro sprinklers on an irrigation plan.

Quick identification. Nozzles are colour-coded for easy selection with one model colour for each main nozzle.

LYNX®
CENTRAL CONTROL SYSTEM

Better information for *better control.*

Effective irrigation is key to better playing conditions and golfer satisfaction. To get it right, you need the data to make decisions in real time. The Toro® Lynx central control system brings that information together in a single intuitive interface to help you save time, water and money.

INTEGRATES WITH CRITICAL SYSTEMS

Lynx can connect with systems ranging from soil and flow sensors to pump stations and weather stations, to monitor and report on conditions that affect irrigation.

UPGRADES AT YOUR OWN PACE

With Lynx, you can seamlessly combine satellite and two-wire systems and transition when you're ready, one station or hole at a time.

DESIGNED WITH SUPERINTENDENT INPUT.

Superintendents told us what they wanted and we listened. Lynx was developed not only to help superintendents solve today's challenges, but also to grow as needs change in the future.

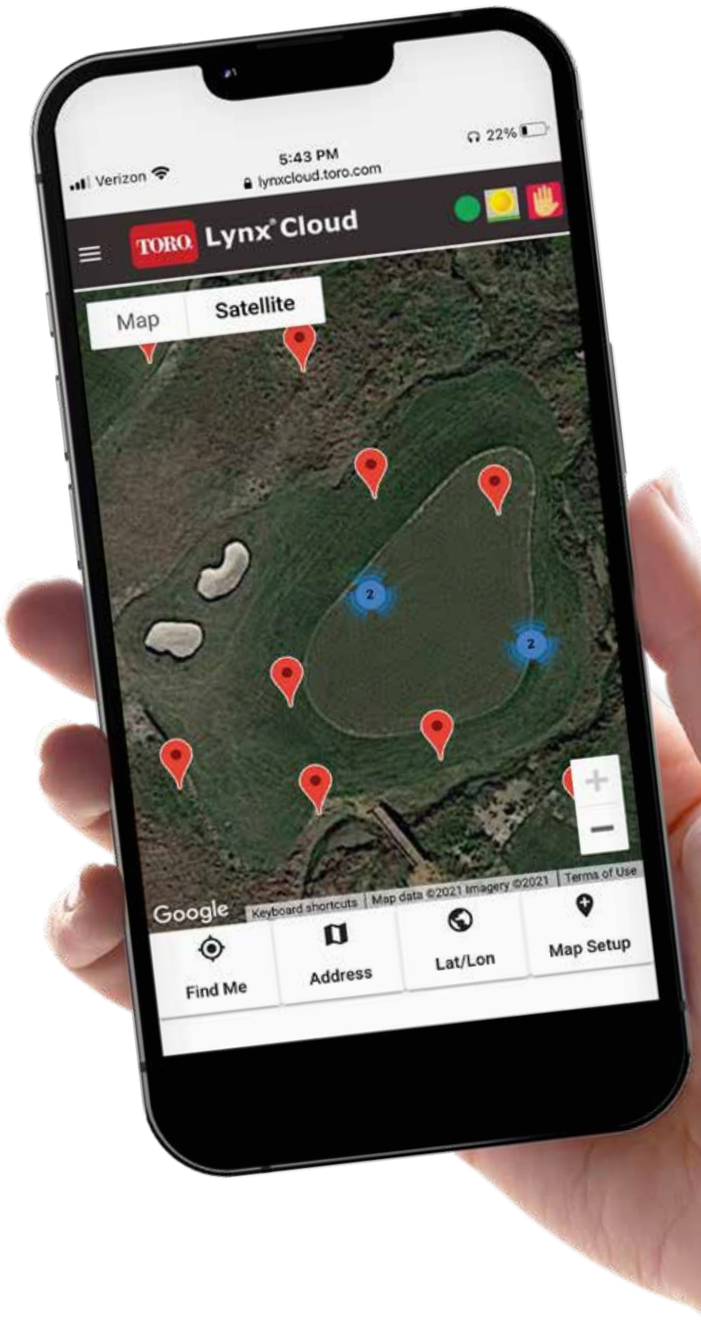

ANYWHERE, ANY-TIME ACCESS

You're not tied to a desktop. Our cloud-based option lets you manage irrigation from anywhere. And Lynx mobile apps make it easy to make manual adjustments from your smartphone or tablet on the fly.

EASY SET-UP AND CONTROL

Programme and control your irrigation activities directly from your course map, and easily make edits as your course conditions change. Powerful diagnostics inform you automatically if an issue needs attention.

FIELD CONTROL SYSTEMS

Manage irrigation with *speed and precision.*

When you water an area the size of a golf course, control is key because different areas have different conditions and requirements. Our flexible options help you to monitor and run your system with precision from the first sprinkler to the last.

WATER AS EXPECTED, EVEN WHEN THE UNEXPECTED HAPPENS.
Smart satellites and smart hubs can store and run a fully flow-managed programme from the field if the central control goes offline temporarily. And Lynx® central control adds best-in-class precision to each sprinkler.

LYNX SMART MODULE
Available for INFINITY® and FLEX800 sprinklers. Enables high-speed diagnostics and the ability to fine-tune watering to a precise amount. Also allows for easy upgrades without digging up your course.

UPDATE WITHOUT DIGGING OR TURNING OFF WATER
Perform software upgrades remotely with the click of a button from Lynx central control.

LYNX LAC DECODERS
Compatible with most AC systems, LAC decoders give legacy two-wire systems an instant upgrade, all with a quick and easy replacement. Whatever your existing technology, timescales and budgets, Lynx LAC empowers you to realise your vision for better golf.

MULTI PRO
TURF SPRAYERS

For healthy, playable turf, *accuracy matters.*

When you're applying product to your course, accuracy is key. Too little and the product may not be as effective as it could be. Too much and it can impact the health and playability of your turf. Multi Pro sprayers give you precise control for consistent, uniform coverage, and optional GeoLink® Spray can even help to eliminate overspray while saving labour and chemical costs.

MULTI PRO
TURF SPRAYERS

Multi Pro 5800 with GeoLink® Spray
A 1,136-litre dedicated sprayer featuring satellite-based technology that knows the machine's precise location.

PROGRAMME FOR PRECISE APPLICATION EVERY TIME
Standard on Multi Pro 5800 models, the ExcelaRate control system lets you calibrate and save your two most commonly used flow rates for simple, repeatable accuracy.*

Multi Pro 1750 with GeoLink Spray
A 662-litre dedicated sprayer equipped with the same satellite-based technology as the Multi Pro 5800.

Multi Pro WM
A 757-litre sprayer accessory with the flexibility of a bed-mounted design, that's easy to install and remove on a Workman® HD or HDX utility vehicle.

**Selected features not available on all models. Check specifications for details.*

OPTIMISE YOUR APPLICATION AND YOUR CREW.

Take operator error out of the equation with GeoLink® Spray, featuring satellite-guided technology that eliminates gaps and overlaps. Other options like GeoLink Steer and machine-to-machine also save time while enhancing accuracy.

USER-FRIENDLY CONSOLE

Brand-new display is 40% larger than the previous model and includes day and night mode for increased visibility in sunlight.*

PRODUCTIVITY-ENHANCING GEOLINK STEER

Available for the Multi Pro 5800 with GeoLink Spray, the optional GeoLink Steer feature ensures that the optimal next pass is followed, making the most efficient use of your sprayer.*

MAXIMUM SIGNAL STRENGTH

New global modem automatically connects to the best mobile signal on the property, regardless of the operator.*

OUTSTANDING LOCATION ACCURACY

GeoLink Spray is now capable of tracking twice the number of satellite constellations for highly accurate real-time kinematic (RTK) positioning. It also has a fallback feature that maintains accuracy if RTK positioning is lost temporarily.*

PRECISE APPLICATION

Controller/section valves accurately turn individual nozzle sections on and off based on the location of the machine for precise application.*

MACHINE-TO-MACHINE COMMUNICATION

With the optional machine-to-machine feature, a Wi-Fi antenna allows communication in real time with other GeoLink Spray machines. Spray jobs and coverage can be shared to eliminate overlap.*

**Selected features not available on all models. Check specifications for details.*

Get the results you want *with less disruption.*

Aeration is essential to sustain healthy, high-quality playing surfaces in high-traffic areas. But when your course is busy, downtime isn't ideal. The ProCore aerator line will help you return to play faster and get smooth, time-tested performance on all of your playing surfaces.

ProCore 648s
The industry standard in greens aeration for decades, now with advanced features for exceptional after-aeration results. Aerate precisely where you need to. Save key settings for a quick start. And boost productivity with increased speed between passes and a tighter turning radius with less wheel scrub.

ProCore 864 and 1298
Need to cover more ground? These large-area aerators save time in turnarounds with precision-balanced coring heads that run smoothly, even in the raised position with the power take-off (PTO) engaged. Features the same groundbreaking coring head design as the ProCore 648s.

ProCore SR series
These durable deep-tine aerators relieve subsurface soil compaction, allowing oxygen, water, critical nutrients and root growth to penetrate deep into the soil profile. Designed for use on all areas of your golf course.

TransPro 648
Transport your ProCore 648s or 648 securely with this trailer designed for quick loading and unloading. Front latch makes it easy to secure and release the aerator – no need for tie-down straps.

SMART SETTINGS
Set and save precise hole depth and spacing in the InfoCenter for consistent, condition-driven aeration that yields outstanding results.

IMPROVE TURF HEALTH AT THE ROOTS.

Make aeration day a success with precision aeration solutions for a quick return to pre-aeration playing surface quality.

SUPERIOR CONSISTENCY

Electronically-controlled hydrostatic drive maintains consistent hole spacing uphill or downhill and provides a tighter turning radius with no wheel push and scrub.

TARGETED, PRECISE AERATION

Delayed mode on the ProCore 648s allows operators to target precisely where they want the coring head to drop or raise, making starting and ending passes or jumping over in-ground obstacles easier.

IMPROVED OPERATOR EXPERIENCE

Ergonomic controls on the ProCore 648s allow one-handed operation from either side of the machine, so operators can walk and keep their focus forwards with less fatigue.

LASTING TINE DURABILITY

TITAN® tines are designed for exceptional hole quality and last up to three times longer than regular tines. With over 180 options to choose from, you can find the right tine for the job every time.

TRIM AND SURROUNDS MOWERS

FIND YOUR GO-TO SOLUTION FOR CHALLENGING SURROUNDS.

Maintaining a neat, trimmed appearance around greens, tees, bunkers and more demands a consistent, high-quality cut. However, these areas can also be some of the most challenging to mow. Our trim and surrounds mowers are engineered to manoeuvre around tight spaces and intricate contours with ease for a top-notch after-cut appearance, day after day.

Reelmaster 3100-D

A unique triplex mower designed for superior traction and cutting unit performance on all types of turf. The optional Sidewinder® cutting units can be shifted from side to side on the fly, reaching turf areas that other mowers simply can't. It's ideal for mowing around greens and bunkers where conditions can be challenging, but precision control is a must.

Groundsmaster® 3500-D

This triplex rotary mower is built for high-performance trimming. Its free-floating Contour Plus cutting decks follow undulating terrain without scalping, and the Sidewinder feature lets you shift cutting units from side to side to cut hard-to-reach turf. Full-time, three-wheel drive also gives operators added control.

HOVERPRO®/PROSTRIPE
WALK-BEHIND ROTARY MOWERS

eProStripe® 560 | ProStripe 560 striping mowers

ProStripe mowers combine a precise cut and clean, striped finish with the simplicity of a walk power mower. MatchCut® lets you fine-tune the height of cut in half-increment settings for uniform results in highly manicured areas. Add the optional groomer brush to stand up grass for a cleaner cut, help remove thatch and debris and create a crisper stripe. Choose from petrol-engine and lithium-ion battery-powered models.

eHoverPro® 450 | HoverPro 450 | HoverPro 550 hover mower

Mow areas where typical wheeled mowers aren't able to go and achieve a high-quality after-cut appearance. The HoverPro offers an ideal solution for maintaining turf on steep slopes, tight undulations or near water. For added versatility, the eHoverPro battery is also fully compatible with our extensive range of professional 60V tools.

PROLINE H-SERIES
ROTARY COLLECTION MOWERS

ProLine H600 | H800 direct collect rotary

Mow, collect and dispose of material efficiently – up to 7,500 m^2 (1.85 acres) per hour with the H600 and 12,000 m^2 (3 acres) per hour with the H800. These direct-collect rotary mowers feature high-capacity hoppers that let you work for longer without interruption. When it's time to unload, the high-lift dump system allows you to empty clippings directly into a truck bed or trailer with ease. Ideal for use around clubhouses, gardens and other areas where clean collection and a precise finish are essential.

SAND PRO
BUNKER RAKES

Sand Pro 3040 | 5040

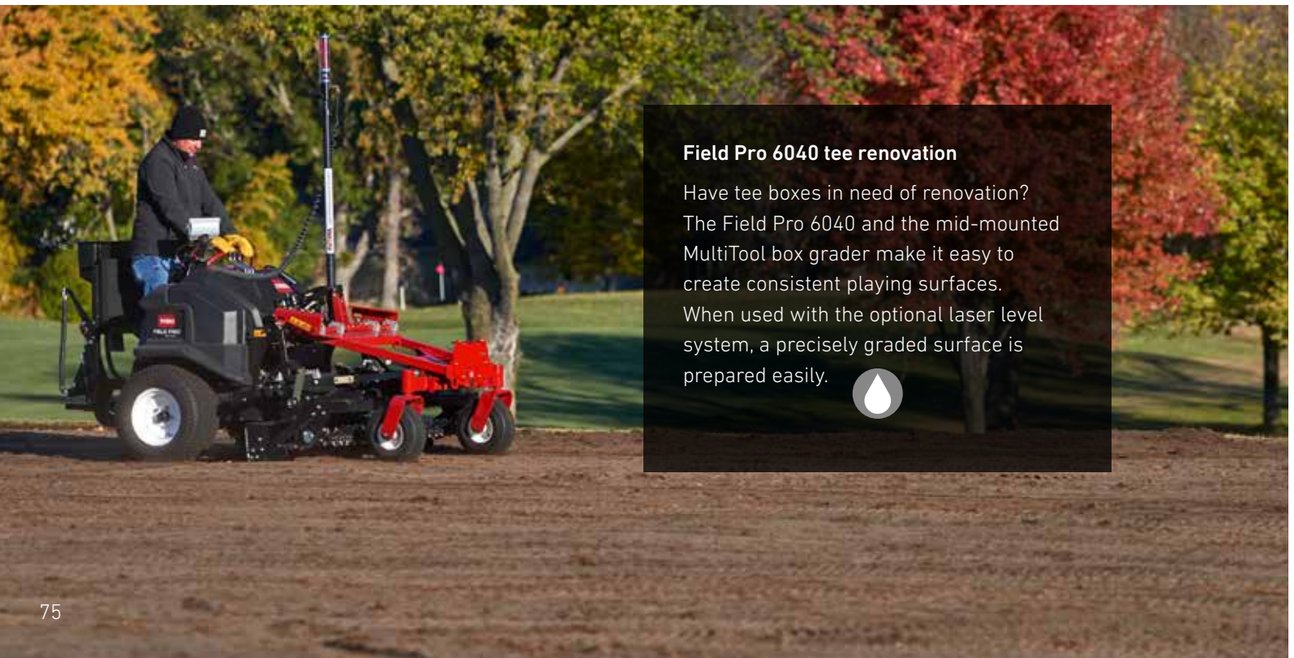

With more than 25 valuable attachments, these versatile machines offer as many uses outside the bunker as in it. The exclusive Quick Attach System (QAS) makes it easy to switch from one attachment to another in less than a minute, with no tools required. Plus, the Sand Pro 5040's optional front QAS provides added flexibility for the precision of steerable front attachments.

Sand Pro 2040Z

Access spaces that other machines can't with this zero-turn mechanical rake that's unlike anything else on the market. Operators can turn tightly in bunkers without leaving unraked teardrops or tyre marks, thanks to the "flex" raking system with the patented Lift-In-Turn feature.

Field Pro 6040 tee renovation

Have tee boxes in need of renovation? The Field Pro 6040 and the mid-mounted MultiTool box grader make it easy to create consistent playing surfaces. When used with the optional laser level system, a precisely graded surface is prepared easily.

ProPass 200 topdresser

The ProPass 200 makes it easy to achieve your desired topdressing spread pattern every time, without guesswork. Just slide the twin spinner assembly into place and the colour-coded "drop zone" adjustment system evenly applies materials, from light dustings to heavy aeration hole-filling applications. The ProPass 200 can be configured as a tow-behind or mounted to the bed of a utility vehicle.

Pro Force debris blower

Make quick work of clearing grass clippings, leaves, divots, aeration cores and other debris from your golf course with the Pro Force debris blower. You can rotate the nozzle 360 degrees in either direction, adjust the engine speed up or down and start and stop the engine from the operator's seat of a Workman® or similar utility vehicle with the hand-held remote control.

MH-400 series material handler

Reduce labour, save time and cut operating costs with this versatile option for applying a wide range of materials around the course. The cross conveyor is ideal for completing bunker and greens renovations, cart path rebuilding, applying mulch and more. Install the twin spinner accessory and the MH-400 becomes a large-area topdresser. The rear hitch receiver also allows you to tow implements, such as a wood chipper, in tandem.

PROTECT YOUR INVESTMENT.

Genuine Toro quality replacement parts

Trust the OEM quality of Toro Genuine Parts to ensure top-level performance from your equipment every day. Toro Genuine Parts are engineered specifically for your Toro equipment, so you know that you're getting the right part with the right specifications. We also offer 48-hour Toro-backed delivery on most parts, with support to get your equipment back in action faster.

Toro Protection Plus extended coverage

Toro's extended coverage can help you save money without compromising the quality of your equipment. Choose from comprehensive or drivetrain-only plans for up to 5 years or 5,000 hours and get seamless coverage that begins when the Toro Standard Warranty expires. Plans provide 100% coverage of both parts and labour, and repairs are performed by certified Toro technicians using only Toro Genuine Parts.

TORO FINANCING SOLUTIONS*

Whether choosing maintenance equipment or irrigation components for a renovation, your Toro representative has experience and is trained to help you look beyond the simple financing of one item to the next, looking at your longer-term equipment and economic needs. It's not a one-size-fits-all plan. Looking at the total cost of ownership will help you find the right acquisition solution for your course's specific needs. Toro has partnered with the premier golf financing companies in the industry to meet your needs.
